Louis I. Kahn Klaus-Peter Gast,Louis I. Kahn,1999 1999 is the twenty-fifth anniversary of Louis Kahn's death. In the second half of the twentieth century, Louis Kahn's designs took on enormous significance for international architecture. Kahn belonged to that generation of architects which perfected and simultaneously surpassed Modernism. Most of Kahn's projects were realised in the USA and several large projects were built in Asia. From Kahn's early work to larger projects such as the National Capital of Bangladesh in Dhaka and the Kimbell Art Museum in Fort Worth, the documented works all illustrate the human aspect in Kahn's work.

Louis Kahn's Situated Modernism Sarah Williams Goldhagen,Sarah Goldhagen Williams,Louis I. Kahn,2001-01-01 She demonstrates instead that Kahn's architecture is grounded in his deeply held modernist political, social, and artistic ideals, which guided him as he sought to rework modernism into a socially transformative architecture appropriate for the postwar world..

Louis I. Kahn Per Olaf Fjeld,Emily Randall Fjeld,2019-10-04 Louis I. Kahn: The Nordic Latitudes is a new and personal reading of the architecture, teachings, and legacy of Louis I. Kahn from Per Olaf Fjeld's perspective as a former student. The book explores Kahn's life and work, offering a unique take on one of the twentieth century's most important architects. Kahn's Nordic and European ties are emphasized in this study that also covers his early childhood in Estonia, his travels, and his relationships with other architects, including the Norwegian architect Arne Korsmo. The authors have gathered personal reflections, archival material, and other student work to offer insight into the wisdom that Kahn imparted to his students in his famous masterclass. Louis I. Kahn: The Nordic Latitudes addresses Kahn's legacy both personally and in terms of the

profession, documents a research trip the University of Pennsylvania's Louis I. Kahn Collection, and confronts the affiliation of Kahn's work with postmodernism.

The New Public Library R. Thomas Hille,2018-12-07 The New Public Library is an in-depth design study of an exemplary collection of recent public libraries, and the historical precedents that have informed and inspired their development. An introductory overview presents seven critical themes that characterize public library design, past and present, highlighting the expressive architectural potential of this unique and important building type. A survey of over 40 historically significant libraries traces the development of the building type over time, with a primary focus on precedents from the US and northern Europe, where the modern public library originated, and its design has been most comprehensively developed. A selection of nearly 50 contemporary projects from the past 30 years focuses on the most current developments in public library design, with a diverse and varied collection of work by over 35 regional, national, and international design firms. Highly visual in its presentation, the study includes 885 color photographs and illustrations, and 195 scale drawings.

Louis Kahn Carter Wiseman,2020-11-10 The man who envisioned and realized such landmark buildings as the Salk Institute, the Kimbell Art Museum, and the National Assembly complex in Bangladesh, Louis Kahn was born in what is now Estonia, immigrated to America, and became one of the towering figures in his adopted country's built world. His works are unmistakable in their elegance, monolithic power, and architectural honesty. Written by Carter Wiseman, one of Kahn's most respected commentators, this book offers a succinct, accessible examination of the life and work of one of America's greatest architects. It traces the influence of his immigrant origins, his upbringing in poverty, his education, the impact of the Great Depression, and the arrival of Modernism on his life and work. Finally, it provides insight into why, as the legacy of many of his contemporaries has receded in importance, Kahn's has remained so durably influential. *Louis Kahn: A Life in Architecture* provides the best concise introduction available to this singular life and achievement.

Louis I. Kahn in Rome and Venice Elisabetta Barizza,2021-07-22 This book examines the idea of organism in the work of Louis I. Kahn, from the turning point of Rome to the project for Venice. It presents an original interpretation of the work of Kahn during one of the most fruitful periods of his career, when he was working on a particular design method based on an entirely novel way of interacting with the past. Beginning with a meticulous documentation and analysis of Kahn's

experiences in the twenty years from 1930 to 1950, the book sheds new light on the relationship between Kahn's work and the modern movement. The arguments are supported by case studies, including that of the Palazzo dei Congressi in Venice based on Kahn's words (like his lessons in Venice at IUA, International University of Art, in 1971) and others as the Trenton Bath House, the Salk Institute (La Jolla), the Kimbell Museum (Fort Worth), the Yale Gallery and the Mellon Center for British Art (New Haven) and more. Unlike much of the by now well-established literature on Kahn's work, Louis I. Kahn in Rome and Venice suggests that the basic premise of Kahn's invention is the idea of spatial, constructive organism, which explains how he created forms that were inextricably anchored in the past, without imitating any one kind of ancient architecture. The main objective of the book is to explain Kahn's methodology to architects and students, showing how he was able to design an architectural object with the characteristics of the best designed objects: organisms, in which each part contributes, with the whole, to creating something made of indivisible parts.

