**Díaz-Bonilla, Eugenio, Thomas, Marcelle**

Why some are more equal than others Díaz-Bonilla, Eugenio, Thomas, Marcelle, 2016-02-26 Food (in)security conditions differ across countries, and those differences affect the discussion of potential policy approaches. This paper reviews several approaches to creating country typologies of food (in)security conditions and then updates Díaz-Bonilla et al.'s 2000 IFPRI paper Food Security and Trade Negotiations in the World Trade Organization. The exercise uses five variables: domestic food production per capita (constant dollars per capita); a combination of calories and protein per capita; the ratio of total exports to food imports; the ratio of the nonagricultural population to total population; and a variable based on the mortality rate for children under 5. The raw values are all transformed into z-scores. The paper explains how the variables relate to the traditional dimensions of availability, access, and utilization in the definition of food security. Data for the variables correspond to the period 2009–2011 (or the latest available) and cover 155 developed and developing countries. Two clustering methods are applied: hierarchical and k-means. The hierarchical approach is used first, to determine potential outliers and to explore what would be a reasonable number of clusters. That analysis suggests that the maximum number of relevant clusters for the analysis is 10 and identifies three countries as outliers. We then use the k-means method to classify all other countries in one of the 10 different clusters or groups. The paper analyzes the average profile of each one of those groups and divides them into three categories of food insecure, intermediate, and food secure. We highlight the different profiles of each of the food-insecure clusters (such as whether they were rural or urban, trade stressed or not, and so on). Limitations related to land and water availability (measured as arable land, hectares per person, and renewable internal freshwater resources in cubic meters per capita) are incorporated into the analysis as an additional dimension to be considered. The paper closes with some policy considerations for the different types of clusters of food-insecure countries.

HyperHumanity Mike Hockney, 2013-07-28 Humanity is a single biological species but has split into two different mental species labelled Mythos and Logos. The Mythos species is driven by emotional stories, not by facts, evidence or rational arguments. Even scientific materialism is a Mythos – the sensory Mythos – which asserts that rational unobservables, undetectable by the senses, simply cannot exist. The Enlightenment – the Age of Reason – was when Logos humanity came to the fore. HyperHumanity is the upgrade of Logos humanity that advocates Hyperrationalism. Old Humanity, stuck in its irrational Mythos past, will become extinct. The future is about the new human race – HyperHumanity. Do you belong to the

Illuminated Ones, the Shining Ones, the Divine Ones, or are you on your knees to some story-book God, an irrational market or irrational devotion to your physical senses? HyperHumanity is not here to help Old Humanity. It is here to replace it! We are the true human race, that which seeks to claim its rightful prize – divinity.

*Fowler's Concise Dictionary of Modern English Usage* Jeremy Butterfield, 2016-03-10 Fowler's Concise Dictionary of Modern English Usage is an invaluable reference work that offers the best advice on English usage. Known in previous editions as the 'Pocket Fowler', this third edition is a descendant of the original 1926 edition of A Dictionary of Modern English Usage by Henry Fowler. Based on the unrivalled evidence and research of the Oxford Languages Programme, the new edition answers your most frequently asked questions about language use. Should you use a split infinitive, or a preposition at the end of a sentence? Is it infer or imply? Who or whom? What are the main differences between British and American English? Over 4,000 entries offer clear recommendations on issues of grammar, pronunciation, spelling, confusable words, and written style. Real examples are drawn from OUP's vast database of classic and contemporary literary sources, newspapers and magazines, and the Internet. Jeremy Butterfield has judiciously revised the text to reflect the English usage practices and con

Fowler's Dictionary of Modern English Usage Jeremy Butterfield, 2015-03-26 Why literally shouldn't be taken literally. Why Americans think home in on something is a mistake and Brits think hone in is. Is it OK to spell OK okay? What's wrong with hence why? Was Alanis Morrisette ever ironic? Fowler's Dictionary of Modern English Usage is the world-famous guide to English usage, loved and used by writers, editors, and anyone who values correct English since it first appeared in 1926. Fowler's gives comprehensive and practical advice on complex points of grammar, syntax, punctuation, style, and word choice. Now enlarged and completely revised to reflect English usage in the 21st century, it provides a crystal-clear, authoritative picture of the English we use, while illuminating scores of usage questions old and new. International in scope, it gives in-depth coverage of both British and American English usage issues, with reference also to the English of Australia, Canada, India, New Zealand, and South Africa. The thousands of authentic examples in the book vividly demonstra

**The Crib, the Cross, and the Crown** Michael John Hooton, 2016-06-16 We are all familiar with the stories of what happened at the first Christmas and Easter--or are we? The Crib, the Cross and the Crown strips away the wrapping-paper of tradition and folk-lore from the stories of the birth and death of Jesus Christ, and takes a fresh look at what the Gospels themselves say. It describes the real Jesus of the New Testament, and reflects on the ways in which the recurring themes in his story can shape our own lives and faith.

