The Structure of Arguments I. M. Schlesinger, Tamar Keren-Portnoy, Tamar Parush, 2001-01-01 An important tool for scientific study in any field is a formal language in which the phenomena can be described and hypotheses formulated. In this book a formal notation is developed for the description of the cognitive structure of arguments. The analyses based on this notation are more fine-grained than the analyses in previous attempts, and they are applicable not only to arguments but to all types of moves in a discourse. Further, the notational system provides a basis for the description of relations between arguments and the structure of the discourse as a whole. In the final chapter, some empirical studies of retention of arguments in memory and of précis writing are reported, based on hypotheses formulated in terms of the notational system.

The Elements of Arguments: An Introduction to Critical Thinking and Logic Philip Turetzky, 2019-04-11 The Elements of Arguments introduces such central critical thinking topics as informal fallacies, the difference between validity and truth, basic formal propositional logic, and how to extract arguments from texts. Turetzky aims to prevent common confusions by clearly explaining a number of important distinctions, including propositions vs. propositional attitudes, propositions vs. states of affairs, and logic vs. rhetoric vs. psychology. Exercises are provided throughout, including numerous informal arguments that can be assessed using the skills and strategies presented within the text.

Dialectics and the Macrostructure of Arguments James B. Freeman, 2011-09-20 No detailed description available for Dialectics and the Macrostructure of Arguments.

Netherlands Reports to the XIth International Congress of Comparative Law Caracas 1982 H. D'Oliveira, 2013-11-11 Last year I addressed the Netherlands Comparative Law Association with the following question: 'Does Comparative Law Exist At All?' (My intention then was to flog the dead (?) horse of the merger of comparative law and the sociology of law.) In presenting this voluminous collection of Netherlands national reports to the eleventh congress of the International Academy of Comparative Law I feel my misgivings giving way to the suspicion, that comparative law indeed exists. Of course national reports do not, as such, prove the existence of comparative law. It is the general reports together with the national reports, which embody the comparative effort. That is why the Netherlands Comparative Law Association took the initiative to propose the publishing of the materials on a subject to subject basis instead of publishing collections of national reports.

From a comparative legal point of view, it is the topic that should form the basis of the publication, and not the origin of the materials. The general reporter for each topic should be prepared to take up the responsibilities of editing the volume, and would have to be given the right to select those national reports which he considers to be useful both in regard to their quality and the relevance of the material to the basic problems in the questionnaire. This proposal met with very favourable comments from the national committees and general reporters of some fifteen countries.

Preferences and Similarities Giacomo Riccia, Didier Dubois, Hans-Joachim Lenz, Rudolf Kruse, 2009-06-23 The fields of similarity and preference are still broadening due to the exploration of new fields of application. This is caused by the strong impact of vagueness, imprecision, uncertainty and dominance on human and agent information, communication, planning, decision, action, and control as well as by the technical progress of the information technology itself. The topics treated in this book are of interest to computer scientists, statisticians, operations researchers, experts in AI, cognitive psychologists and economists.

Interpreting Statutes D. Neil MacCormick, Robert S. Summers, 2016-12-05 This book is a work of outstanding importance for scholars of comparative law and jurisprudence and for lawyers engaged in EC law or other international forms of practice. It reviews, compares and analyses the practice of interpretation in nine countries representing Europe as well as the US and Argentina in common and civil law; it also explores implications for general theories of interpretation and of justification. Its authors, who include Aulis Aarnio, Robert Alexy, Ralf Dreier, Enrique Zuleta-Puceiro, Michel Troper, Christophe Grzegorzcyk, Jean-Louis Gardes, Enrico Pattaro, Michele Taruffo, Massimo La Torre, Jerry Wroblewski, Aleksander Peczenik, Gunnar Bergholtz and Zenon Bankowski, as well as editors Robert S. Summers and D. Neil MacCormick, constitute an international team of great distinction; they have worked on this project for over seven years.

