Ecología integral Ramírez González, Alberto,2023-07-02 La ecología surgió como ciencia a finales del siglo XIX al escindirse de la biología y definir un objeto de estudio específico relativo a la relación de los seres vivos con su entorno. Debido a la degradación del medio físico y a la destrucción de los ecosistemas naturales por acción de la especie humana durante el siglo XX, en las últimas décadas el estudio de la ecología ha tenido lugar bajo otras ciencias y disciplinas relativas a los subsistemas físicos, bióticos y sociales. Esto ha demandado de la disciplina una mirada inter- y transdisciplinar, necesaria para analizar de forma coligada la complejidad de la biósfera, dando así origen a la ecología integral. Este libro aborda el papel que desempeñan las distintas disciplinas en esta ciencia naciente, a la vez que expone los problemas ambientales más delicados que debe afrontar la humanidad durante el siglo XXI, como garantizar la seguridad energética y alimentaria, que resultan insostenibles a causa del crecimiento poblacional y el cambio climático ocasionado por el ser humano. Así mismo, desde la teoría de sistemas, el libro expone una visión e integración holística de los subsistemas referidos y da cuenta de procesos metodológicos cualitativos y cuantitativos, tanto desde un punto de vista teórico como aplicado, para emprender esta nueva ciencia. Precisamente, el último capítulo del libro se ocupa de Colombia como estudio de caso, con el fin de ilustrar cómo se puede abordar desde la ecología integral su situación socioecológica en los últimos cincuenta años.

Identificación Ecológica de Aves (versión pdf) Pablo José Jodra Arilla,2016-01-04 "Identificación Ecológica de Aves" trata sobre la identificación de aves silvestres desde la doble vertiente teórica y práctica. Estamos pues, ante un libro de

Ornitología de campo, Birding o Birdwatching. Puede ser leído por cualquier persona amante de las aves y de la naturaleza en general. Aquellos lectores interesados en las aves de las montañas mediterráneas, lo encontrarán especialmente interesante. Para ponerle el nombre a un ave, ejércitese en el campo con unos prismáticos y una Guía de aves convencional, cuyo proceso de identificación esté basado en el plumaje. Un observador de aves, con seis meses o un año de práctica en la identificación por el plumaje, ya puede pensar en crecer técnicamente añadiendo al plumaje, las marcas y procesos desarrollados en este volumen bajo el concepto de identificación ecológica de aves, IEA. En la IEA, el número de marcas se amplía incluyendo además de las del plumaje, las de la estructura, el comportamiento y el uso del hábitat. Las diferentes aproximaciones o procesos IEA para identificar aves, se denominan de filtrado y de ID por impresión. Tales procesos son de naturaleza holística por obligación, pues no se basan en una sola marca, la del plumaje, si no en varias cuya suma provee una imagen fidedigna del ave integrada en su entorno. Buscamos una visión de conjunto. De esta manera, el plumaje deja de ser la única referencia para pasar a convertirse en el eslabón final, verificador, de la conclusión ID. El primer proceso holístico de “filtrado”, es un proceso lógico de eliminación progresiva de las aves candidatas de una Colección Básica. En primer lugar se determina la Familia incógnita para, a continuación, eliminar las especies de esa familia hasta que solo quede la especie incógnita. Esta aproximación es procesada en el hemisferio cerebral izquierdo. El segundo proceso holístico de “ID por impresión”, ha evolucionado a partir del filtrado. Mediante su aprendizaje y uso se generan, en el lóbulo derecho del cerebro, impresiones de conjunto del ave incógnita. La generación de impresiones, se produce tras un periodo de familiarización consciente de las especies de las familias incluidas en la Colección Básica, al asociar las imágenes de las aves silvestres en observación con las palabras de la descripción de sus marcas. También ayuda a la generación de impresiones, la comparación en gabinete de las marcas entre las especies de una misma familia. Cuando el observador combina el uso de las dos aproximaciones holísticas, de filtrado e impresión, está usando la Identificación Ecológica de Aves. En ella, se implican ambos lóbulos del cerebro, lo que multiplica la eficacia de sus conclusiones ID. El observador adquiere, con este punto de vista ecológico, una comprensión más amplia de las aves. Por último, para identificar aves raras o muy semejantes entre sí, se aplica la ID avanzada del plumaje, que no es objeto de este volumen 1. En la ID avanzada por el plumaje, se elaboran agregados de marcas del color y del plumaje. En el volumen 1, los procesos teóricos de identificación, son llevados a la práctica de campo, proporcionando al observador procedimientos de aprendizaje y de aplicación sistemáticos. Las descripciones técnicas se acompañan de herramientas gráficas como diagramas y fotocomposiciones. Se proponen ejercicios de campo para adquirir experiencia. Numerosos ejemplos de campo ayudan a visualizar los procesos prácticos.

