**Climate Change, Extreme Events and Disaster Risk Reduction** Suraj Mal,R.B. Singh,Christian Huggel,2017-12-05

This book discusses the science, causes, impacts and risk reduction strategies for climate change and disasters. It focuses on the use of traditional knowledge, new innovation and education to build a culture of safety and resilience at all levels in order to promote sustainable development goals in general and disaster risk reduction in particular. The global climate has changed substantially over the last century. There is strong evidence of global climate change in the form of increase in air and sea surface temperature, recession of glaciers, changes and shifting of climate regimes, increasing number of extreme events and sea levels changes. The increasing frequency of climate change induced disasters in particular is posing a threat to resilience, lives and livelihoods at global, regional and local levels. Major ecosystems of the world have experienced several climate induced disaster events in recent past. This book provides new insights into the occurrence and impacts of climatic extremes and strategies for disaster risk reduction. It includes studies on rainfall and temperature trends, floods and drought disasters, weather and climatic related disasters in mountains, changes in plant activities, risk assessment and responses in different ecosystems of the world. The book is particularly useful for environmental and disaster managers, researchers and graduate students, as well as policy makers.

*Natural Disasters, When Will They Reach Me?* Isuri Wijesundera,Malka N. Halgamuge,Thrishantha Nanayakkara,Thas Nirmalathas,2016-05-16 The expected time of impact, also known as the mean first passage time (MFPT) to reach failure, is a critical metric in the management of natural disasters. The complexity of the dynamics governing natural disasters lead to stochastic behaviour. This book shows that state transitions of many such systems translate into random walks on their respective state spaces, biased and shaped by environmental inhomogeneity. Thus the probabilistic treatment of those random walks gives valuable insights of expected behaviour. A comprehensive case study of predicting cyclone induced flood is followed by a discussion of generic methods that predict MFPT addressing directional bias. This is followed by discussing MFPT prediction methods in systems showing network inhomogeneity. All presented methods are illustrated using real datasets of natural disasters. The book ends with a short discussion of possible future research areas introducing the problem of predicting MFPT for bush-fire propagation.

**All the Way Round** Stuart Trueman,2013-06-01 In 2010, Stuart Trueman set out on a 16-month voyage to

circumnavigate Australia by kayak. He wasn't the first person to complete the circumnavigation, or even the second - but he was determined to make it a triumphant third. Stuart's adventure was to be done on a shoestring, with no support team and a powerful belief in the philosophy of Do-It-Yourself, albeit with the kindness and help of the many people he met along the way. This single-handed journey would see him face extraordinary challenges, including the non-stop crossing of mighty 200-kilometre cliff formations, huge seas, dangerous surf, sleeping whales, inquisitive sharks, large crocodiles and the sheer, relentless grind of paddling day in and day out all around Australia's massive coastline. From heatstroke in the tropical north to the icy gales of the Southern Ocean, and everything in between, Stuart's experienced all the wonders and terrors of Australia's diverse geography, writing a gripping account that vividly brings to life the coasts of our incredible continent. Filled with dry humour, resilience and the myriad incidents and dramas that made up this epic journey, *All the Way Round* is a classic of adventure.

**Battle for the President's Elephants** Sharon Pincott, 2012 Searching for something more than her high-flying life as an information technology executive, Sharon Pincott traded her privileged first world existence to start a new life with the Presidential Elephants of Zimbabwe: the country's flagship clan of over 450 wild elephants. This biography follows the passionate wildlife conservationist from her home in Australia to the new one she discovers in Africa and chronicles her daily life, from cherishing incredibly intimate encounters with these gentle giants to coping with accusations of being a spy. Written with engaging humor, warmth, and a deep, tangible love of Africa's wildlife, this captivating collection of bush tales offers a further glimpse into the wonders, and grim realities, of choosing a life less ordinary.

**Tracking the Literature of Tropical Weather** Anne Collett, Russell McDougall, Sue Thomas, 2017-01-09 This book tracks across history and cultures the ways in which writers have imagined cyclones, hurricanes, and typhoons, collectively understood as "tropical weather." Historically, literature has drawn upon the natural world for its store of symbolic language and technical device, making use of violent storms in the form of plot, drama, trope, and image in order to highlight their relationship to the political, social, and psychological realms of human affairs. Charting this relationship through writers such as Joseph Conrad, Herman Melville, Gisèle Pineau, and other writers from places like Australia, Japan, Mauritius, the Caribbean, and the Philippines, this ground-breaking collection of essays illuminates the specificities of the ways local, national, and regional communities have made sense and even relied upon the literary to endure the devastation caused by deadly tropical weather.

