Citizenship and Collective Identity in Europe Ireneusz Pawel Karolewski, 2009-12-04 This book is the first monograph to systematically explore the relationship between citizenship and collective identity in the European Union, integrating two fields of research – citizenship and collective identity. Karolewski argues that various types of citizenship correlate with differing collective identities and demonstrates the link between citizenship and collective identity. He constructs three generic models of citizenship including the republican, the liberal and the caesarean citizenship to which he ascribes types of collective identity. Using a multidisciplinary approach, the book integrates concepts, theories and empirical findings from sociology (in the field of citizenship research), social psychology (in the field of collective identity), legal studies (in the chapter on the European Charter of Fundamental Rights), security studies (in the chapter on the politics of insecurity) and philosophy (in the chapter on pathologies of deliberation) to examine the current trends of European citizenship and European identity politics. This book will be of interest to students and scholars of European politics, political theory, political philosophy, sociology and social psychology.

Une épuration allemande Guillaume Mouralis, 2008-02-27 A l'approche du vingtième anniversaire de la chute du mur de Berlin, ce livre s'interroge sur la manière dont le communisme a été politiquement digéré et jugé en Allemagne depuis sa disparition à l'automne 1989. Car dans l'Europe postcommuniste, l'Allemagne fait figure d'exception : tandis que la plupart des anciennes démocraties populaires ont largement renoncé à punir les crimes d'Etat commis sous les régimes communistes déchus, l'Allemagne unifiée s'est engagée dans la voie d'une large épuration. Des milliers de procès pour meurtre au mur de Berlin et autres violations des droits de l'homme en RDA eurent lieu après le 3 octobre 1990. Ces procès n'étaient d'ailleurs que l'aspect le plus marquant d'un ensemble de politiques du passé aussi diverses qu'ambitieuses. Pour tenter de comprendre le Sonderweg allemand en ce domaine, il était nécessaire de sortir du cadre chronologique étroit des années

1990. L'auteur explore la double genèse de l'épuration qui suivit l'unification allemande : d'une part, les premiers pas de cette épuration furent accomplis, en RDA même, au cours de la « révolution pacifique » de l'automne 1989. D'autre part, la justice ouest-allemande était remarquablement bien préparée à accomplir cette mission. C'est en effet à des magistrats tous issus de l'ancienne République fédérale qu'incomba la tâche d'enquêter sur les crimes commis en RDA et de punir leurs auteurs. Or la justice ouest-allemande préparait l'épuration depuis 1949, à la faveur de la guerre froide qui opposa les deux Etats allemands. En outre, l'expérience ouest-allemande des procès de criminels nazis joua, dans les années 1990, un rôle déterminant : l'échec supposé de ces derniers fut volontiers invoqué pour justifier une épuration postcommuniste ample et ferme. Plus fondamentalement, responsables politiques et magistrats usèrent largement d'outils juridiques forgés à l'occasion des procès de criminels nazis. Guillaume Mouralis est agrégé et docteur en histoire. Il a soutenu en 2005 une thèse, qui est à l'origine de cet ouvrage. Ses travaux portent sur l'histoire de l'Allemagne et sur l'histoire de la justice au xx^e siècle.

Masters and Lords Shearer Davis Bowman, 1993-04-29 Among the regional landed elites in the Western World of the mid-1800s, the two most formidable were the owners of slave plantations in the Southern states of the U.S. and the proprietors of manorial estates in the provinces of Prussian East Elbia. *Masters and Lords* surveys the economic, social, and political histories of the two classes from the seventeenth and sixteenth centuries respectively, and pays particular attention to planters during the secession crisis of 1860-61 and to Junkers during the revolutionary crisis of 1848-49. In the process, Bowman grapples with such ambiguous and contentious concepts as capitalism, conservatism, and paternalism. Despite very different labor systems, antebellum planters and contemporaneous Junkers alike presided over landed estates that functioned as both autocratic political communities and agricultural enterprises exporting valuable commodities to industrializing England. This book also highlights important geographic, demographic, and political contrasts between the South and East Elbia as regional societies. Bowman concludes that the crucial distinction between the two landed elites is to be found in the Junkers' militarist and statist monarchism versus the planters' libertarian but racist republicanism.

Geopolitical Risk, Sustainability and “Cross-Border Spillovers” in Emerging Markets, Volume II Michael I. C. Nwogugu, 2022-01-01 Many emerging market countries are bank-based economies and are increasingly affected by geopolitical risks, U.S. dollar dynamics, regulations, preferential trade agreements (PTAs), MNCs (that often function like international organizations), social networks, labor dynamics, cross-border spillovers and the inefficient expansion of formal/informal microfinance. Country risks, informal economies (that account for 20-50 percent of the national economy of many emerging market countries), investor protection, enforcement commitment, compliance costs, sustainability

(environmental, social, economic and political sustainability), economic growth, political stability, financial stability, geopolitical risk, social networks, household economics, inequality and international trade outcomes can vary dramatically across many DEC and LDECs due to these phenomena. The COVID-19 pandemic has illustrated the many problems inherent in political systems, economic policy and governments' emergency powers during pandemics/epidemics and economic/financial crisis. This second volume focuses on geopolitical risks that are intertwined with constitutional political economy and labor issues, alongside addressing some of the financial and constitutional crises that occurred in Europe, Asia and the U.S. during 2007-2020. This book provides analysis of complex systems and the preferences and reasoning of state/government and corporate actors in order to develop better artificial intelligence and decision-system models of geopolitical risk, public policy and international capital flows, all of which are increasingly important decision factors for investment managers, boards-of-directors and government officials.

