*Mega-Urbanization in the Global South* Ayona Datta,Abdul Shaban,2016-11-03 The global south is entering an 'Urban Age' where, for the first time in history, more people will be living in cities than in the countryside. The logics of this prediction have a dominant framing - rapid urbanization, uncontrolled migration, resource depletion, severe fuel shortages and the breakdown of law and order. We are told that we must be prepared. The solution is simple, they say. Mega-urbanization is an opportunity for economic growth and prosperity. Therefore we must build big, build new and build fast. With contributions from an international range of established and emerging scholars drawing upon real-world examples, *Mega-Urbanization in the Global South* is the first to use the lens of speed to examine the postcolonial 'urban revolution'.

From the mega-urbanization of Lusaka, to the production of satellite cities in Jakarta, to new cities built from scratch in Masdar, Songdo and Rajarhat, this book argues that speed is now the persistent feature of a range of utopian visions that seek to expedite the production of new cities. These 'fast cities' are the enduring images of postcolonial urbanism, which bypass actually existing urbanisms through new power-knowledge coalitions of producing, knowing and governing the city. The book explores three main themes. Part I examines fast cities as new urban utopias which propagate the illusion that they are 'quick fix' sustainable solutions to insulate us from future crises. Part II discusses the role of the entrepreneurial state that despite its neoliberalisation is playing a key role in shaping mega-urbanization through laws, policies and brute force. Part III finally delves into how fast cities built by entrepreneurial states actually materialise at the scale of regional urbanization rather than as metropolitan growth. This book explores the contradictions between intended and unintended outcomes of fast cities and points to their fault lines between state sovereignty, capital accumulation and citizenship. It concludes with a vision and manifesto for 'slow' and decelerated urbanism. This timely and original book presents urban scholars with the theoretical, empirical and methodological challenges of mega-urbanization in the global south, as well as highlighting new theoretical agendas and empirical analyses that these new forms of city-making bring to the fore.

Digital Development in Korea Myung Oh, James F. Larson, 2019-07-11 Digital Development in Korea explores the central role of digital information and communication technology in South Korea. Analyzing the role of ICT in green growth and sustainability, this new edition also demonstrates how concerns over public safety and the Olympic Games are shaping next generation digital networks. Presenting a network-centric perspective to contextualize digital development politically, economically and socially, as well as in relation to globalization, urbanization and sustainability, this book builds on firsthand experience to explain the formulation and implementation of key policy decisions. It describes the revolutionary changes of the 1980s, including privatization and color television and the thorough restructuring that created a telecommunications sector. It then goes on to explore the roles of government leadership, international development and education in affecting the diffusion of broadband mobile communication, before weighing up the positive and negative aspects of Korea's vibrant new digital media. Seeking to identify aspects of the Korean experience from which developing countries around the world could benefit, this book will be of interest to students, scholars and policymakers interested in communications technologies, Korean studies and developmental studies.

**International Perspectives on Translation, Education and Innovation in Japanese and Korean Societies** David G. Hebert, 2018-03-08 This book studies the three concepts of translation, education and innovation from a Nordic and international perspective on Japanese and Korean societies. It presents findings from pioneering research into cultural translation, Japanese and Korean linguistics, urban development, traditional arts, and related fields. Across recent decades, Northern European scholars have shown increasing interest in East Asia. Even though they are situated on opposite sides of

the Eurasia landmass, the Nordic nations have a great deal in common with Japan and Korea, including vibrant cultural traditions, strong educational systems, and productive social democratic economies. Taking a cross-cultural and interdisciplinary approach, and in addition to the examination of the three key concepts, the book explores several additional intersecting themes, including sustainability, nature, humour, aesthetics, cultural survival and social change, discourse and representation. This book offers a collection of original interdisciplinary research from the 25th anniversary conference of the Nordic Association for Japanese and Korean Studies (2013). Its 21 chapters are divided into five parts according to interdisciplinary themes: Translational Issues in Literature, Analyses of Korean and Japanese Languages, Language Education, Innovation and New Perspectives on Culture, and The Arts in Innovative Societies.

**Smart Grid Analytics for Sustainability and Urbanization** Gontar, Zbigniew H., 2018-06-27 Information and communication technologies play an essential role in the effectiveness and efficiency of smart city processes. Recognizing the role of process analysis in energy usage and how it can be enhanced is essential to improving city sustainability. Smart Grid Analytics for Sustainability and Urbanization provides emerging research on the development of information technology and communication systems in smart cities and smart grids. While highlighting topics such as process mining, innovation management, and sustainability optimization, this publication explores technology development and the mobilization of different environments in smart cities. This book is an important resource for graduate students, researchers, academics, engineers, and government officials seeking current research on how process analysis in energy usage is manifested and how it can be enhanced.