**Venom Doc** Bryan Grieg Fry, 2016-10-04 Steve Irwin meets David Attenborough in this jaw-dropping account of studying the world's most venomous creatures. Venomologist Bryan Grieg Fry has one of the most dangerous jobs on earth: he works with its deadliest creatures. He's been bitten by twenty-six venomous snakes, been stung by three stingrays, and survived a near-fatal scorpion sting while deep in the Amazon jungle. He's received more than four hundred stitches and broken twenty-

three bones, including breaking his back in three places, and had to learn how to walk again. But when you research only the venom you yourself have collected, the adventures—and danger—never stop. Imagine a three-week-long first date in Siberia catching venomous water shrews with the daughter of a Russian war hero; a wedding attended by Eastern European prime ministers and their machine-gun-wielding bodyguards and snakes; or leading a team to Antarctica that results in the discovery of four new species of venomous octopi. Bryan's discoveries have radically reshaped views on venom evolution and contributed to the creation of venom-based life-saving medications. In pursuit of venom, he has traveled the world collecting samples from Indonesia to Mexico, Germany, and Brazil. He's encountered venomous creatures of all kinds, including the Malaysian king cobra, the Komodo dragon, and the funnel-web spider. Bryan recounts his lifelong passion for studying the world's most venomous creatures in this outlandish, captivating memoir, where he and danger are never far apart.

*Cyclone Country* Christopher J. Spicer, 2020-09-29 The storm has become a universal trope in the literature of crisis, revelation and transformation. It can function as a trope of place, of apocalypse and epiphany, of cultural mythos and story, and of people and spirituality. This book explores the connections between people, place and environment through the image of cyclones within fiction and poetry from the Australian state of Queensland, the northern coast of which is characterized by these devastating storms. Analyzing a range of works including Alexis Wright's *Carpentaria*, Patrick White's *The Eye of the Storm*, and Vance Palmer's *Cyclone* it explains the cyclone in the Queensland literary imagination as an example of a cultural response to weather in a unique regional place. It also situates the cyclones that appear in Queensland literature within the broader global context of literary cyclones.

*Agriculture and Resilience in Australia's North* Keith Noble, Tania Dennis, Sarah Larkins, 2019-08-05 This book examines the mechanisms and strategies farmers in North Australia adopt to manage the setbacks and challenges they face. This social research is based on farmers' experiences, but also draws on the author's own experience after his tropical fruit farm was destroyed by two Category 5 cyclones in five years. Through historical analysis, the book compares historic and contemporary aspirations for northern development, and discusses the influence of the built environment on individuals as well as access to health and other social services. Exploring the implications of individual resilience strategies for policy development within the broader context of northern development and evolving environmental governance, the book also highlights the fact that this is occurring in a new geological epoch – the Anthropocene. The book will provide a unique perspective and understanding to government, individuals and industries interested in northern Australia and its relationship to the world

***Biodiversity and Environmental Change*** Emma Burns, Andrew Lowe, Nicole Thurgate, David Lindenmayer, 2014-02-06 This data-rich book demonstrates the value of existing national long-term ecological research in Australia for monitoring environmental change and biodiversity. Long-term ecological data are critical for informing trends in biodiversity and

environmental change. The Terrestrial Ecosystem Research Network (TERN) is a major initiative of the Australian Government and one of its key areas of investment is to provide funding for a network of long-term ecological research plots around Australia (LTERN). LTERN researchers and other authors in this book have maintained monitoring sites, often for one or more decades, in an array of different ecosystems across the Australian continent – ranging from tropical rainforests, wet eucalypt forests and alpine regions through to rangelands and deserts. This book highlights some of the temporal changes in the environment that have occurred in the various systems in which dedicated field-based ecologists have worked. Many important trends and changes are documented and they often provide new insights that were previously poorly understood or unknown. These data are precisely the kinds of data so desperately needed to better quantify the temporal trajectories in the environment in Australia. By presenting trend patterns (and often also the associated data) the authors aim to catalyse governments and other organisations to better recognise the importance of long-term data collection and monitoring as a fundamental part of ecologically-effective and cost-effective management of the environment and biodiversity.

