*A Sociological Genealogy of Culture Wars* Maya Aguiluz-Ibargüen,Josetxo Beriain,2023-12-12 This book analyzes the culture wars as those struggles for the monopoly of the legitimate representation of the world in the normative elucidation of controversial issues linked to values. Public culture in this context would consist of a set of complex classificatory systems of symbols and meanings that constitute a semantic field in permanent dynamic tension. In this work we analyze a whole series

of lines of cultural conflict such as the social and semantic genesis of the different forms of “culture war” from the thesis of “modern polytheism” pointed out by Max Weber at the beginning of the 20th century to the national culture wars and the current global culture wars; the social production of truth and the clash with the epistemological tribalisms; the struggles between the new warrior gods, daimons and demons that emerge in modern societies; the struggles of fusion and fission on the symbolic battlefield of “Europe”; the struggles between “pioneers” and “gatekeepers” to define the limits of human nature; the struggles between utopias and dystopias that colonize the present future. This book will be of great help to anybody looking for key interpretations on the nature and structure of modern conflicts in contemporary societies.

The Cambridge History of Latin American Women's Literature Ileana Rodríguez, Mónica Szurmuk, 2015-11-12 The Cambridge History of Latin American Women's Literature is an essential resource for anyone interested in the development of women's writing in Latin America. Ambitious in scope, it explores women's literature from ancient indigenous cultures to the beginning of the twenty-first century. Organized chronologically and written by a host of leading scholars, this History offers an array of approaches that contribute to current dialogues about translation, literary genres, oral and written cultures, and the complex relationship between literature and the political sphere. Covering subjects from cronistas in Colonial Latin America and nation-building to feminicide and literature of the indigenous elite, this History traces the development of a literary tradition while remaining grounded in contemporary scholarship. The Cambridge History of Latin American Women's Literature will not only engage readers in ongoing debates but also serve as a definitive reference for years to come.

**Hermaphroditism, Medical Science and Sexual Identity in Spain, 1850-1960** Richard Cleminson, Francisco Vázquez García, 2009-10-31 This is the first book in English to analyse the medical category of 'hermaphroditism' in Spain over the period 1850-1960. It attempts to show how the relationship between the male and female body, biological 'sex', gender and sexuality constantly changed in the light of emerging medical, legal and social influences. Tracing the evolution of the hermaphrodite from its association with the 'marvellous' to the association with intersexuality and transexuality, this book emphasizes how the frameworks employed by scientists and doctors reflected not only changing international paradigms with respect to 'hermaphrodite science' but also social anxieties about shifting gender roles, the evolving discourse on sexuality and, in particular, the increased visibility of the 'sexual deviancies' such as homosexuality and changing legislation on marriage and divorce. Finally, we hope to open a space whereby the voice of 'hermaphrodites' and 'intersexuals' themselves could be heard in the past as agents in the construction of their own destiny as figures deemed 'in-between' by medicine and society.

**Blurring organizational issues and social phenomena in the age of technology: a multidisciplinary perspective**

Nemesio Castillo,Alberto Ochoa,Chl   Mal  part,2013-04-29 The predominant view in economic theory until the crisis of the '70s, argued the great enterprise was the key player in the innovation process, this was conceived as an activity that unfolded in specific areas, with clear responsibilities and predetermined objectives. This operating structure of the innovative process was functional demand model that favored the standardization of production. The innovative process was developed predominantly by firms that had a domain oligopolistic market from which they made windfall with which financed the research and development activities. In this context, the role of SMEs in the innovation process is limited to covering the portion of the market that big companies left.