*Smart Cities for Technological and Social Innovation* Hyung Min Kim, Soheil Sabri, Anthony Kent, 2020-09-21 Smart Cities for Technological and Social Innovation establishes a key theoretical framework to understand the implementation and development of smart cities as innovation drivers, in terms of lasting impacts on productivity, livability and sustainability of specific initiatives. This framework is based on empirical analysis of 12 case studies, including pioneer projects from Europe, Asia, the Middle East, and more. It explores how successful smart cities initiatives nurture both technological and social innovation using a combination of regulatory governance and private agency. Typologies of smart city-making approaches are explored in depth. Integrative analysis identifies key success factors in establishing innovation relating to the effectiveness of social systems, institutional thickness, governance, the role of human capital, and streamlining funding of urban development projects. - Cases from a range of geographies, scales, social and economic contexts - Explores how smart cities can promote technological and social innovation in terms of direct impacts on livability, productivity and sustainability - Establishes an integrative framework based on empirical evidence to develop more innovative smart city initiatives - Investigates the role of governments in coordinating, fostering and guiding innovations resulting from smart city developments - Interrogates the policies and governance structures which have been effective in supporting the development

and deployment of smart cities

**Digital Transformation in Business and Society** Babu George, Justin Paul, 2019-10-04 The digital traces that people leave behind as they conduct their daily lives provide a powerful resource for businesses to better understand the dynamics of an otherwise chaotic society. Digital technologies have become omnipresent in our lives and we still do not fully know how to make the best use of the data these technologies could harness. Businesses leveraging big data appropriately could definitely gain a sustainable competitive advantage. With a balanced mix of texts and cases, this book discusses a variety of digital technologies and how they transform people and organizations. It offers a debate on the societal consequences of the yet unfolding technological revolution and proposes alternatives for harnessing disruptive technologies for the greater benefit of all. This book will have wide appeal to academics in technology management, strategy, marketing, and human resource management.

**Research Anthology on Smart Grid and Microgrid Development** Management Association, Information Resources, 2021-09-24 Smart grid and microgrid technology are growing exponentially as they are adopted throughout the world. These new technologies have revolutionized the way electricity is produced, delivered, and consumed, and offer a plethora of benefits as well as the potential for further growth. It is critical to examine the current stage of smart grid and microgrid development as well as the direction they are headed as they continue to expand in order to ensure that cost-effective, reliable, and efficient systems are put in place. The Research Anthology on Smart Grid and Microgrid Development is an all-encompassing reference source of the latest innovations and trends within smart grid and microgrid development. Detailing benefits, challenges, and opportunities, it is a crucial resource to fully understand the current opportunities that smart grids and microgrids present around the world. Covering a wide range of topics such as traditional grids, future smart grids, electrical distribution systems, and microgrid integration, it is ideal for engineers, policymakers, systems developers, technologists, researchers, government officials, academicians, environmental groups, regulators, utilities specialists, industry professionals, and students.

**Air Transport - A Tourism Perspective** Anne Graham, Frederic Dobruszkes, 2019-02-18 Air Transport: A Tourism Perspective provides rigorous insights into the current complexities, synergies and conflicts within air transportation and tourism, presenting a balanced, comprehensive, contemporary, and global analysis that thoroughly examines the links between theory and practice. The book offers readers a multi-sector, global perspective on the practical implications of the link between air transport and tourism. By using a novel approach, it systematically explores the successive stages of a tourist's trip-investigating reasons for flying, the airport experience, airline industry structures, competition and regulation, and air transportation and destination interrelationships. In addition, the book explores current and salient debates on such issues as the influence of traveling to visit friends and family, the role of charters versus low cost carriers, public subsidies to

support airport development, and much more.

