Ur Harriet Crawford,2015-02-26 The ancient Mesoptamian city of Ur was a Sumerian city state which flourished as a centre of trade and civilisation between 2800–2000 BCE. However, in the recent past it suffered from the disastrous Gulf war and from neglect. It still remains a potent symbol for people of all faiths and will have an important role to play in the future. This account of Ur's past looks at both the ancient city and its evolution over centuries, and its archaeological interpretation in more recent times. From the 19th century explorers and their identification of the site of Mukayyar as the Biblical city of Ur, the study proceeds to look in detail at the archaeologist Leonard Woolley and his key discoveries during the 1920s and 30s. Using the findings as a framework and utilising the latest evidence from environmental, historical and archaeological studies, the volume explores the site's past in chronological order from the Ubaid period in the 5th millennium to the death of Alexander. It looks in detail at the architectural remains: the sacred buildings, royal graves and also the private housing which provides a unique record of life 4000 years ago. The volume also describes the part played by Ur in the Gulf war and discusses the problems raised for archaeologists in the war's aftermath.

*The Royal City of Susa* Musée du Louvre,1992 A rich production followed of objects for daily use, ritual, and luxury living, finely carved in various materials or fashioned of clay. Monumental sculpture was made in stone or bronze, and dramatic friezes were composed of brilliantly glazed bricks. Among the discoveries are tiny, intricately carved cylinder seals and splendid jewelry. Clay balls marked with symbols offer fascinating testimony to the very beginnings of writing; clay tablets from later periods bearing inscriptions in cuneiform record political history, literature, business transactions, and mathematical calculations. A very important group of finds from Susa is made up of objects brought back as booty from conquests in Mesopotamia. These works, many of them the royal monuments of Akkadian and Babylonian monarchs - for instance, the great stele of Naram-Sin - are among the best known of all objects from the ancient Near East.

Journey to the City Steve Tinney,Karen Sonik,2019-06-07 The Penn Museum has a long and storied history of research and archaeological exploration in the ancient Middle East. This book highlights this rich depth of knowledge while also

serving as a companion volume to the Museum's signature Middle East Galleries opening in April 2018. This edited volume includes chapters and integrated short, focused pieces from Museum curators and staff actively involved in the detailed planning of the new galleries. In addition to highlighting the most remarkable and interesting objects in the Museum's extraordinary Middle East collections, this volume illuminates the primary themes within these galleries (make, settle, connect, organize, and believe) and provides a larger context within which to understand them. The ancient Middle East is home to the first urban settlements in human history, dating to the fourth millennium BCE; therefore, tracing this move toward city life figures prominently in the book. The topic of urbanization, how it came about and how these early steps still impact our daily lives, is explored from regional and localized perspectives, bringing us from Mesopotamia (Ur, Uruk, and Nippur) to Islamic and Persianate cites (Rayy and Isfahan) and, finally, connecting back to life in modern Philadelphia. Through examination of topics such as landscape, resources, trade, religious belief and burial practices, daily life, and nomads, this very important human journey is investigated both broadly and with specific case studies.

**Abu Tbeirah Excavations I. Area 1** Licia Romano,Franco D'Agostino,2019-06-07 This book presents the results of the archaeological activities and specialistic studies carried out at the site of Abu Tbeirah (Nasiriyah, Province of Dhi Qar, southern Iraq) by the Iraqi-Italian joint mission of the Iraqi State Board of Antiquities and Heritage and of Sapienza, led by F. D'Agostino and L. Romano (Dipartimento – Istituto Italiano di Studi Orientali). In the volume the accomplishments of the first seven campaigns (2011-2016) are introduced together with an assessment of the palaeo-environment and landscape surrounding the site. After an introduction to the reasons that led to start the archaeological activities in Abu Tbeirah, written by HE Dr A. Al-Hamdani, Minister of Culture of the Republic of Iraq, the diggings in the south-eastern Area 1 are presented (the cemetery and the other activities identified immediately under the top-soil and the last phase of Building A). A preliminary assessment on the Early-Dynastic III/Akkadian Transition pottery horizon (2450-2150 BC) is presented as well. At the same time, the multifaceted analyses and studies, carried out on Abu Tbeirah's site and findings, are included in the volume.

**City of Culture 2600 BC: Early Mesopotamian History and Archaeology at Abu Salabikh** John Nicholas Postgate,2024-03-07 This book presents the city beneath the surface of Abu Salabikh, southern Iraq. The archaeology and the textual data combine to reveal its architecture, agricultural and industrial enterprises, and social structure. Integrated with our wider knowledge of south Mesopotamia at this time it creates a vivid image of city life in 2600 BC.

**Iraq** Bill Thompson,2014-10-21 In the spring of 2003, the United States and it allies invaded Iraq to remove one of the world's most brutal dictators, Saddam Hussein, from power. But when the Hussein regime fell, Iraqis wondered whether their country would hold together, or if it would disintegrate under the force of long-standing ethnic and religious rivalries. The international community also watched closely. With the world's second-largest proven oil reserves, Iraq holds great economic importance for an energy-hungry globe. As one of the largest Arab states, Iraq is politically important in the Middle East region as well. Some American policymakers believed that with Saddam gone, Iraq could become an example of democracy and progress for the other Arab states. However, a period of sectarian violence prevented that from the occurring. Despite the conflict, Iraqis took steps toward developing a parliamentary democracy, approving a constitution in October 2005 and holding several subsequent elections for government officials. In addition, new military strategies have significantly reduced the level of violence. While the future remains uncertain, Iraqis hope their country is on a path to peace and promise. Discusses the geography, history, economy, government, religion, people, foreign relations, and major cities of Iraq.

