Clinical Nursing Calculations Susan Sienkiewicz, Sandra Megerdichian, 2024-02-13 Clinical Nursing Calculations, Third Edition is an essential text for teaching dosage calculation to undergraduate nursing students. The text employs the CASE approach, which is a step-by-step method for performing dosage calculations. The author team draws from extensive experience across the continuum of care to bring readers a truly informative and dynamic resource. Clinical Nursing Calculations has been expertly organized into four sections for easy navigation: Mathematics Overview, Principles of Medication Administration, Basic Dosage and Intravenous Calculations, and Advanced Calculations. In addition to clinical calculation coverage, the text also features expanded content on nutrition, insulin pen calculations, and the legal implications of medication administration. The Joint Commission and the Institute for Safe Medication Practice guidelines regarding safe medication administration are also featured. To facilitate learning, students will find examples in both electronic medication administration record (eMAR) and electronic health record format. This text can be used as a primary text for a dosage calculations course or as a supplemental text within a nursing program or pharmacology course--