**Michel Foucault. Derecho y poder** Benente, Mauro,2015-01-01 Este libro es uno de los pocos estudios que se han realizado sobre la espec  fica conceptualizaci  n del derecho en la obra de Foucault, as   como de la relaci  n de algunos de sus conceptos, como el poder disciplinario, la biopol  tica y la gubernamentalidad, con el mismo derecho. Lo valioso, lo que permite aprender de los estudios que integran este volumen es que no necesariamente cuestionan al “derecho” o a la ley, sino que se plantean problemas espec  ficos. Y en ello se reflejan como textos “foucaulteanos” ya que al dar cuenta del t  rmino “problematizaci  n”, Foucault pretend  a evitar la reproducci  n de la misma visi  n que se puede y debe cuestionar, y para ello hay que evitar la institucionalizaci  n y focalizarse en el problema concreto. Desde la irrupci  n del pensamiento cr  tico no existe la posibilidad de un saber objetivo y neutro, y ello constituye la carga de profundidad que impacta m  s severamente en toda la pretensi  n del derecho de ser una herramienta ahist  rica, dogm  tica o sist  mica. Es por ello necesario no ver en esa “caja de herramientas” una teor  a del derecho, o del poder, sino simplemente herramientas metodol  gicas para analizar sus particularidades desde las subjetivadas perspectivas personales.

Cyber Warfare and Terrorism: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2020-03-06 Through the rise of big data and the internet of things, terrorist organizations have been freed from geographic and logistical confines and now have more power than ever before to strike the average citizen directly at home. This, coupled with the inherently asymmetrical nature of cyberwarfare, which grants great advantage to the attacker, has created an unprecedented national security risk that both governments and their citizens are woefully ill-prepared to face. Examining cyber warfare and terrorism through a critical and academic perspective can lead to a better understanding of its foundations and implications. Cyber Warfare and Terrorism: Concepts, Methodologies, Tools, and Applications is an essential reference for the latest research on the utilization of online tools by terrorist organizations to communicate with and recruit potential extremists and examines effective countermeasures employed by law enforcement agencies to defend against such threats. Highlighting a range of topics such as cyber threats, digital intelligence, and counterterrorism, this multi-volume book is ideally designed for law enforcement, government officials, lawmakers, security analysts, IT specialists, software developers, intelligence and security practitioners, students, educators, and researchers.

**Trauma, Psychoanalysis and History** Luis Sanfelippo, 2023-10-12 Located at the crossroads of psychoanalysis and history, this book investigates the ambiguous concept of trauma and the changes to its formulation and use between the years 1866 and 1939. Luis Sanfelippo introduces the original conceptions of trauma outlined by Sigmund Freud, Pierre Janet and their contemporaries, before investigating how the meaning of this concept was influenced and informed by large-scale historical events like the First World War. *Trauma, Psychoanalysis and History* investigates the multiple problems linked to this fetishised category and how it has developed over time. Sanfelippo also considers the historiographical and conceptual problems raised by the application of trauma to collective memory and contemporary history, reflecting on what this means for historiography. *Trauma, Psychoanalysis and History* will be of great interest to students in training for psychotherapy and mental health practice, trained psychoanalysts, as well as academics and scholars of psychoanalytic studies, the history of psychology, trauma studies and modern history.

**Theory of Experience in Architecture and Urban Design** Adolfo Benito Narváez Tijerina, Gabriela Carmona Ochoa, 2024-07-05 This unique volume presents the practical tools for architects and urban designers to improve the work processes of architectural design—from conception to construction, taking into consideration the personalized world of users, architects, and urban designers. The volume starts from the conception of architectural space as a continuum that goes from the subjective depth of the mind to the objective reality, taking into consideration the perspective of building experiences for users. It is based on the idea that at the heart of that continuum is the experience of architecture and the city as the element that unites them and gives them meaning. The volume first defines what the architectural experience is from the processes of perception, cognition, and evaluation that users and architects make about workplaces and programs. It goes on to consider the knowledge and tools needed for the evaluation of users and places, providing the methods that will help to understand the architectural experience desired by the main users of both the architectural object and an urban design, providing a series of techniques that have proven effective. Key features: Describes the theoretical approaches, methods, and tools necessary for architectural and urban design for creating experiences for users Provides a deep understanding of the nature of built environments and what they express Discusses specific methods for in-depth research on users' subjective space through making meaningful contact with them and through appropriate technological means, such as research on their expressions and communications on virtual social networks This book will help to make urban architects and designers aware of their importance for the implementation of public policies that will work in the very long term, with the expectation that by becoming aware of this role, they can act in accordance with an ethic based on values of protection of life, human solidarity, compassion, vitality, freedom, equality between people and social justice.

