Integrating Music Across the Elementary Curriculum Kristin Harney, 2020 This book is designed to support K-5 classroom teachers as they integrate music throughout the elementary curriculum. It contains detailed, practical ideas and examples, including full lesson plans and over 100 teaching ideas and strategies for integrating music with visual art, language arts, social studies, science, and mathematics. Following an overview of the interdisciplinary approach, the remaining chapters explore connections between music and other areas of the elementary curriculum. Each chapter also includes a section addressing national standards with tables showing the specific standards that are included in each lesson and activity. This text utilizes the most recent National Core Arts Standards (2015) as well as the most recent standards in mathematics, science, social studies, and language arts. All the lessons in this book are designed to be fully taught by classroom teachers; the content is accessible to those who lack formal music training, yet is solidly rooted in research and

best practices. While classroom teachers can teach these lessons on their own, this book may facilitate partnerships and collaboration between classroom teachers and music specialists. All the lessons and activities included in this text have been reviewed by practicing teachers and most have been field tested in elementary classrooms. Throughout the book, there is an emphasis on interdisciplinary lessons that demonstrate valid connections between disciplines while maintaining the integrity of each discipline involved, including a teacher-tested model that allows teachers to successfully create their own interdisciplinary lessons.

The Ballets of Maurice Ravel Deborah Mawer, 2017-07-05 Maurice Ravel, as composer and scenario writer, collaborated with some of the greatest ballet directors, choreographers, designers and dancers of his time, including Diaghilev, Ida Rubinstein, Benois and Nijinsky. In this book, the first study dedicated to Ravel's ballets, Deborah Mawer explores these relationships and argues that ballet music should not be regarded in isolation from its associated arts. Indeed, Ravel's views on ballet and other stage works privilege a synthesized aesthetic. The first chapter establishes a historical and critical context for Ravel's scores, engaging en route with multimedia theory. Six main ballets from *Daphnis et Chloé* through to *Bolshoi* are considered holistically alongside themes such as childhood fantasy, waltzing and neoclassicism. Each work is examined in terms of its evolution, premiere, critical reception and reinterpretation through to the present; new findings result from primary-source research, undertaken especially in Paris. The final chapter discusses the reasons for Ravel's collaborations and the strengths and weaknesses of his interpersonal relations. Mawer emphasizes the importance of the performative dimension in realizing Ravel's achievement, and proposes that the composer's large-scale oeuvre can, in a sense, be viewed as a balletic undertaking. In so doing, this book adds significantly to current research interest in artistic production and interplay in early twentieth-century Paris.

Postmodern Fairy Tales Cristina Bacchilega, 2010-08-03 Postmodern Fairy Tales seeks to understand the fairy tale not as children's literature but within the broader context of folklore and literary studies. It focuses on the narrative strategies through which women are portrayed in four classic stories: Snow White, Little Red Riding Hood, Beauty and the Beast, and Bluebeard. Bacchilega traces the oral sources of each tale, offers a provocative interpretation of contemporary versions by Angela Carter, Robert Coover, Donald Barthelme, Margaret Atwood, and Tanith Lee, and explores the ways in which the tales are transformed in film, television, and musicals.