Argumentation in Multi-Agent Systems Iyad Rahwan, Pavlos Moraitis, Chris Reed, 2005-02-09 The theory of argumentation is a rich, interdisciplinary area of research involving philosophy, communications studies, linguistics, psychology, and logics. Its techniques have found a wide range of applications in both theoretical and practical branches of artificial intelligence and computer science. Multi-agent systems theory has picked up argumentation-inspired approaches and specifically argumentation-theoretic results from many different areas. Researchers in argumentation and multi-agent systems are currently enjoying a unique opportunity to integrate the various understandings of argument into a coherent and core part of the functioning of autonomous computational systems. This book originates from the First International Workshop on Argumentation in Multi-Agent Systems, ArgMAS 2004, held in New York, NY, USA in July 2004. Besides 12 selected revised full papers taken from the workshop, 4 additional papers by key people in the area round off overall coverage of the relevant topics. The papers address the following main topics: foundations of dialogues, belief revision, persuasion and deliberation, negotiation, and strategic issues.

Les OGM à l'épreuve des arguments Sylvie Berthier, Valérie Péan, 2011-12 Les OGM, un impossible débat ? La Société des agriculteurs de France, l'association Débats et échanges sur les biotechnologies en agriculture (DEBA) et la Mission Agrobiosciences ont relevé le défi en organisant un dialogue entre plusieurs contradicteurs. C'est ainsi qu'à l'automne 2009, un groupe de personnalités, des plus critiques aux plus favorables, ont accepté de mettre à l'épreuve leurs arguments, qu'ils relèvent du champ économique, biologique, philosophique, juridique ou politique. Cet ouvrage puise dans le riche matériau des verbatims, pour mettre à jour la nature des dissensus sur les questions du risque et de l'incertitude, sur l'existence de plusieurs rationalités, sur les notions d'utilité et d'intérêt, sur l'idée d'une manipulation de l'opinion et de la décision... Plus surprenants, des terrains d'entente ont aussi émergé, par exemple sur la nécessaire redéfinition du modèle d'expertise. Surtout, une fois les OGM considérés comme de simples outils, ce sont bien leurs usages dans un système complexe, à commencer par les modèles agricoles, qui sont au cœur des discussions. Dans ce débat qui engage différentes conceptions du monde, au-delà de la confrontation entre les promoteurs des OGM et leurs opposants, ce sont deux univers qui se télescopent : le scientifique et le politique. Une avancée à mots découverts, un livre sans parti pris, pour tous les citoyens qui cherchent à se construire une opinion, les acteurs professionnels et les décideurs en panne de repère, les chercheurs et les étudiants qui analysent ces controverses.

Computational Argumentation: a Foundation for Human-centric AI Antonis Kakas, Loizos Michael, Emmanuelle Dietz, 2024-11-19 Human-centric AI aims at designing and developing systems that operate along with humans in a cognitively-compatible and synergetic way. Such systems are required to exhibit human-like cognitive abilities and intelligence, either at the general level of the human population or at some specialized level of expertise in a specific field. In either case, human-centric AI systems exist as (expert) companions or peers of their human users that would operate alongside them to support and enhance their capabilities.

Systematic Approaches to Argument by Analogy Henrique Jales Ribeiro, 2014-07-09 The present volume assembles a relevant set of studies of argument by analogy, which address this topic in a systematic fashion, either from an essentially theoretical perspective or from the perspective of it being applied to different fields like politics, linguistics, literature, law, medicine, science in general and philosophy. All result from original research conducted by their authors for this publication. Thus, broadly speaking, this is an exception which we find worthy of occupying a special place in the sphere of the bibliography on the argument by analogy. In effect, most of the contexts of the publications on this topic focus on specific areas, for example everyday discourse, science or law theory, while underestimating or sometimes even ignoring other interdisciplinary scopes, as is the case of literature, medicine or philosophy. The idiosyncrasy of this volume is that the reader and the researcher may follow the development of different theoretical outlooks on argument by analogy, while measuring the scope of its (greater or lesser) application to the aforementioned areas as a whole.

Thinking Through Revelation Robert J. Dobie, 2019-01-09 Navigating the seemingly competing claims of human reason and divine revelation to truth is without a doubt one of the central problems of medieval philosophy. Medieval thinkers argued a whole gamut of positions on the proper relation of religious faith to human reason. Thinking Through Revelation attempts to ask deeper questions: what possibilities for philosophical thought did divine revelation open up for medieval thinkers? How did the contents of the sacred scriptures of Judaism, Christianity, and Islam put into question established philosophical assumptions? But most fundamentally, how did not merely the content of the sacred books but the very mode in which revelation itself is understood to come to us – as a book “sent down” from on high, as a covenant between God and his people, or as incarnate person – create or foreclose possibilities for the resolution of the philosophical problems that the Abrahamic revelations themselves raised?

