**Mathematics Curriculum Reforms Around the World** Yoshinori Shimizu,Renuka Vithal,2023-06-28 This Open Access volume by the International Commission on Mathematical Instruction (ICMI) is an outcome of the ICMI Study 24 and gives a status-quo of school mathematics reform around the world and what we can learn from this movement. Each theme and section of the book offers descriptions and analyses of multiple case studies in different countries and contexts, along with opportunities to compare, contrast and learn from these diverse experiences. The volume provides a synthesis and meta-analysis of the different historical, geographical and global aspects of school mathematics reforms and explores in which way curricula are elaborated, proposed, changed, and reorganized. It offers a more informed and comprehensive analysis of the roles of different actors and of the many aspects influencing and shaping mathematics curriculum reforms that are taking or have taken place. It also explores the possibilities and means to tackle a curricular reform in the current scenario we live in and how to unfold future developments. This book will be of interest to practitioners and scholars with an interest in school mathematics curriculum reforms. It will also be a useful resource to those involved in school mathematics curriculum reform initiatives by providing current information about the curriculum changes that are taking place in respect of content, teacher education, educational materials, and a range of implementation challenges across diverse contexts.

[Handbook of Research on Training Teachers for Bilingual Education in Primary Schools](#) Estrada Chichón, José Luis,Zayas Martínez, Francisco,2023-02-06 Modern societies tend to demand innovative learning modalities in which foreign languages are used to teach content subjects from very early educational stages. Education authorities in different geographical areas of the world are currently working to determine how bilingual teaching should be developed depending, along with many other factors, on the initial training of bilingual education teachers. On this basis, it is necessary to review how tertiary education institutions deal with the theoretical foundations and practical approaches necessary for this learning modality to train bilingual education teachers for primary schools. The Handbook of Research on Training Teachers for Bilingual Education in Primary Schools includes international experiences of teacher training for bilingual education in primary schools in which educators should be able to recognize themselves and identify concrete working formulas to apply in their daily work. Covering key topics such as teacher training, language learning, and primary education, this reference work is ideal for administrators, teacher trainers, policymakers, researchers, scholars, practitioners, academicians, instructors, and

students.

[Education Policy Outlook 2018 Putting Student Learning at the Centre](#) OECD,2018-06-11 Taking the students' perspective, Education Policy Outlook 2018: Putting Student Learning at the Centre analyses the evolution of key education priorities and key education policies in 43 education systems. It compares more recent developments in education policy ecosystems (mainly between 2015 ...

*Influences of the IEA Civic and Citizenship Education Studies* Barbara Malak-Minkiewicz,Judith Torney-Purta,2021-05-26 This open access book identifies the multiple ways that IEA's studies of civic and citizenship education have contributed to national and international educational discourse, research, policymaking, and practice. The IEA International Civic and Citizenship Education Study (ICCS), first conducted in 2009, was followed by a second cycle in 2016. The project was linked to the earlier IEA Civic Education Study (CIVED 1999, 2000). IEA's ICCS remains the only large-scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes, and participatory skills. It also discusses in-depth how a wide range of countries prepare their young people for citizenship in changing political, social, and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia, and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999/2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic-related behaviors, and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice, and research in an area of education that is becoming increasingly important for many societies.

*Handbook of Digital Resources in Mathematics Education* Birgit Pepin,Ghislaine Gueudet,Jeffrey Choppin,2024-06-21 This handbook presents the state-of-the art scholarship on theoretical frames, mathematical content, learning environments, pedagogic practices, teacher professional learning, and policy issues related to the development and use of digital resources in mathematics education. With the advent of more and more open access digital resources, teachers choose from the web what they see fit for their classroom; students choose 'in the moment' what they need for their projects and learning paths. However, educators and students often find it difficult to choose from the abundance of materials on offer, as they are uncertain about their quality and beneficial use. It is clear that at a time of bouleversement of the teaching-learning processes, it is crucial to understand the quality and the (potentially) transformative aspects of digital resources. This book provides comprehensive analyses of and insights into the transformative aspects of digital resources.

