Excellence through Mind-Brain Development Harald S. Harung, Frederick Travis, 2016-03-03 Everyone seeks to attain excellence and happiness in their lives, yet world-class performance is rare. Research shows that education accounts for only 1 per cent of performance levels, work experience only 3 per cent, and age in adults 0 per cent. Dr Harald S. Harung and Dr Frederick Travis looked deeply and unearthed the secret of world-class performance: Excellence in any profession or activity depends on the single variable of high mind-brain development. By mind-brain development, the authors refer to a much more comprehensive transformation than what is commonly understood - they are talking about a sequence of fundamental shifts to new realities in the way our brain functions and in the way we look upon ourselves, others, and the world. For success, who we are is far more important than the knowledge, skills, and relationships we have and what we do - because with higher mind-brain development, our knowledge and skills become more useful, our relationships more enriching, and our actions more effective. As part of presenting the secrets of world-class performance, the book details the inspiring peak experiences that underlie top performance and how top performers have a more orderly, restfully alert, and economic brain than average performers. This research-based book will show you the many benefits of higher mind-brain development and how to effortlessly attain it.

Quantum Spirituality Peter Canova, 2023-01-31 Reveals how ancient Gnostic teachings predicted modern quantum physics • 2024 Nautilus Book Award Silver Winner • 2023 American Book Fest™ Best Book Award • Explains how the

perennial principles of Gnosticism, a repository of Judeo-Christian mysticism, describe major theories of quantum physics, such as the Big Bang, parallel universes, the Holographic Universe theory, and Einstein's Relativity • Shows how these teachings reveal consciousness as the creator of reality • Reveals how to harness quantum spirituality for personal empowerment, access to higher levels of consciousness, and manifestation From the dawn of history, a universal wisdom tradition has existed that explains humanity's purpose in the cosmos and our relationship to the Master Source Consciousness. This mystical philosophy was harnessed by the ancient seers known as Gnostics, who were in direct contact with Source Consciousness. As Peter Canova reveals, not only do the ancient teachings of Gnosticism contain important spiritual truths, but they profoundly align with the modern sciences of quantum physics and psychology. They can also provide us with a transformative path to higher consciousness and practical tools to create your own reality. Merging modern science and ancient wisdom, Canova explores the perennial principles of Gnosticism and shows how they describe major theories of quantum physics, such as the Big Bang, parallel universes, the Holographic Universe theory, and Einstein's Relativity. He recounts the Gnostic story of Sophia from a scientific standpoint, showing how it describes the fall of spiritual consciousness into material existence. He also provides in-depth evidence that Jesus taught a hidden, mystical Gnostic initiation rite. Explaining how the Master Consciousness created and shaped all life, including humans, the author reveals how Source gave us a critical role to fulfill in the cosmos, including the ability of our thoughts to affect the material world. He describes Carl Jung's role in the spiritualization of psychology and how this can be used by the modern spiritual seeker to pursue a path of enlightenment and personal fulfillment. Ultimately showing how enlightenment is a process wherein outer manifestations arise from inner experience—including synchronicity and dreams—the author reveals how each of us can harness the power of quantum spirituality to transform our world on both an individual and collective level. OTHER BOOK AWARDS • 2024 American Legacy "New Age Nonfiction" Winner • 2024 American Book Fest™ Best Book "Spirituality" Winner • 2024 Eric Hoffer Montaigne Medal • 2024 Indie Excellence "Self-Help Spiritual" Winner • 2024 International Book Awards "Spiritual" Winner

Your Unique Consciousness Dr. Anthony J. Emmett, 2023-03-20 The story of consciousness describes the mystery we are; where we come from before birth and where we go after death; and the thinking both in our body mind and subconscious and beyond it. It is the dimensions of rational awareness of mind and heart we use for our ego and creative life on earth, and in other dimensions around us. Imagine that you have an all-pervading higher intelligence within in your many layered consciousness. How we employ it for this dynamic life with love, and the ways it works, make you the self you are. Consciousness is an energy which comes into the brain of the embryo to activate the mind for this life; it functions at many levels. The level we call the heart is an influence emotionally with love and loving. Consciousness radiates, and the way it relates in us and beyond is the story of our lives. We can use this to great effect with certain techniques. We are alive in several levels of consciousness.

From the Brink Paul W. Ashton, 2020-06-16 A commonly encountered experience of both analyst and analysand is that of the void. It is spoken about at different stages of therapy and refers to experiences that have different origins. Sometimes the experience of the void is around a relatively limited aspect of the psyche but at other times the void seems much more global and threatens to engulf the entire personality; the whole individual psyche then seems threatened by the possibility of dissolution into nothingness.

Alienation and Freedom Frantz Fanon, 2018-04-19 Since the publication of *The Wretched of the Earth* in 1961, Fanon's work has been deeply significant for generations of intellectuals and activists from the 60s to the present day. *Alienation and Freedom* collects together unpublished works comprising around half of his entire output - which were previously inaccessible or thought to be lost. This book introduces audiences to a new Fanon, a more personal Fanon and one whose literary and psychiatric works, in particular, take centre stage. These writings provide new depth and complexity to our understanding of Fanon's entire oeuvre revealing more of his powerful thinking about identity, race and activism which remain remarkably prescient. Shedding new light on the work of a major 20th-century philosopher, this disruptive and moving work will shape how we look at the world.