Neurologie Collège des enseignants de neurologie, 2022-01-11 L'ouvrage En parfaite conformité avec le programme de DFASM (diplôme de formation approfondie en sciences médicales) s'inscrivant dans la R2C 2021, cet ouvrage rassemble l'ensemble des connaissances indispensables à acquérir en neurologie. Il présente dans le détail les items du programme relevant de cette spécialité, avec des objectifs pédagogiques clairement définis, et comporte deux grandes parties : - une partie Connaissances composée de 30 chapitres qui traitent les items des UE relevant de la spécialité de neurologie. Chaque item fait l'objet d'un chapitre comprenant un rappel des objectifs pédagogiques nationaux, un plan systématique, un tableau de hiérarchisation des connaissances en rangs A et B, puis développe la thématique avec l'indication des rangs au fil du texte (les rangs C sont abordés, le plus souvent dans des encadrés spécifiques), étayée de points clés, tableaux et figures, de rubriques sur les notions à retenir. - une partie Entraînement proposant une cinquantaine de dossiers progressifs corrigés qui permettent de tester ses connaissances en vue de la préparation des épreuves. Cette 6e édition, encore plus didactique, est une remise à jour complète de l'ensemble des données et des entraînements, conformément à la dernière réforme du deuxième cycle. En phase avec les pratiques et recommandations les plus récentes, elle s'enrichit de nouvelles illustrations et propose un accès à une banque d'images et des vidéos en ligne. Accédez à la banque d'images de cet ouvrage : l'ensemble des illustrations y sont regroupées et accessibles facilement via un moteur de recherche. Et retrouvez d'autres fonctionnalités. Le public Les étudiants en DFASM qui souhaitent se préparer efficacement aux rangs A et B et valider leur DFASM. Essays on Argumentation in Antiquity Joseph Andrew Bjelde, David Merry, Christopher Roser, 2021-07-12 This book provides a collection of essays representing the state of the art in the research into argumentation in classical antiquity. It contains essays from leading and up and coming scholars on figures as diverse as Parmenides, Gorgias, Seneca, and Classical Chinese wandering persuaders. The book includes contributions from specialists in the history of philosophy as well as

specialists in contemporary argumentation theory, and stimulates the dialogue between scholars studying issues relating to argumentation theory in ancient philosophy and contemporary argumentation theorists. Furthermore, the book sets the direction for research into argumentation in antiquity by encouraging an engagement with a broader range of historical figures, and closer collaboration between contemporary concerns and the history of philosophy.

C Primer Plus Stephen Prata, 2002 The new classic! C Primer Plus, now in its 5th edition, has been revised to include over 20 new programming exercises, newly improved examples and the new ANSI/ISO standard, C99. Task-oriented examples will teach you the fundamentals of C programming. From extended integer types and compound literals to Boolean support and variable-length arrays, you will learn to create practical and real-world applications with C programming. Review questions and programming exercises at the end of each chapter will reinforce what you have learned. This friendly and easy-to-use self-study guide will help you understand the fundamentals of this core programming language.

Information Systems for Knowledge Management Inès Saad, Camille Rosenthal-Sabroux, Faiez Gargouri, 2014-03-06 More and more organizations are becoming aware of the importance of tacit and explicit knowledge owned by their members which corresponds to their experience and accumulated knowledge about the firm activities. However, considering the large amount of knowledge created and used in the organization, especially with the evolution of information and communications technologies, the firm must first determine the specific knowledge on which it is necessary to focus. Creating activities to enhance identification, preservation, and use of this knowledge is a powerful mean to improve the level of economical performance of the organization. Thus, companies invest on knowledge management programs, in order to develop a knowledge sharing and collaboration culture, to amplify individual and organizational learning, to make easier accessing and transferring knowledge, and to insure knowledge preservation. Several researches can be considered to develop knowledge management programs supported by information and knowledge systems, according to their context, their culture and the stakeholders' viewpoints.