Fundamentos de ecología y medio ambiente - 1ra edición Leonardo Malacalza, Fernando Roberto Momo, Carlos Eduardo Coviella, Ecoe Ediciones, 2020-04-01 En los tiempos actuales las problemáticas relacionadas con el medio ambiente están presentes en todas las actividades humanas y su incidencia se acrecienta con las políticas de la globalización. En ese

sentido, este libro es una contribución al conocimiento de los ecosistemas, y un aliento para que los lectores adquieran la capacidad de observar la naturaleza con espíritu inquisitivo. El texto está organizado en dos partes. La primera presenta algunas bases de conocimientos biológicos y fundamentos de la teoría ecológica: la vida, la energía, la biósfera, teorías y pruebas de la evolución, los ecosistemas y sus funciones, las poblaciones y relaciones entre ecosistemas. La segunda parte describe y analiza temas relacionados con el ambiente: el origen del hombre, las poblaciones humanas, teorías acerca de su crecimiento, enfermedades ambientales y pobreza, la contaminación como problema social, cambio climático, agrotóxicos, metales pesados, hidrocarburos, elementos radiactivos, recursos naturales, extractivismo, el agua, el suelo y las diferentes formas de explotación agropecuaria

Urban Narratives about Nature Carlos Tabernero, 2024-10-15 When more than half of the Earth population lives in cities, and living conditions worldwide suffer from a steady increase in environmental issues, historical inquiry provides useful reflections and new perspectives on the present. *Urban Narratives about Nature: Socio-Ecological Imaginaries between Science and Entertainment* aims at generating specific historical knowledge concerning processes of production, circulation, and management of natural history narratives and the associated struggles for meaning within the socio-ecological relations involved. The city is a powerful storyteller, and this book, upon a relational perspective, provides a diverse and interrelated collection of case studies of urban-based production and circulation of narratives about nature. Altogether, these cases probe the complex relationships among scientific authority, public awareness, policymaking, corporate and political interests, and environmental advocacy, in effect expanding the interdisciplinary linking of urban and environmental history within a global history view.

La ecología en 100 preguntas Rocío Pérez Gañán, 2022-10-01 Esta obra sintetiza y expone de forma amena y didáctica, pero con rigurosidad científica, los fundamentos de la ecología como una disciplina accesible para todo tipo de lectoras y lectores, sean iniciados o no en la materia. Para unos será una original revisión, acercamiento y puesta en tensión de los tópicos más relevantes de la disciplina, para otros, un viaje iniciático a las complejas e intrínsecas relaciones humano-medio como sistema. Se abordarán los conceptos básicos, las ramas de conocimiento, las intersecciones con otras ciencias y disciplinas, el objeto de estudio y su método de abordaje, los mitos, las problemáticas ecológicas actuales, y las vías y propuestas para no llegar a una catástrofe ecológica sin retorno. Un libro de gran utilidad y rigurosidad, pero de lectura sencilla que no dejará de sorprenderte de principio a fin.

De Gruyter Handbook of Degrowth Lauren Eastwood, Kai Heron, 2024-03-04 Degrowth has emerged as one of the most exciting, and contested, fields of research into the drivers of global heating, ecological collapse, and economic injustice. The perspective is both a critique of existing growth-based models of development, which it argues have put humanity on a collision course with non-negotiable ecological limits, and a vision for a brighter future in which humans and non-humans alike can flourish. By putting an end to growth-seeking economic development and boundless energetic and material throughputs, degrowth's proponents suggest we can build an economy that meets the material needs of people and planet for generations to come. This handbook's contributions signal the importance of degrowth across multiple disciplines and practices. Along the way, they grapple with some of the most critical questions, ideological assumptions, policies, and social struggles of our time. The handbook approaches degrowth as a loosely knit and developing set of interdisciplinary propositions about what it might take to achieve a world of human and non-human flourishing. Contributors explore, challenge, and critique degrowth's propositions and its prospects of shaping scholarly agendas, policy frameworks, and social movements. Essays consider degrowth from a variety of empirical and theoretical vantages, including urban design, architecture, political economy, political ecology, critical geography, and political theory. This integrative approach, at once critical and constructive, aims to preserve for readers the sense of possibility that has drawn people to degrowth scholarship thus far.