*Cases on Emerging Information Technology Research and Applications* Khosrow-Pour, D.B.A., Mehdi, 2013-03-31 Rapidly advancing technology creates an overwhelming demand to remain informed of current research and discoveries. *Cases on Emerging Information Technology Research and Applications* strategically combines the latest studies encompassing the most current advancements in the IT arenas. This compilation of cases highlights relevant information for professionals, researchers, and students wishing to remain current with the ever-changing IT field.

**Cruising the Queensland Coast** Greg Luck, 2022-01-22 This book has been replaced by *Cruising the Queensland Coast*, Second Edition. *Cruising the Queensland Coast* is a cruising guide for yachts cruising the Queensland coast. Each of the 13 coasts, from the Gold Coast to the Cooktown Coast, is covered in detail, including marinas, anchorages, passages, wind and wave averages, public pontoons and quick reference information and links for vital weather, search and rescue, notices to mariners and other vital information. It features hundreds of chartlets and high-resolution aerial photos of anchorages to take the guesswork out of anchoring. Each anchorage has information on depth, bottom, mobile reception, marine park zone and recommended wind directions and strengths. The book is also integrated with Navionics and C-Map. Anchorages and passages can be imported into Navionics and C-Map simply by clicking on the Navionics link  and GPX link  icons throughout the book. The book also provides an extensive reference of useful information for the Queensland Coast such as skills and experience, recommended apps, charts and books, equipping the yacht for cruising, cruising logistics, climate and weather systems, marine hazards and the three major marine parks and their rules. This book will help get the first-time cruiser of the Queensland coast started. For those familiar with the coast, the wealth of information, data and links all pulled together into one place and organised in a systematic way will prove invaluable. For both, the more than one thousand external reference links make it easier to cruise the coast safely and simplify many of the everyday tasks of living on a

cruising yacht such as finding and entering a marina and restocking once there.

**Violent Earth** DK,2011-10-03 Using powerful photography, specially commissioned artworks, and intuitive infographics, Violent Earth explores phenomenon of natural disasters in unprecedented detail. Individual sites from Stromboli to Mount St Helens and the mid-Atlantic Ridge to the Hawaiian hotspots are profiled, with clear, illustrated explanations of how they came into being. This eBook also looks at some of the most famous events associated with these places - from the historic eruptions of Laki, Iceland, which is credited with triggering the French Revolution, to the devastating earthquake in Haiti that killed over 250,000 people in 2010. Violent Earth also explores our restless oceans, and details the submarine rifts, vents, and volcanoes A spectacular reference book for all the family, Violent Earth is an authoritative, stimulating and visually arresting exploration of the dramatic forces that are constantly shaping our planet - often without warning and with devastating results.

**Extreme Natural Hazards, Disaster Risks and Societal Implications** Alik Ismail-Zadeh,Jaime Urrutia Fucugauchi,Andrzej Kijko,Kuniyoshi Takeuchi,Ilya Zaliapin,2014-04-17 This book presents a unique, interdisciplinary approach to disaster risk research, combining cutting-edge natural science and social science methodologies. Bringing together leading scientists, policy makers and practitioners from around the world, it presents the risks of global hazards such as volcanoes, seismic events, landslides, hurricanes, precipitation floods and space weather, and provides real-world hazard case studies from Latin America, the Caribbean, Africa, the Middle East, Asia and the Pacific region. Avoiding complex mathematics, the authors provide insight into topics such as the vulnerability of society, disaster risk reduction policy, relations between disaster policy and climate change, adaptation to hazards, and (re)insurance approaches to extreme events. This is a key resource for academic researchers and graduate students in a wide range of disciplines linked to hazard and risk studies, including geophysics, volcanology, hydrology, atmospheric science, geomorphology, oceanography and remote sensing, and for professionals and policy makers working in disaster prevention and mitigation.