The Political Economy of Megaprojects in Asia Hyun Bang Shin, Dong-Wan Gimm, 2025-02-18 This book offers a comprehensive analysis of how the developmental goals of Asian states are reflected in large-scale projects and how various actors both realize and challenge these goals. The rise of Asian economies has spurred the proliferation of megaprojects through large-scale resource mobilization, necessitating varying degrees of state intervention. Despite neoliberal pressures, these projects remain linked to national developmental aspirations, driven by domestic, transnational, or combined pro-growth interests, and serve multiple political purposes. The book advances the argument that megaprojects embody the dynamics of multiscalar strategic relations that determine the process and outcome of urbanization. These projects create iconic landmarks, new towns, central business districts, and infrastructure, showcasing intertwined political and economic interests. By examining contemporary megaprojects in China, South Korea, Taiwan, India, Malaysia, and Turkey, the contributing authors reveal the complexity of urbanizing forces and their multiscalar nature in shaping the built environment and shed light on the intricate interplay of state strategies, economic needs, and sociopolitical forces that influence urban landscapes. This interdisciplinary work provides a nuanced understanding of the political economy underpinning Asian urbanization and contributes to ongoing debates on urban development, state-society relations, and the production of space in the context of globalization. Cities, Regions and Flows Peter Hall, Markus Hesse, 2012-09-10 Urban regions have come under increasing pressure to adapt to the imperatives of mobility, including greater freedom of travel, rising trade volumes and global economic networks. Whereas urbanization was once characterized by the concentration of services and facilities, urban areas now have to ensure the exchange of goods, services and information in a much more complex, interrelated, highly competitive, and spatially dispersed environment. As a consequence, cities are challenged to ensure the functionality of infrastructure while mitigating negative environmental and social impacts. *Cities, Regions and Flows* brings together debates in a single volume to present a theoretical framework for understanding the changing relationship between places and movement. It analyses the significance of flows of goods for urban and regional development and emphasises the twin processes of integration and disintegration that result from goods movement within urban space. It discusses urban regions as nodes for organizing the exchange of goods, services and information against a background of socio-economic and technological change, as well as new patterns of urbanization. The new logistics concepts and practices that have been developed in response to these changes exert both integrative and disintegrative effects on cities and regions. It also considers how urban policies are dealing with related challenges concerning infrastructure provision, land use, local labour markets and environmental

sustainability. *Cities, Regions and Flows* contains thoughtfully prepared case studies from five different continents on how cities manage to become part of value chains and how they strive for accessibility in an increasingly competitive environment. This book will be of interest to policy-makers and advanced classes in planning, geography, urban studies and transportation.

**Introduction to Design Psychology** Eleni Kalantidou, 2025-01-09 In the age of climate change, psychology and design have been employed through impromptu collaborations to validate solutions and future scenarios. *Introduction to Design Psychology* contests this approach by proposing an ideological framework for an intentional, joint endeavour between psychology and design. Intentional design psychology is presented as a critical proposal grounded in unpredictability, nominating ways to activate new production, consumption, and habitation patterns. It unfolds through chapters exploring urban environments, technology, and consumer culture, making evident the need for new definitions of social resilience and adaptation. As part of this process, adaptive designs that enable resilient psychologies are revealed. By challenging the disciplinary status quo of psychology and design, this book aims to activate a new field of knowledge. *Introduction to Design Psychology* is essential for psychologists, designers, and urban planners, as well as professionals from affiliated fields, willing to reconfigure their own thinking and practice.

**Code/Space** Rob Kitchin, Martin Dodge, 2011-04-22 An analysis of the ways that software creates new spatialities in everyday life, from supermarket checkout lines to airline flight paths. After little more than half a century since its initial development, computer code is extensively and intimately woven into the fabric of our everyday lives. From the digital alarm clock that wakes us to the air traffic control system that guides our plane in for a landing, software is shaping our world: it creates new ways of undertaking tasks, speeds up and automates existing practices, transforms social and economic relations, and offers new forms of cultural activity, personal empowerment, and modes of play. In *Code/Space*, Rob Kitchin and Martin Dodge examine software from a spatial perspective, analyzing the dyadic relationship of software and space. The production of space, they argue, is increasingly dependent on code, and code is written to produce space. Examples of code/space include airport check-in areas, networked offices, and cafés that are transformed into workspaces by laptops and wireless access. Kitchin and Dodge argue that software, through its ability to do work in the world, transduces space. Then Kitchin and Dodge develop a set of conceptual tools for identifying and understanding the interrelationship of software, space, and everyday life, and illustrate their arguments with rich empirical material. And, finally, they issue a manifesto, calling for critical scholarship into the production and workings of code rather than simply the technologies it enables—a new kind of social science focused on explaining the social, economic, and spatial contours of software.