**From Fear to Hate** Victoria Guillén-Nieto, Antonio Doval Pais, Dieter Stein, 2023-09-05 This volume offers an in-depth analysis of the social phenomenon of migration from various legal-linguistic perspectives. Migration has become a global

phenomenon and a burning issue provoking social conflict and political instability in modern societies all over the world. The question of dealing with migrants and asylum seekers has dominated political discourse. It has given rise to national and international legislation on emigration and immigration, some of them including discriminatory provisions, pressed laws against immigration (Acts of exclusion) and prompted anti-migration rhetoric and hate speech against migrants. Important efforts have been made in both common law and civil law jurisdictions to protect migrants' fundamental rights to dignity and equality.

**An Ibero-American Perspective on Narratives of Pandemics** Zélia M. Bora, Animesh Roy, Ricardo de la Fuente Ballesteros, 2023-08-08 An Ibero-American Perspective on Narratives of Pandemics is a critique of the realities of the pandemic in the Ibero-American world and its intertwined relationship with the environment. Through a critical gaze into the history of the region as it has evolved through periods of socio-environmental and cultural conflicts, the book chronicles multiple experiences of how people managed to negotiate multiple crises on a daily basis by often clinging to their age old cultural and healing practices, as well as the humanistic representation of such experiences in various fictional and nonfictional writings. The contributors expose the biopolitics around COVID-19 and its effects particularly on marginalised populations and the environment in an effort to consider the complexity of the pandemic in its multiple dimensions. They evaluate it through climatic, socioeconomic, political, scientific, and cultural lenses that they argue shaped the realities of the pandemic. They also take a close look at the use and effects of language in virtual spaces, implying it has the ability to construct/mis-construct reality in this postmodern world, arguing there is a need for a new environmental ethic post-pandemic.

*Modernidades en disputa* Josetxo Beriain, 2005

*Political Ecology of Agriculture* Omar Felipe Giraldo, 2019-02-28 This study discusses an original proposal aimed at critically analyzing the power relations that exist in contemporary agriculture. The author endeavors herein to clarify some of the strategies that industrial agribusiness, in collusion with the state and multilateral structures, sets in motion in order to functionalize the lives of millions of farmers, so that their bodies, enunciations, and sensibilities can be repurposed in accordance with the dynamics of capital accumulation. The argument is based on the idea that agro-extractivism cannot be thought of exclusively as an economic-political and technological system, but as a complex interweaving of cultural meanings, aesthetics, and affections, which, amalgamated under the abstract name of development, act as a support for the whole system's scaffolding. The book also explores the other side of the coin, describing how, and under what conditions, social movements are responding to the calamities generated by this model. The central thesis is that many ongoing agroecological processes are providing one of the most interesting guidelines at present for visualizing transitions towards post-development, post-extractivism, and the construction of multiple worlds beyond the sphere of capital. Political ecology of

agriculture joins the calls that question the cultural project of modernity and the predatory sense imposed by the globalized food empire, and invites recognition of the importance of agroecology in the context of the end of the fossil-fuel era and the likely collapse of our industry-based civilization.