Belonging in the Two Berlins John Borneman, 1992-10-15 This is an ethnographic investigation into the meaning of German selfhood during the Cold War. Borneman shows how ideas of kin, state, and nation were constructed through processes of mirror imaging and misrecognition. Using linguistics and narrative analysis he compares the autobiographies of two generations of Berlin's residents with the official versions prescribed by the two German states.

The Campus Novel, 2019-01-04 The Campus Novel – Regional or Global? presents innovative scholarship in the field of academic fiction. Whereas the campus novel is traditionally considered a product of the Anglo-American world, the present study opens a new perspective: it elucidates the intercultural exchange between the well-established Western canon of British and American academic fiction and its more recent regional response outside the Anglo-American territory.

Constitutional Courts, Media and Public Opinion Angioletta Sperti, 2023-11-16 This book explores how constitutional courts have transformed communication and overcome their reluctance to engage in direct dialogue with citizens. How has the information revolution affected the relationship of constitutional courts with the public and the media? The book looks in detail at the communication strategies of the US Supreme Court, the Supreme Court of Canada, and in Europe the German Federal Constitutional Tribunal, the French Conseil Constitutionnel and the Italian Constitutional Court, arguing that when it comes to the relationship between courts and the media, different jurisdictions share many similarities. It focuses on the consequences of the communication revolution of courts both in terms of their relationship with public opinion and of the legitimacy of judicial review of legislation. Some constitutional courts have attracted criticism by engaging in proactive communication and, therefore, arguably yielding to the temptation of public support. The book argues that objections to the developing institutional communications employed by courts come from a preconceived notion of public opinion. It considers the burden the communication revolution has placed on constitutional courts to achieve a balance between transparency and

seclusion, proximity and distance from public opinion. It puts forward important arguments for how this balance can be achieved. The book will interest scholars in constitutional law and public comparative law, sociologists, historians, political scientists, and scholars of media law and communication studies.

Geopolitical Risk, Sustainability and “Cross-Border Spillovers” in Emerging Markets, Volume I Michael I. C. Nwogugu, 2021-08-30 Economic recessions, social networks, environmental damage in several large countries (eg. China, Brazil, U.S.), the Global Financial Crisis of 2007-2015 and cross-border spillovers continue to significantly affect economic systems, financial markets, social structures and environmental compliance worldwide. These have rekindled economists’ and policy-makers’ interest in the relationships among constitutions, risk regulation, foreign aid, political systems, government size, credit expansion and sustainable growth. Risk regulation remains highly ineffective as manifested by the failures of new financial regulations and government stimulus programs that were implemented during 2007-2020 in many developed countries and emerging markets countries. This book, the first of two volumes, addresses these issues in the context of the role of constitutional economics and economic psychology as tools for national and global sustainable growth and risk management. Furthermore, this volume analyzes the often symbiotic relationship between alternative sets of legal-institutional-constitutional rules that constrain the choices and activities of economic and political agents on one hand, and sustainable growth, financial regulation and the risk management of financial institutions on the other; and reviews the effects of constitutions and legal institutions on market dynamics (real estate; fixed-income, stocks; etc.) including volatility, market depth and liquidity. This book will help researchers develop better artificial intelligence and decision-systems models of geopolitical risk, public policy and international capital flows, all of which are increasingly relevant to investment managers, boards-of-directors and government officials.

Rule of Law and Fundamental Rights Alfredo Narváez Medécigo, 2015-11-07 This book, which originated from the broadly held view that there is a lack of Rule-of-law in Mexico, and from the emphasis of traditional academia on cultural elements as the main explanation, explores the question of whether there is any relationship between the system of constitutional review — and thus the ‘law’ as such — and the level of Rule-of-law in a given state. To do so, it elaborates a theoretical model for achieving Rule-of-law and compares it to the constitutional review systems of the United States, the Federal Republic of Germany, and Mexico. The study concludes that the two former states correspond to the model, while the latter does not. This is fundamentally due to the role each legal system assigns to ordinary jurisdiction in carrying out constitutional review.

Whereas the US and Germany have fostered the policy that constitutional review regarding the enforcement of basic rights is the responsibility of ordinary courts, Mexico has relied too heavily on the specialized constitutional jurisdiction.