*Cultural Heritage Education in the Everyday Landscape* Camilla Casonato,Bertrando Bonfantini,2022-12-01 This book summarizes work being undertaken within the School Activates Resources—stitching the lost heritage of the suburbs (ScAR) project, which addressed cultural heritage in a broad sense, as a system of values identified by the populations and in constant evolution. This tangible and intangible heritage fuels the promotion of intergenerational and intercultural dialogue and represents an opportunity for resilient social and territorial development. The book ponders the experience gained and the points of view of the different disciplines involved, examines issues such as children and youth participation in civil life or education in cultural heritage and landscape, and presents real-world experiences of heritage education in everyday landscape in difficult contexts and/or concerning poorly recognized and valued cultural heritage.

**Adolescent Health and Wellbeing** Alessandro Pingitore,Francesca Mastorci,Cristina Vassalle,2019-11-14 This book presents a detailed and updated review of the widespread changes that take place during adolescence, adopting a preventive perspective that reflects physical, social, cognitive, and emotional changes. It addresses a broad range of aspects, including: the preventive programs and their systemic effects; the role of environment in influencing the healthy behaviors of adolescents and young adults; the use of e-Health technology in health and behavioral interventions for adolescents; and the clinical and prognostic implications of primordial prevention in healthy adolescents. All of these elements are subsequently reviewed using a multidimensional approach, in order to offer extensive information on the complex changes that characterize adolescents' physiological, psychological, and neurobiological development. In addition, the book depicts the preventive strategies currently used in various social settings (school, family, sport club, health policies) aimed not only at reducing lifestyle risk behaviors, but also at improving resilience, happiness, social involvement, self-esteem, and sociability. This update is essential in the light of the fact that, to date, prevention has mainly been directed towards adolescents with physical or mental disorders rather than their healthy peers. As such, the book offers a valuable tool for pediatricians, child and adolescents psychiatrists, and for all professionals involved in Health Promotion and Disease Prevention.

Translinguistics Jerry Lee,Sender Dovchin,2019-12-06 Translinguistics represents a powerful alternative to conventional paradigms of language such as bilingualism and code-switching, which assume the compartmentalization of different 'languages' into fixed and arbitrary boundaries. Translinguistics more accurately reflects the fluid use of linguistic and semiotic resources in diverse communities. This ground-breaking volume showcases work from leading as well as emerging scholars in sociolinguistics and other language-oriented disciplines and collectively explores and aims to reconcile the distinction between 'innovation' and 'ordinariness' in translinguistics. Features of this book include: 18 chapters from 28 scholars, representing a range of academic disciplines and institutions from 11 countries around the world; research on understudied communities and geographic contexts, including those of Latin America, South Asia, and Central Asia; several chapters devoted to the diversity of communication in digital contexts. Edited by two of the most innovative scholars in the

field, Translinguistics: Negotiating Innovation and Ordinariness is essential reading for scholars and students interested in the question of multilingualism across a variety of subject areas.

Concorso a cattedra 2020 Scuola primaria - Volume 1. □Manuale integrato per la preparazione: prova preselettiva, prova scritta, prova orale. Con webinar online Antonello Giannelli, Raffaella Briani, Sandra Scicolone, 2020-05-07 Questo manuale offre un contributo alla preparazione del concorso per l'accesso all'insegnamento nella scuola primaria attraverso un itinerario articolato, al termine del quale il futuro docente è posto in grado di collocare l'azione delle istituzioni scolastiche e la propria progettazione didattica nel quadro ordinamentale di riferimento e di coglierne la relazione con le Indicazioni nazionali, di disporre degli strumenti psicopedagogici e metodologici per costruire una lezione efficace, declinata sugli specifici bisogni educativi degli alunni e delle alunne, e di comprendere a pieno il ruolo che egli stesso può giocare nell'ottica

del miglioramento dell'istituzione scolastica. In questa prospettiva, professionisti della scuola - dirigenti scolastici e docenti -, docenti universitari e ricercatori analizzano il contesto organizzativo nel quale il futuro docente sarà inserito, ne delineano il profilo professionale, forniscono lo strumentario psicopedagogico che costituisce presupposto fondamentale della progettazione dell'attività didattica, portano l'attenzione sulle modalità di gestione efficace della classe e sulla creazione di un buon clima relazionale prevenendo l'insorgere del fenomeno del bullismo, illustrano le metodologie più innovative in grado di rendere gli alunni e le alunne protagonisti del loro apprendimento, fornendo altresì spunti concreti per un proficuo utilizzo delle tecnologie nel processo di insegnamento/apprendimento.