Compositions in Architecture Don Hanlon, 2009-03-23 Architecture Use the patterns of architectural composition to inspire creative design In *Compositions in Architecture*, Don Hanlon offers students an excitingly original path to discovering architectural composition, one that avoids the traditional either/or choice between theory and practice. By exploring the underlying patterns of organization in architecture, this book enables the reader to connect architectural theory with the design process. And by relating what happens in the design studio with how the architect thinks about architectural composition, the approach spurs creative thinking. With examples that range across diverse cultures and historical periods—from the famous to the obscure—the author reveals the universal compositional strategies that can be used to solve particular architectural problems. Readers will explore: The five formal properties of composition—number, geometry, proportion, hierarchy, and orientation How the plan conveys the central organizing strategy of a building Typological similarities of architectural forms that cut across cultural, social, historical, and geographic boundaries Enriched by a graphic approach that will appeal to visual learners, *Compositions in Architecture* reveals the formal structures in architecture throughout the world as well as through the ages and inspires architects to turn abstract ideas into real-world design.

Twentieth-century American Architecture Carter Wiseman, 2000 Presents a survey of twentieth-century American landmark buildings and their architects including Louis Sullivan, Frank Lloyd Wright, and Frank Gehry.

Louis Kahn John Lobell, 2020-06-30 For everyone interested in the enduring appeal of Louis Kahn, this book demonstrates that a close look at how Kahn put his buildings together will reveal a deeply felt philosophy. Louis I. Kahn is one of the most influential and poetic architects of the twentieth century, a figure whose appeal extends beyond the realm of

specialists. In this book, noted Kahn expert John Lobell explores how Kahn's focus on structure, respect for materials, clarity of program, and reverence for details come together to manifest an overall philosophy. Kahn's work clearly conveys a kind of transcendent rootedness--a rootedness in the fundamentals of architecture that also asks soaring questions about our experience of light and space, and even how we fit into the world. In *Louis Kahn: Architecture as Philosophy*, John Lobell seeks to reveal how Kahn's buildings speak to grand humanistic concerns. Through examinations of five of Kahn's great buildings--the Richards Medical Research Building in Philadelphia; the Salk Institute for Biological Studies in La Jolla; the Phillips Exeter Academy Library in New Hampshire; the Kimbell Art Museum in Fort Worth; and the Yale Center for British Art in New Haven--Lobell presents a clear but detailed look at how the way these buildings are put together presents Kahn's philosophy, including how Kahn wishes us to experience them. An architecture book that touches on topics that addresses the universal human interests of consciousness and creativity, *Louis Kahn: Architecture as Philosophy* helps us understand our place and the nature of well-being in the built environment.

Topophilia and Topophobia Xing Ruan, Paul Hogben, 2020-10-28 This book is about the love and hate relations that humans establish with their habitat, which have been coined by discerning modern thinkers as topophilia and topophobia. Whilst such affiliations with the topos, our manmade as well as natural habitat, have been traced back to antiquity, a wide range of twentieth-century cases are studied here and reflected upon by dwelling on this framework. The book provides a timely reminder that the qualitative aspects of the topos, sensual as well as intellectual, should not be disregarded in the face of rapid technological development and the mass of building that has occurred since the turn of the millennium. Topophilia and Topophobia offers speculative and historical reflections on the human habitat of the century that has just passed, authored by some of the world's leading scholars and architects, including Joseph Rykwert, Yi-Fu Tuan, Vittorio Gregotti and Jean-Louis Cohen. Human habitats, ranging broadly from the cities of the twentieth century, highbrow modern architecture both in Western countries and in Asia, to non-architect/planner designed vernacular settlements and landscapes are reviewed under the themes of topophilia and topophobia across the disciplines of architecture, landscape studies, philosophy, human geography and urban planning.