**Korea 101 The Book** Don Southerton, 2023-09-02 *Korea 101: The Book* Shares an In-depth Look at Korean Business Don Southerton reflects on 20 years of insights and experiences from a Cultural Perspective. Korean global business advisor and

strategist Don Southerton has released his latest publication, *Korea 101: The Book—20 Years of Insights and Anecdotes*. Southerton notes, “For over 20 years, I have presented Korea 101 programs to more than 10,000 participants across the globe. For the first time, *Korea 101: The Book* shares insights and experiences with my ‘boots on the ground’ in the classroom, boardroom, and, more recently, remotely.” Southerton adds, “Topics include an in depth look at Korea with milestones, interviews, case studies, articles, and writing—all based on my research, consultancy experiences, and observations. This practice continues today.”

Contested Placemaking in South Korea HaeRan Shin, 2025-07-01 This book explores how a place becomes a place in the Korean context, with a particular focus on power, knowledge, and strategy. Discussion of government-involved placemaking initiatives, including place-marketing, urban regeneration, new city development, and land reclamation, demonstrate how actors from the public, private, and voluntary sectors contribute to governance structures. The research examines how key actors from national and local governments, civic organisations, ordinary citizens, and businesses communicate and interact with actors in other sectors within the realm of placemaking governance, and will interest scholars of Asian urbanism, architects, urban politics, geography, and town planners.

*Smart Urbanism* Simon Marvin, Andrés Luque-Ayala, Colin McFarlane, 2015-12-14 Smart Urbanism (SU) – the rebuilding of cities through the integration of digital technologies with buildings, neighbourhoods, networked infrastructures and people – is being represented as a unique emerging ‘solution’ to the majority of problems faced by cities today. SU discourses, enacted by technology companies, national governments and supranational agencies alike, claim a supremacy of urban digital technologies for managing and controlling infrastructures, achieving greater effectiveness in managing service demand and reducing carbon emissions, developing greater social interaction and community networks, providing new services around health and social care etc. Smart urbanism is being represented as the response to almost every facet of the contemporary urban question. This book explores this common conception of the problematic of smart urbanism and critically address what new capabilities are being created by whom and with what exclusions; how these are being developed – and contested; where is this happening both within and between cities; and, with what sorts of social and material consequences. The aim of the book is to identify and convene a currently fragmented and disconnected group of researchers, commentators, developers and users from both within and outside the mainstream SU discourse, including several of those that adopt a more critical perspective, to assess ‘what’ problems of the city smartness can address. The volume provides the first internationally comparative assessment of SU in cities of the global north and south, critically evaluates whether current visions of SU are able to achieve their potential; and then identifies alternative trajectories for SU that hold radical promise for reshaping cities.

*The Outdoor Citizen* John Judge, 2019-12-17 From the president and CEO of the Appalachian Mountain Club comes an

astounding comprehensive plan to save our planet, make the outdoors the epicenter of our communities, and commit to an active outdoor lifestyle. In *The Outdoor Citizen*, John Judge coins the term “Outdoor Citizen” as he delivers an urgent call to action and a remarkably persuasive argument for why we must all become citizens of the natural world, reconnecting with life's most essential foundation, nature, and defending it, embracing it, and advocating for it. Judge, an international leader in conservation stewardship, covers such topics as how to turn our cities into Outdoor Cities, with a wide range of green spaces, outdoor recreation activities, eco-friendly transportation, and sustainable food sources; how to globally transition to green energy sources; what environmental policies must be implemented and how to enact them; and how to fund a sustainable economy. At a time when we are facing an unprecedented climate crisis, the continued use of carbon emissions will lead to devastating, irreversible effects on the earth. This unique and riveting volume, brimming with expert advice and case studies, is unparalleled—a game-changer for saving our planet and an entry point into a world of healthier and happier people.

**CeDEM Asia 2016** Skoric, Marko M., Parycek, Peter, Sachs, Michael, 2017 *The Conference for E-Democracy and Open Government Asia 2016* presents papers that cover the latest developments in digital governance and politics. The integration of digital information and communication technologies in citizens' everyday lives sustainably changes the interaction with governments. Politics already embraces digital and mobile technologies and government follows the example. These conference proceedings reflect on the impact of a permanently connected society on forms of governance and political communication. The CeDEM Asia 2016 brings together experts from academia and practitioners as well as representatives of business and policy makers. The conference provides a forum for transcontinental exchange and inspires the audience to consciously change and broaden their perspectives on their research.