**Metaphor** Beate Hampe,2017-06-29 This book brings together leading metaphor researchers from a number of disciplines to unite the field of metaphor theory.

**A Conservative's Manifesto** Eric Hines,2012-02-13 A Conservative's Manifesto offers a description of the principles of modern conservatism. The present political climate is one of a big and growing government that increasingly asserts its right, its obligation, to control in increasing detail the decisions of ordinary Americans. It is necessary to discuss these conservative principles in an effort to focus our thoughts as we struggle to regain control over our lives and to rein in that overbearing government. The lays out, in so many words, a set of (modern) Conservative principles that are tied back to the 18th Century Liberal principles of our nation's Founders.

The Serengeti Rules Sean B. Carroll,2024-08-20 One of today's most accomplished biologists and gifted storytellers reveals the rules that regulate all life How does life work? How does nature produce the right numbers of zebras and lions on the African savanna, or fish in the ocean? How do our bodies produce the right numbers of cells in our organs and bloodstream? In *The Serengeti Rules*, award-winning biologist and author Sean Carroll tells the stories of the pioneering scientists who sought the answers to such simple yet profoundly important questions, and shows how their discoveries matter for our health and the health of the planet we depend upon. One of the most important revelations about the natural world is that everything is regulated—there are rules that regulate the amount of every molecule in our bodies and rules that govern the numbers of every animal and plant in the wild. And the most surprising revelation about the rules that regulate life at such different scales is that they are remarkably similar—there is a common underlying logic of life. Carroll recounts how our deep knowledge of the rules and logic of the human body has spurred the advent of revolutionary life-saving medicines, and makes the compelling case that it is now time to use the Serengeti Rules to heal our ailing planet. Bold and inspiring, *The Serengeti Rules* illuminates how life works at vastly different scales. Read it and you will never look at the world the same way again.

*The Endangered Species Act* Brian Czech,Paul R Krausman,2001-03-14 The new model of policy design theory frames the discussion regarding the frequently analyzed Endangered Species Act in this historical perspective. Since the 1970s, the

Endangered Species Act (ESA), by virtue of its regulatory impact, has been a frequent subject of policy analysis. In this comprehensive history and critique of the ESA, Brian Czech and Paul R. Krausman incorporate the new model of policy design theory to frame a larger discussion about conservation biology and American democracy. Czech and Krausman provide a historical background of endangered species policy that integrates natural history, socioeconomic trends, political movements, and professional developments. Outlining the controversies surrounding the ESA, they find a connection between challenges to species conservation and challenges to democracy. After an assessment of ESA analyses that have been performed from traditional perspectives, they engage policy design theory to review the structural logic of the ESA, analyzing each clause of the legislation for its application of the fundamental elements of democracy. To address the technical legitimacy of ESA, they propose two new genetic considerations-functional genome size and molecular clock speed-to supplement phylogenetic distinctiveness as criteria with which to prioritize species for conservation. Next, they systematically describe the socioeconomic context of ESA by assessing and classifying the causes of species endangerment. A hybrid of policy analysis and ecological assessment, *The Endangered Species Act: History, Conservation Biology, and Public Policy* will appeal to scholars and students in the fields of natural resource policy and law, conservation biology, political science, wildlife ecology, and environmental history, and to professionals at agencies involved in wildlife conservation. "Interesting for anyone concerned about the preservation of species and, more generally, the global environment . . . a good explanation of the statute, a wonderful and often entertaining description of how we view and rank nonhuman species, and a provocative critique of the very policy analytic framework the authors have employed." —Joseph F. C. DiMento *Environment* "Czech and Krausman are effective and original scholars. *The Endangered Species Act: History, Conservation Biology, and Public Policy* is both a treatise on policy assessment and an excellent history, assessment, and discussion of the ESA itself. Those interested in natural resources policy and those interested specifically in the ESA will want to read this book." —Jack Ward Thomas, The University of Montana, Chief Emeritus, U.S. Forest Service

**Minority Languages and Group Identity** John Edwards, 2010-01-13 The central concern in this book is the relationship between language and group identity, a relationship that is thrown into greatest relief in 'minority' settings. Since much of the current interest in minority languages revolves around issues of identity politics, language rights and the plight of 'endangered' languages, one aim of the book is to summarise and analyse these and other pivotal themes. Furthermore, since the uniqueness of every language-contact situation does not rest upon unique elements or features – but, rather, upon the particular weightings and combinations of features that recur across settings – the second aim here is to provide a general descriptive framework within which a wide range of contact settings may be more easily understood. The book thus begins with a discussion of such matters as language decline, maintenance and revival, the dynamics of minority languages, and the ecology of language. It then offers a typological framework that draws and expands upon previous categorising efforts.

Finally, the book presents four case studies that are both intrinsically interesting and – more importantly – provide specific illustrations of the generalities discussed earlier.