*The City Gate in Ancient Israel and Her Neighbors* Daniel A. Frese,2020-01-20 In The City Gate in Ancient Israel and Her Neighbors, Daniel A. Frese provides a wide-ranging portrayal of one of the most prominent social institutions in the kingdoms of the southern Levant during the Iron II period: the use of the city gate as a hub for numerous and diverse civic functions. The book provides an up-to-date description of the architecture of gate complexes based on archaeological evidence, and a systematic description of the many functions of the gate seen in hundreds of texts from the Hebrew Bible and the broader ancient Near East. The final chapters of the book discuss the conceptual significance of gates in Israelite culture, based on idiomatic and symbolic gate terminology in the Hebrew Bible.

**The Ghosts of Iraq's Marshes** Steve Lonergan,Jassim Al-Asadi,Keith Holmes,2024-04-23 A FOREIGN AFFAIRS BEST BOOK OF 2024 The gripping history of the devastation and resurrection of the Marshes of Iraq, an environmental treasure of the Middle East, now a protected site The Mesopotamian Marshes in southern Iraq, once the largest wetland system on the

planet, have been inhabited for thousands of years by the Ma'dan, or Marsh Arabs, but they remain remote, isolated, and virtually unknown. In the early 1990s, the Saddam Hussein regime drained the Marshes and set out to destroy not only a critical ecosystem but a unique way of life as well. It stands as one of the greatest environmental and humanitarian disasters of the twentieth century. In the wake of the 2003 US invasion of Iraq, local residents destroyed the earthen dams built to divert water from the wetlands and the Marshes were reflooded. Their future, however, is in peril. The Ghosts of Iraq's Marshes tells the history of the creation, destruction, and revitalization of the Marshes and their inhabitants against the backdrop of the dramatic events that have convulsed Iraq in the past fifty years. It follows the life of Jassim al-Asadi, an irrigation engineer who was jailed and tortured under Saddam Hussein and who subsequently dedicated his life to the reflooding and restoration of the Marshes. He eventually contributed to the Marshes being declared a UNESCO World Heritage site. Jassim is eminently relatable, and the stories of his life and other marsh dwellers are infused with pathos, tragedy, humor, and passion.

    <u>Ur and Uruk</u> Charles River Charles River Editors,2016-11-01 *Includes pictures *Examines the Sumerians' culture, daily life at the cities, and architecture *Includes ancient accounts describing the cities *Includes a bibliography for further reading In southern Iraq, a crushing silence hangs over the dunes. For nearly 5,000 years, the sands of the Iraqi desert have held the remains of the oldest known civilization: the Sumerians. When American archaeologists discovered a collection of cuneiform tablets in Iraq in the late 19th century, they were confronted with a language and a people who were at the time only scarcely known to even the most knowledgeable scholars of ancient Mesopotamia. The exploits and achievements of other Mesopotamian peoples, such as the Assyrians and Babylonians, were already known to a large segment of the population through the Old Testament and the nascent field of Near Eastern studies had unraveled the enigma of the Akkadian language that was widely used throughout the region in ancient times, but the discovery of the Sumerian tablets brought to light the existence of the Sumerian culture, which was the oldest of all the Mesopotamian cultures. Although the Sumerians continue to get second or even third billing compared to the Babylonians and Assyrians, perhaps because they never built an empire as great as the Assyrians or established a city as enduring and great as Babylon, they were the people who provided the template of civilization that all later Mesopotamians built upon. The Sumerians are credited with being the first people to invent writing, libraries, cities, and schools in Mesopotamia (Ziskind 1972, 34), and many would argue that they were the first people to create and do those things anywhere in world. No site better represents the importance of the Sumerians than the city of Uruk. Between the fourth and the third millennium BCE, Uruk was one of several city-states in the land of Sumer, located in the southern end of the Fertile Crescent, between the two great rivers of the Tigris and the Euphrates. Discovered in the late 19th century by the British archaeologist William Loftus, it is this site that has revealed much of what is now known of the Sumerian, Akkadian, and Neo-Sumerian people. Although Uruk was not the only city that

the Sumerians built during the Uruk period, it was by far the greatest and also the source of most of the archeological and written evidence concerning early Sumerian culture (Kuhrt 2010, 1:23). Uruk went from being the world's first major city to the most important political and cultural center in the ancient Near East in relatively quick fashion. Long before Alexandria was a city and even before Memphis and Babylon had attained greatness, the ancient Mesopotamian city of Ur stood foremost among ancient Near Eastern cities. Today, the greatness and cultural influence of Ur has been largely forgotten by most people, partially because its monuments have not stood the test of time the way other ancient culture's monuments have. For instance, the monuments of Egypt were made of stone while those of Ur and most other Mesopotamian cities were made of mud brick and as will be discussed in this report, mud-brick may be an easier material to work with than stone but it also decays much quicker. The same is true to a certain extent for the written documents that were produced at Ur. At its height Ur was the center of a great dynasty that controlled most of Mesopotamia directly through a well maintained army and bureaucracy and the areas that were not under its direct control were influenced by Ur's diplomats and religious ideas. Ur was also a truly resilient city because it survived the downfall of the Sumerians, outright destruction at the hands of the Elamites, and later occupations by numerous other peoples, which included Saddam Hussein more recently.