**Putting Citizens First** Evert A. Lindquist, Sam Vincent, John Wanna, 2013-08-01 This book explores the ways in which governments are putting citizens first in their policy-making endeavours. Making citizens the focus of policy interventions and involving them in the delivery and design is for many governments a normative ideal; it is a worthy objective and sounds easy to achieve. But the reality is that putting citizens at the centre of policy-making is hard and confronting. Are governments really serious in their ambitions to put citizens first? Are they prepared for the challenges and demands such an approach will demand? Are they prepared to commit the time and resources to ensure genuine engagement takes place and that citizens' interests are considered foremost? And, more importantly, are governments prepared for the trade-offs, risks and loss of control such citizen-centric approaches will inevitably involve?

**The Geology of Australia** Robert Henderson, David Johnson, 2016-09-06 From Uluru to the Great Dividing Range, The Geology of Australia explores the timeless forces that have shaped this continent.

Great White James Woodford, 2014-12-01 I remember thinking two things at the time. Firstly, if it had wanted to eat us we wouldn't have stood a chance and second, it didn't want to eat us. When James Woodford was confronted by half a dozen sharks swimming at full speed, he froze in shock. But he was even more surprised when they swam right past, completely ignoring him. He couldn't reconcile this experience with the mindless eating-machines that dominate the discussion of sharks in Australia. Interviewing world-renowned experts and joining research teams at Neptune Islands, one of the most famous shark aggregation locations in the world - and consequently one of the most dangerous dive sites - James investigates these intriguing creatures at close range and discovers their fascinating world.

**Ways to Live in Harmony with Nature** Kamaljit K Sangha, 2018-10-01 Have you ever wondered how you can maintain your current lifestyle, but not exhaust our planet's resources? In modern times, many of us have environmental knowledge but we lack an understanding of how to apply that knowledge to our everyday lives. Bridging this gap is what has motivated ecological economist Dr Kamaljit Sangha to write this book. Dr Sangha examines how people can make a difference to the environment by proposing little actions at the household scale that can contribute towards saving our planet. This book examines how to:- Minimise the gap between scientific knowledge and public awareness- Reduce the impact of our actions on our natural environment- Maintain our earth's natural resources- Be happier and healthier by recognising our reliance on Mother Nature and re-establishing our connections with nature. Dr Sangha believes there are a few, very easy steps that everyone - whether they reside in the city or the country - can take to save money, their mental and physical health, and

ultimately our planet.

The Australian Book of Disasters Larry Writer, 2011-07-01 The recent floods that ravaged Queensland saw three-quarters of the state declared a disaster zone from the capital city on the Brisbane River to remote rural communities and caused billions of dollars worth of damage, forcing thousands to abandon their homes. This latest assault by nature reminds us all that, despite its stark beauty, the Australian landscape has a deadly edge. It is a place of flood, fire, earthquake and ferocious storms. The Australian Book of Disasters features enthralling stories of catastrophe and survival and courage in the face of enormous odds. With chapters covering the breadth of this harsh land, it includes detailed accounts of the events burnt into Australia's national memory, from the Dunbar shipwreck in 1857 to the Black Saturday bushfires of 2009, and finishing with an in-depth look at the Queensland floods of 2010-2011. From the same series as *The Australian Book of True Crime* and *The Australian Book of Heroism*.

Social Work and Disasters Margaret Alston, Tricia Hazeleger, Desley Hargreaves, 2019-01-11 Disasters are increasing in frequency and intensity across the world, causing significant destruction to individuals and communities. Yet many social workers are ill-prepared for the demands of this field of practice. This book discusses the role of social workers in disaster work, including in disaster-preparedness, during the disaster and in post-disaster practice. It addresses the complexities of social work disaster practice, noting the need for social workers to understand the language of trauma and to respond effectively. The authors discuss disaster theory and practice, drawing out elements of practice at macro-, meso- and micro-levels and at various stages of the disaster. They examine the factors that shape vulnerability in disasters and draw out the possibility of post-traumatic growth. The final section discusses strategies for self-care in disaster practice, noting the organisational and personal strategies that can be adopted to facilitate the wellbeing of workers in the field. With real-life case studies from top scholars in the field, this book is essential reading for social work practitioners working in the field of disaster practice, as well as social work students and academics. It will also be useful to other health professionals who wish to understand this field of practice.