*Scuola dell'infanzia e prospettiva zerosei* Giancarlo Cerini, 2019-02-08 La scuola dell'infanzia è un vero 'gioiello di famiglia' del sistema educativo italiano. La scuola statale ha da poco compiuto i suoi primi cinquant'anni ed ha ampliato un paesaggio ove erano già presenti le scuole dei Comuni e quelle private. Il progetto educativo usufruisce di INDICAZIONI PER IL CURRICOLO (d.m. 254/2012), i cui 'campi di esperienza' si innestano su ORIENTAMENTI educativi di grandi tradizioni pedagogiche. Ora la scuola per i bambini dai 3 ai 6 anni è invitata a misurarsi con la prospettiva "zerosei" (d.lgs. 65/2017) per costruire un sistema integrato di servizi educativi (Asili nido) e scuole dell'infanzia, rispettosi comunque delle loro identità. Il libro presenta saggi di inquadramento, ipotesi di lavoro sui campi di esperienza e, soprattutto, un repertorio di trenta parole-chiave commentate, che rappresentano il lessico di base che accomuna e arricchisce la professionalità di educatori e insegnanti. Il volume è stato scritto da 36 autori (dirigenti scolastici, ispettori, docenti universitari, pedagogisti e soprattutto docenti) che rappresentano la 'voce viva' della scuola dell'infanzia italiana. Il coordinamento dell'opera è stato curato da Giancarlo Cerini (direttore della "Rivista dell'istruzione" e coordinatore di "Scuola7.it"), da Cinzia Mion (formatrice, psicologa, del Forum veneto delle associazioni professionali della scuola) e da Giovanna Zunino (già insegnante di scuola dell'infanzia e membro dei comitati scientifici di Proteo Fare Sapere e ZeroseiUp).

*Io scelgo tutta un'altra scuola* Marzia Bosoni, 2019-05-09 Un'esplorazione delle esperienze educative alternative alla scuola tradizionale, sia nell'ambito delle realtà prescolari e di scuola primaria sia in quelle, più rare ma non meno significative, della scuola secondaria. Un fermo immagine di una realtà in continuo mutamento che, lontano dal voler proporre nuove verità assolute, intende soprattutto accendere lo sguardo critico del lettore. Dopo una panoramica delle principali teorie pedagogiche e delle metodologie utilizzate dagli educatori per metterle in pratica, il libro prende in esame le esperienze di istruzione alternativa più rappresentative per le diverse fasce di età, nonché le realtà associative che lavorano per armonizzarne l'operato. Infine, anche attraverso le testimonianze di alcuni giovani, tenta di capire a quali percorsi formativi e lavorativi tali modelli di istruzione possano dare accesso, provando a tracciare possibili scenari per l'educazione del futuro.

Concorso a cattedra 2020 Scuola dell'infanzia - Volume 1. Manuale integrato per la preparazione: prova preselettiva,

*Educazione ed innovazione sociale* Glenda Galeotti ,2020-07-14 Il volume propone un'interpretazione della formazione continua quale fattore abilitante l'innovazione sociale. La formazione è intesa come opportunità per modificare e co-creare costantemente le condizioni strutturali e socioculturali in contesti lavorativi, attraverso processi e pratiche inclusivi e collaborativi. La riflessione presentata muove dall'analisi in chiave eco-sistemica dei processi formativi implicati nelle dinamiche di innovazione sociale e sviluppa una definizione dell'agire educativo funzionale a formulare e sperimentare risposte inedite ai bisogni sociali complessi. L'azione educativa, orientata alla combinazione creativa di risorse materiali, immateriali, talenti individuali, immaginazione collettiva, favorisce lo sviluppo di capacità per ripensare servizi educativi e socio educativi ed affrontare le sfide che la realtà presenta.