Rudolf Steiner's 'Philosophie der Freiheit' as the Foundation of the Logic of Beholding Thinking. Religion of the Thinking Will. Organon of the New Cultural Epoch. Vol. 1 G. A. Bondarev, 2014-09-15 An introduction to Anthroposophical Methodology and a complete analysis of Rudolf Steiner's 'Philosophy of Freedom (Spiritual Activity)', Gennady Bondarev's 'Organon' demonstrates that the methodology intrinsic to Anthroposophy is fundamental and capable of unifying all modern sciences as it describes the monistic sensible-supersensible reality. Through its anthropocentric and ontological character, the methodology's actualization implies an evolutionary change of both the human subject and the process of cognition itself. Rudolf Steiner's fundamental epistemological work is thereby shown to be the foundation for the development of a new kind of 'beholding' thinking - what Goethe began to experience and called *anschauende Urteilskraft*. This is volume 1 of 3. The volumes, taken together, contain a completely new translation of 'Die Philosophie der Freiheit' by Graham B. Rickett.

Spinoza and Contemporary Biology Henri Atlan, 2024-11-30 Published in France in 2018, Henri Atlan's book *Cours de philosophie biologique et cognitive: Spinoza et la biologie actuelle* (Odile Jacob, 2018) represents a turning point in Spinoza's interpretations of contemporary life sciences. Henri Atlan is the first in this field of research, of applied epistemology and ontology, to effectively address contemporary questions in biology and cognitive sciences. Atlan presents us with a genuine understanding of Spinoza's monism, which is neither materialistic nor idealistic, and with an expertise in

contemporary life sciences that will open an entire new field of research in Spinoza scholarship as well as in philosophy of sciences. Readers will better understand the connection between Spinoza's Ethics, his ontology and epistemology, and modern life sciences, allowing us to rethink the relationship between ethics and modern sciences.

Genesis and Structure of Hegel's "Phenomenology of Spirit" Jean Hyppolite, 1974 Jean Hyppolite produced the first French translation of Hegel's Phenomenology of Spirit. His major works—the translation, his commentary, and *Logique et existence* (1953)—coincided with an upsurge of interest in Hegel following World War II. Yet Hyppolite's influence was as much due to his role as a teacher as it was to his translation or commentary: Foucault and Deleuze were introduced to Hegel in Hyppolite's classes, and Derrida studied under him. More than fifty years after its original publication, Hyppolite's analysis of Hegel continues to offer fresh insights to the reader.

What Jesus Wants You to Know Today: About Himself, Christianity, God, the World, and Being Human Gina Lake, 2019-05-20 Have you ever wondered what Jesus would teach today or what he would share about his life two thousand years ago? What would he say about how to solve the world's problems or about Christianity? What would he say about God, being human, suffering, and the meaning and purpose of life? The answers to these questions and others are here, in these pages. Jesus exists and has always existed to serve humanity, and one way he is doing this today is through this channel, Gina Lake, and others. In *What Jesus Wants You to Know Today*, Jesus answers many questions about his life and teachings and shares his perspective on the world. He brings his message of love, once again, to the world and corrects the record by detailing the ways that Christianity has distorted his teachings. He wants you to know that you, too, have the potential to be a Christ, to be enlightened as he was, and he explains how this is possible. Knowing the truth is the beginning of changing the world. Too many were and still are living according to false beliefs instead of the truth. I came to earth to try to change that, to be a voice in a vast desert of misunderstandings, and I continue to be a voice for truth to the extent that I can from this dimension. I never really left you. I have never ceased being in service to humanity and your beautiful planet. -Jesus

The Passions of the Soul in the Metamorphosis of Becoming Anna-Teresa Tymieniecka, 2013-03-09 Over the millennia, philosophy has sought the ultimate understanding of the full human horizon of existence as well as of human destiny and the ultimate sense of it All. The innumerable attempts to grasp the answers to these questions, each taking its own approach and having its own preconceptions, have engendered a range of different philosophical approaches, one so broad that seemingly unbridgeable rifts impede possible, cross-fertilizing communication. And yet the themes of all of them, e.g., the immeasurable cosmos, life, the individual being bearing life, the human person within his or her world, and his or her longings to transcend that world, the human mind, its pragmatic/cognitive tools, creative, speculative pursuits, remain constants. The logos they all share is one. It is not that no vicarious sharing of intuitive glimpses by the proponents of the varied doctrines and methods in question occurs. The history of philosophy is in fact marked by the juxtaposing of theories

and approaches having different trajectories and by the mixing of insights, the crossing of borders, etc. However, what is greatly needed is in-depth comparison of the various doctrines and a reflection on the contrasting, opposing, clashing perspectives that seeks foundations for all of them in the human, creative condition, in that microcosm that extends its tentacles toward the two great infinities: the external infinity of the cosmos and the internal infinity of transcending destiny.

Buyer Beware Janet Parshall, 2012-09-01 Have you ever thought why it is that so many Christians are reticent to enter into the 'marketplace of ideas?' Jesus commanded us to go into the world to deliver His message of truth, delivered in love. But He never said it would be easy. In Buyer Beware, Janet Parshall takes the reader on a journey through the public square where ideas are 'bought' and 'sold' but where Truth is sometimes difficult to find. She examines some of the most controversial issues being debated in our culture today, by looking at them through the lens of Scripture. Using the prophet Jeremiah's instructive letter to the exiles, held in Babylonian captivity, Parshall shows how a people, held captive in a sin-sick, fallen world, can live abundantly and triumphantly by loving God's truth and by boldly declaring it in the public square. Buyer Beware is designed to encourage modern day saints as they enter the 'marketplace' by helping them discover the richness of God's word and the poverty of the world's message.