Más allá de la ecología de la restauración: perspectivas sociales de America Latina y Caribe Eliane Ceccon, Daniel Perez, Este libro propone una reflexión sobre la restauración de ecosistemas terrestres en el contexto de un territorio con identidad en construcción activa -Latinoamérica y Caribe- enmarcado en una crisis social, económica, ecológica y política que se funda histórica y políticamente en el colonialismo y el modelo imperante de acumulación de capital. Por primera vez se reúnen reflexiones y experiencias prácticas de buena parte de los países de Latinoamérica y el Caribe en términos de restauración, y se consolida un enfoque social que posiblemente en el futuro adquiera un espacio preponderante en este campo en la región. Los autores afirman que hay un saber latinoamericano sobre la restauración que está en construcción y que ésta disciplina puede ser una herramienta para aumentar el empoderamiento de las poblaciones locales y llevar a cabo una acción colectiva de cambio. Están compilados aquí estudios de caso de 11 países de la región, que involucran una multiplicidad de voces emergentes que afloran más allá de principios generalistas y de “abajo hacia arriba”. La idea principal es abrir un debate sobre la identidad de la restauración ecológica y social en la región. Los destinatarios de este libro son practicantes de la restauración, voluntarios, gestores ambientales, investigadores, decisores políticos, ONG, que han deparado con la complejidad socioecológica de la práctica de la restauración en una región con problemas sociales ineludibles y tienen inquietudes similares a las de los numerosos autores presentes en los capítulos. Esta obra trata de integrar un movimiento en marcha, casi silencioso, que en sus albores va naciendo con sus narraciones propias que denotan éxitos y también fracasos, pero que no impiden su continuidad. Es de un valor destacable el empeño que se observa en los actores sociales Latinoamericanos y del Caribe para restaurar no sólo los valores naturales sino también los sociales, éticos y culturales.

El “grito de la tierra” y el grito de los pobres van inseparablemente unidos. La justicia social y la ecológica están íntimamente unidas y nunca deben ser separadas. La relevancia de estas voces del Sur global para la Gran Transformación en la que la humanidad está participando actualmente, nunca podrá ser exagerada. Prof. Jürgen Moltmann, Facultad de Teología de Tübinga El Manual Internacional de Ecodiaconía y Cuidado de la Creación demuestra la responsabilidad asumida por las instituciones religiosas en su llamamiento a la defensa pública y en el proceso de transformación que necesita la humanidad. Que éste sea una herramienta para materializar la llamada a dar pasos concretos hacia la justicia con la Creación de Dios. En ese camino, nuestra fe y nuestra esperanza son nuestra fuerza. Pastora Sonia Skupch, FLM, Secretaria Regional para América La crisis climática y las exigencias diacónicas respecto a este tema no son asuntos secundarios u opcionales para nuestra fe. El silencio ante esto no sólo nos hace cómplices sino que significa concretamente la negación de la fe en el Dios predicado por Jesucristo. Agradecemos esta publicación y animamos a nuestras comunidades en América Latina a leerla y estudiarla para que podamos ser testimonios vivos de la alianza de Dios con Noé y con toda la creación: Mientras dure la tierra, no cesarán la siembra y la cosecha, el frío y el calor, el verano y el invierno, el día y la noche (Gn 8:22). The New Extractivism James Petras, Henry Veltmeyer, 2014-03-13 In a primary commodities boom spurred on by the rise of China, countries the world over are turning to the extraction of natural resources and the export of primary commodities as an antidote to the global recession. The New Extractivism addresses a fundamental dilemma faced by these governments: to pursue, or not, a development strategy based on resource extraction in the face of immense social and environmental costs, not to mention mass resistance from the people negatively affected by it. With fresh insight and analysis from Argentina, Bolivia, Colombia, Ecuador, Mexico and Peru, this book looks at the political dynamics of capitalist development in a region where the neoliberal model is collapsing under the weight of a resistance movement lead by peasant farmers and indigenous communities. It calls for us to understand the new extractivism not as a viable development model for the post-neoliberal world, but as the dangerous emergence of a new form of imperialism.