Teaching Coding in K-12 Schools Therese Keane,Andrew E. Fluck,2023-02-27 This book contains highly effective ways to teach coding and computational thinking skills throughout primary and secondary schooling. It outlines a research informed path for students from birth to 18 years, identifying key skills and learning activities. Based on global perspectives and research at each stage, it outlines how these findings can be applied in the classroom. Teaching coding to students in K-12 has been a skillset that has been debated across educational jurisdictions globally for some time. The book provides examples of schools that are teaching coding to students in engaging and relevant ways, delivering well thought out compulsory curriculums. Additionally, it provides examples of schools where coding is not mandated in the curriculum and is taught in an ad-hoc manner. Through the full discussion of all of these varied examples, the book presents both sides of the serious and ongoing debate in the field as to whether coding should be taught in an explicit way at all. The increasing school of thought that teaching coding is a skill that is already obsolete, and the focus should be on computational thinking is completely examined and presented. In this book, both sides of the argument, as well as the specific, meticulous research underlying

each side, are given equal weight. The debate is a serious one and requires a clearly defined thematic response with evidence on all sides of the argument presented rationally. This book does just that. Created by carefully selected authors from around the world, it will be a highly studied research reference.

*Teorie, metodologie e pratiche della ricerca auto-bio-grafica per le professioni educative, scolastiche, culturali e di cura*  
Vanna Boffo,Caterina Bennelli,2024-12-31 Teorie, metodologie e pratiche della ricerca auto-bio-grafica per le professioni educative, scolastiche, culturali e di cura nasce dall'incontro di docenti e studiosi provenienti da due contesti di formazione e di ricerca in ambito accademico ed extra-accademico: il Dipartimento di Formazione, Lingue, Intercultura, Letterature e Psicologia (FORLILPSI) dell'Università di Firenze e la Libera Università dell'Autobiografia di Anghiari ( LUA). Il volume è l'esito del progetto didattico del Master Metodologie della ricerca auto-bio-grafica, pratiche di narrazione, educazione degli adulti: per le professioni educative, scolastiche, culturali e di cura, effettuato a Firenze in via sperimentale. Nella costruzione e nell'elaborazione del prodotto editoriale sono stati approfonditi aspetti e tematiche confinanti con la ricerca autobiografica in ambito pedagogico, didattico, sperimentale e storico, assieme ai contributi delle partecipanti al Master con le riflessioni finali sui progetti svolti, presentati nella seconda parte del volume. Le continue ricerche in ambito interdisciplinare che utilizzano fonti autobiografiche ed ego-documenti dimostrano quanto sia importante approfondire e avanzare tali studi anche alla luce delle nuove emergenze sociali, culturali e pedagogiche. I saggi del presente volume contribuiscono, con interessanti approfondimenti, all'esplorazione della ricerca narrativa e auto-biografica per un continuo sviluppo degli studi tematici e a carattere interdisciplinare. Con i contributi di: Caterina Benelli, Vanna Boffo, Luca Bravi, Chiara Clemente, Debora Daddi, Giovanna Del Gobbo, Francesco De Maria, Duccio Demetrio, Daniela Frison, Glenda Galeotti, Dino Mancarella, Stefano Oliviero, Fabio Togni, Francesca Torlone e le corsiste del Master Metodologie della ricerca auto-bio-grafica, pratiche di narrazione, educazione degli adulti: per le professioni educative, scolastiche, culturali e di cura.

**Per un manifesto del digitale nella scuola AA. VV.,2022-10-21T00:00:00+02:00** Il digitale ha cambiato le nostre vite di tutti i giorni. Lo sta facendo da anni e più passa il tempo più lo fa in maniera inesorabile e profonda: è un mutamento radicale di prospettiva che ci obbliga a diventare consapevoli delle differenze, delle opportunità e anche dei rischi che offre rispetto ai corrispondenti analogici ai quali sta via via subentrando. Per questo la scuola non può più ignorarlo e farne a meno. Per lo più, però, tende a piegarlo alle sue forme, ai suoi ritmi, alle sue routine, depotenziandolo e facendo in modo da evitare di confrontarsi con le novità e i cambiamenti che esso esige. Ci si trova allora di fronte a una sorta di ibrido mitologico come l'ircocervo: solo che, in questo caso, anziché avere un animale per metà capro e per metà cervo abbiamo tecnologie, processi e servizi digitali usati come se fossero analogici, all'interno di stili di pensiero e di strutture organizzative ancora tradizionali. Così quello che dovrebbe essere un ponte per traghettare la scuola verso un futuro che è già qui e ora, guarda al passato: e come ci racconta Kafka, un ponte non può voltarsi indietro senza abdicare alla propria funzione e

precipitare.