An Introduction to Pattern Recognition and Machine Learning Paul Fieguth, 2022-11-09 The domains of Pattern Recognition and Machine Learning have experienced exceptional interest and growth, however the overwhelming number of methods and applications can make the fields seem bewildering. This text offers an accessible and conceptually rich introduction, a solid mathematical development emphasizing simplicity and intuition. Students beginning to explore pattern recognition do not need a suite of mathematically advanced methods or complicated computational libraries to understand and appreciate pattern recognition; rather the fundamental concepts and insights, eminently teachable at the undergraduate level, motivate this text. This book provides methods of analysis that the reader can realistically undertake on their own, supported by real-world examples, case-studies, and worked numerical / computational studies.

Handbook of Nonverbal Assessment R. Steve McCallum, 2017-02-21 The second edition of this comprehensive volume presents methods for nonverbal assessment of diverse individuals, such as persons with speech or hearing deficits, limited English skills, or emotional problems. Chapters provide a contemporary context for nonverbal evaluations, accompanied by descriptions of best practices in detecting bias in cognitive tests, multicultural assessment, cross-battery assessment of nonverbal cognitive ability, and psychological and physiological influences on assessment. The book discusses nonverbal assessment of cognition and intelligence as well as related domains, such as academic skills, neurocognitive functioning, personality, and behavior issues. Guidelines for using common nonverbal assessment tools and strategies feature the most up-to-date information on administration and scoring, psychometric properties, and strengths and limitations. Best practices for testing diverse children and adults and using reliable, valid, and fair assessment instruments are emphasized throughout the book. Featured instruments in the Handbook include: The Universal Nonverbal Intelligence Test, Second Edition (UNIT2). The newest version of the Leiter International Performance Scale (Leiter-3). The Wechsler Nonverbal Scale of Ability (WNV). The Comprehensive Test of Nonverbal Intelligence, Second Edition (CTONI-2). The Test of Nonverbal Intelligence. The General Ability Measure for Adults (GAMA). The Second Edition of the Handbook of Nonverbal Assessment is a must-have resource for researchers and graduate students in school and clinical child psychology, speech and language pathology, educational technology, social work, and related disciplines as well as clinicians, professionals, and in-service educators of diverse students.

**A Reporter's Guide to the EU** Sigrid Melchior, 2017-05-08 A Reporter's Guide to the EU addresses a pressing need for

an effective, in-depth guide to reporting on this major governing body, offering practical advice on writing and reporting on the EU and a clear, concise breakdown of its complex inner-workings. Sigrid Melchior, an experienced Brussels-based journalist, gives a detailed overview of the main EU institutions and explains the procedures for passing EU law. Interviews with professionals working for the EU, from areas including lobbying, public relations, diplomacy and journalism, are featured throughout the book. Building on this, the second half of the book provides useful journalistic tools and tips on how to approach EU reporting. It identifies common mistakes in reporting on the EU and how to avoid them, as well as offering guidance on investigative reporting. Melchior also details how to work with information gathered and maintained by EU institutions, including their audiovisual archives, the Eurostat and Eurobarometer, which are invaluable resources for journalists and journalism students. With few aspects of political life that remain untouched by EU decision-making the book demystifies the EU system and its sources, enabling professional journalists and students of journalism to approach EU reporting with clarity and confidence. **Bond Pricing and Yield Curve Modeling** Riccardo Rebonato, 2018-06-07 In this book, well-known expert Riccardo Rebonato provides the theoretical foundations (no-arbitrage, convexity, expectations, risk premia) needed for the affine modeling of the government bond markets. He presents and critically discusses the wealth of empirical findings that have appeared in the literature of the last decade, and introduces the 'structural' models that are used by central banks, institutional investors, sovereign wealth funds, academics, and advanced practitioners to model the yield curve, to answer policy questions, to estimate the magnitude of the risk premium, to gauge market expectations, and to assess investment opportunities. Rebonato weaves precise theory with up-to-date empirical evidence to build, with the minimum mathematical sophistication required for the task, a critical understanding of what drives the government bond market.

**The Speaking Animal** Alison Suen, 2015-10-02 Animals regularly populate philosophical texts as a foil to illustrate what it means to be human. How should we understand this human-animal divide? Not only does it inform us of who we are, it also tells us how we should relate to the larger non-human world. The Speaking Animal interrogates the human-animal divide by looking at our linguistic differences – how the speaking human subject is constructed through its opposition to the dumb animal. Alison Suen begins with an analysis of the role of language in animal ethics, with an eye toward the voice/voiceless opposition that is at work in animal advocacy. After offering a critical analysis of the ethical and political significance of speaking for animals, the book takes on a more constructive turn, going against the usual interpretation of language as a capacity that allows us to reason. Instead, it argues that our language capacity is also a relational capacity. Language is that which enables us to develop kinship with others – including animal others.
