web acid base reactions can be used to determine concentrations of an acid or

a base using stoichiometric

calculations and titrimetric analysis the

volume of a solution required to react

acid base titration curves 1 1

web background plot of the ph of a

solution against the volume of titrant

added is called a titration curve the ph

can be measured directly with a ph

meter while titrant is added from a

buret for the acids used in this

experiment the titrant will always be a

0 1 m solution of the strong base naoh

web oct 30 2022 there are two basic

types of acid base titrations indicator

and potentiometric in an indicator

based titration you add another

chemical that changes color at the ph

equal to the equivalence point when the

acid and base are in

web strong acids and strong bases

completely ionize in solution resulting

in water and a salt for a weak acid

there is only partial ionization the

titration curve of a strong base strong

acid showed a stretched out curve as it

started with a slow gradual change in

ph as it reached the equivalence point
