A typical header looks like this Cache-Control: public, max-age=10 public Indicates that the response may be cached by any cache. private **What's with all the cache/nocache stuff and weird filenames?** The .nocache.js file contains JavaScript code that resolves the Deferred Binding configurations (such as browser detection, for instance) and then uses a lookup table generated by the GWT Compiler to locate one of the .cache.html files to use. **What does NOCACHE do? | Tek-Tips** Nov 16, 2003 · The NOCACHE option specifies that the blocks retrieved for the table are placed at the least recently used end of the LRU list in the buffer cache when a FULL table scan is performed. This will cause the blocks read with a full table scan to be immediately flushed from the buffer cache.