**Preventing Violent Radicalisation in Europe** Patrizia Meringolo, 2020-10-03 This book brings together the latest literature and European experiences on preventing youth violent radicalisation and violent actions in intergroup relations. Youth violent radicalisation is a significant problem within the European context, and requires an exploration of how various social actors can play an active role in preventing radicalisation in minors and young adults. This complex issue needs to be explored through a multidisciplinary approach, and effective operational models are needed in order to tackle it. This book describes the theoretical framework for such an approach in all its facets. The book's originality lies in its psychosocial and participatory approach, aimed at improving results through professional training and community empowerment for building trusting relationships and educational activities. It also proposes "alternative narratives", which are a way of representing people and groups within a social context, thereby overcoming stereotyped visions and stigma. This book focuses on participation and communication among stakeholders, social inclusion, strengthening democratic values, and pursuing a proactive instead of a reactive approach to preventing radicalisation. Highly topical, the book will appeal to researchers and students of the social and behavioural sciences interested in youth radicalisation, including social work and social policy, as well as practitioners working within the juvenile justice system.

*Locura y trauma en la ficción centroamericana reciente* Marileen La Haije, 2023-02-27 In this book, Marileen La Haije offers a thorough and innovative analysis of the intersections between madness and trauma in recent Central American literature on (post)war. A central argument of her study is that these literary texts challenge the taboo of madness in Latin American contexts of memory, by showing that talking about madness does not necessarily lead to stigmatizing victims of political violence or disqualifying their stories about traumatic experiences. La Haije highlights the importance of including madness on the research agenda in the field of memory studies in Latin America. En este libro, Marileen La Haije presenta un análisis detallado e innovador de las intersecciones entre locura y trauma en la ficción centroamericana reciente sobre la (pos)guerra. Un argumento central de su estudio es que estos textos literarios desafían el tabú de la locura en los contextos de memoria latinoamericanos, enseñándonos que hablar de locura no necesariamente implica estigmatizar a víctimas de violencia política o descalificar sus relatos sobre experiencias traumáticas. La Haije destaca la importancia de incluir la locura como tema de investigación en los estudios sobre la memoria en Latinoamérica.

**Psychoanalysis in the Barrios** Patricia Gherovici, Christopher Christian, 2018-12-11 Psychoanalysis in the Barrios: Race, Class, and the Unconscious demonstrates that psychoanalytic principles can be applied successfully in disenfranchised Latino populations, refuting the misguided idea that psychoanalysis is an expensive luxury only for the wealthy. As opposed to most

Latin American countries, where psychoanalysis is seen as a practice tied to the promotion of social justice, in the United States psychoanalysis has been viewed as reserved for the well-to-do, assuming that poor people lack the sophistication that psychoanalysis requires, thus heeding invisible but no less rigid class boundaries. Challenging such discrimination, the authors testify to the efficacy of psychoanalysis in the barrios, upending the unfounded widespread belief that poor people are so consumed with the pressures of everyday survival that they only benefit from symptom-focused interventions. Sharing vivid vignettes of psychoanalytic treatments, this collection sheds light on the psychological complexities of life in the barrio that is often marked by poverty, migration, marginalization, and barriers of language, class, and race. This interdisciplinary collection features essays by distinguished international scholars and clinicians. It represents a unique crossover that will appeal to readers in clinical practice, social work, counselling, anthropology, psychology, cultural and Latino studies, queer studies, urban studies, and sociology.

**En tiempos de examen** Irma Villalpando, 2017-08-15 Este libro hace una crítica al examen, a la escuela y a la pedagogía, que arroja luz sobre el elemento que fundamenta una de las disciplinas más importantes en nuestros días: el examen en la escuela. Extrañamente, al respecto existen innumerables estudios que sólo repiten sobre la necesidad de fortalecer los mecanismos del artilugio examen en aras de preparar a los alumnos para un futuro prometedor colmado de certificaciones y títulos. Lo cierto es que nuestra mirada ha sido domesticada para aceptar la subjetivación de los alumnos en un ejercicio de poder que al interior del andamio escolar se ha aceptado sin un dejo de sospecha y reflexión. En tiempos de examen aparece como un escrito intempestivo, inquietante, destinado a fracturar los pilares del examen defendidos por los discursos escolares modernos. Con base en Foucault, Irma Villalpando nos invita a alejarnos de lo evidente para ver y pensar distinto el examen.
