*Politics and the Art of Commemoration* Katherine Hite,2013-06-17 Memorials are proliferating throughout the globe. States recognize the political value of memorials: memorials can convey national unity, a sense of overcoming violent legacies, a commitment to political stability or the strengthening of democracy. Memorials represent fitful negotiations between states and societies symbolically to right wrongs, to recognize loss, to assert distinct historical narratives that are not dominant. This book explores relationships among art, representation and politics through memorials to violent pasts in Spain and Latin America. Drawing from curators, art historians, psychologists, political theorists, holocaust studies scholars, as well as the voices of artists, activists, and families of murdered and disappeared loved ones, *Politics and the Art of Commemoration* uses memorials as conceptual lenses into deep politics of conflict and as suggestive arenas for imagining democratic praxis. Tracing deep histories of political struggle and suggesting that today's commemorative practices are innovating powerful forms of collective political action, this work will be of great interest to students and scholars of international relations, Latin American studies and memory studies.

Art, Nature, and Religion in the Central Andes Mary Strong,2012-05-01 From prehistory to the present, the Indigenous peoples of the Andes have used a visual symbol system—that is, art—to express their sense of the sacred and its immanence in the natural world. Many visual motifs that originated prior to the Incas still appear in Andean art today, despite the onslaught of cultural disruption that native Andeans have endured over several centuries. Indeed, art has always been a unifying power through which Andeans maintain their spirituality, pride, and culture while resisting the oppression of the dominant society. In this book, Mary Strong takes a significantly new approach to Andean art that links prehistoric to contemporary forms through an ethnographic understanding of Indigenous Andean culture. In the first part of the book, she provides a broad historical survey of Andean art that explores how Andean religious concepts have been expressed in art and how artists have responded to cultural encounters and impositions, ranging from invasion and conquest to international labor migration and the internet. In the second part, Strong looks at eight contemporary art types—the scissors dance (danza de tijeras), home altars (retablos), carved gourds (mates), ceramics (ceramica), painted boards (tablas), weavings (textiles), tinware (hojalateria), and Huamanga stone carvings (piedra de Huamanga). She includes prehistoric and historic information about each art form, its religious meaning, the natural environment and sociopolitical processes that help to shape its

expression, and how it is constructed or performed by today's artists, many of whom are quoted in the book.

From Criminal to Courtier David Kunzle,2021-10-11 The art of the Netherlands (Dutch and Flemish) is unique in Early Modern Europe in its concern for military cruelty against civilians, principally the peasantry. Decimated by time and changes in taste, this popular iconography proves varied and extensive, stretching from Bruegel to and past Rubens. 'Massacres of the Innocents' continue to be a favourite subject through the Eighty Years War, in contrast to ruling-class glorifications of war. Dutch patriotic siege prints lay claim to 'scientific' precision in landscapes free of military terror, while the idea of military conquest is presented as generous rather than cruel in the ever-popular figure of Scipio Africanus. Most of the pictorial material is unfamiliar, some of it even to specialists and never before published; new light is shed on the more familiar phenomena of the civic guard groups and Ter Borch courtier-officers, 'good soldiers' overcoming a bad image.
