Playing Gay in the Golden Age of British TV Stephen Bourne, 2019-11-22 The television set – the humble box in the corner of almost every British household – has brought about some of the biggest social changes in modern times. It gives us a window into the lives of people who are different from us: different classes, different races, different sexualities. And through this window, we've learnt that, perhaps, we're not so different after all. *Playing Gay in the Golden Age of British TV* looks at gay male representation on and off the small screen – from the programmes that hinted at homoeroticism to Mary Whitehouse's Clean Up TV campaign, and The Naked Civil Servant to the birth of Channel 4 as an exciting 'alternative' television channel. Here, acclaimed social historian Stephen Bourne tells the story of the innovation, experimentation, back-tracking and bravery that led British television to help change society for the better.

Social Perspectives in Lesbian and Gay Studies Peter M. Nardi, Beth E. Schneider, 2013-09-13 This comprehensive reader brings a social science perspective to an area hitherto dominated by the humanities. Through it, students will be able to follow the story of how sociology has come to engage with gay and lesbian issues from the 1950s to the present, from the earliest research on the underground worlds of gay men to the emergence of queer theory in the 1990s. Bringing together classic readings and the best work of younger scholars from all parts of the English-speaking world, this reader will be an invaluable resource for courses at undergraduate and graduate level in all areas of the sociology of sexuality and gender. Separate sections cover: * theoretical foundations * identity and community making * institutions and social change * challenges for the future. Each section begins with an introduction giving readers a brief guide to the readings in that section, contextualises them and relates them to one another and the book ends with an afterword by Ken Plummer summing up the present state of play and looking forward to the future.

Attraction Explained Viren Swami,2021-02-10 When it comes to relationships, there's no shortage of advice from self-help 'experts', pick-up artists, and glossy magazines. But modern-day myths of attraction often have no basis in fact or - worse - are rooted in little more than misogyny. Based on science rather than self-help clichés, psychologist Viren Swami debunks these myths and draws on cutting-edge research to provide a ground-breaking and evidence-based account of relationship formation. At the core of this book is a very simple idea: there are no 'laws of attraction', no fool-proof methods or strategies for getting someone to date you. But this isn't to say that there's nothing to be gained from studying attraction. Based on science rather than self-help clichés, *Attraction Explained* looks at how factors such as geography, physical appearance, reciprocity, and similarity affect who we fall for and why. With updated statistics, this second edition also includes new content on online dating, queer relationships, racism in dating, shyness, and individual differences. It remains an engaging and accessible introduction to attraction relationship formation for professionals, students, and general readers.

Sexual Orientation Discrimination Lee Badgett, Jeff Frank, 2007-06-11 Having recently authored one of the most significant books, *Money, Myths and Change*, in this exciting area of economics, Lee Badgett has now teamed up with Jeff Frank and a collection of international contributors to provide an analysis of sexual orientation discrimination on an international scale. Discrimination based on sexual orientation continues to fuel collective action, policy debates and academic scrutiny in many countries. For some time, sociologists and psychologists have studied sexual orientation discrimination in institutions and explored prejudices against lesbian, gay, bisexual, and transgender people in mainstream areas. Now economists have also begun to examine the experiences of lesbians, gay men and bisexuals in less traditional research sectors including the labour, housing, credit, and retail markets. This book includes sections on: wages and jobs discrimination across institutional contexts discrimination in cultural institutions including religion, education and sport addressing discrimination through public policies. Innovative and up-to-date this book is an essential read for postgraduate students studying in the areas of political economy, gender studies and feminist economics.

Unraveling Bias Christia Spears Brown, 2021-11-30 NATIONAL INDIE EXCELLENCE AWARD WINNER — PARENTING &

FAMILY 2022 IPPY AWARDS GOLD MEDALIST — PARENTING “Timely, informative, thought-provoking, inspirationally motivating.” —Midwest Book Review [Brown] offers pragmatic advice for teachers on how to stand up for diversity and inclusiveness in the classroom. —San Francisco Book Review We need only scan the latest news headlines to see how bias and prejudice harm adults and children alike—every single day. Police shootings that give rise to the Black Lives Matter revolution . . . rampant sexual harassment of women and the subsequent #MeToo movement . . . extreme violence toward trans men and women. It would be easy to fix these problems if the examples stopped with a few racist or sexist individuals, but there are also biases embedded in our government policies, media, and institutions. As a developmental psychologist and international expert on stereotypes and discrimination in children, Dr. Christia Spears Brown knows that biases and prejudice don’t just develop as people become adults (or CEOs or politicians). They begin when children are young, slowly growing and exposed to prejudice in their classrooms, after-school activities, and, yes, even in their homes, no matter how enlightened their parents may consider themselves to be. The only way to have a more just and equitable world—not to mention more broad-minded, empathetic children—is for parents to closely examine biases beginning in childhood and how they infiltrate our kids’ lives. In her new book *Unraveling Bias: How Prejudice Has Shaped Children for Generations and Why It's Time to Break the Cycle*, Dr. Brown will uncover what scientists have learned about how children are impacted by biases, and how we adults can help protect them from those biases. Part science, part history, part current events, and part call to arms, *Unraveling Bias* provides readers with the answers to vital questions: How do biased policies, schools, and media harm our children? Where does childhood prejudice come from, and how do these prejudices shape children’s behavior, goals, relationships, and beliefs about themselves? What can we learn from modern-day science to help us protect our children from these biases? Few issues today are as critical as being aware of bias and prejudice all around us and making sure our kids don’t succumb to them. To change lives and advance society, it’s time to unravel our biases—starting with the future leaders of the world.

The End of Gay Bert Archer, 2012-07-31 Gay is a phase. Not something people go through in adolescence, but, like feminism, a cultural, historical movement, on the way to something bigger. Through the prism of his own sexual past and present, with a wide array of references to pop culture, literature and history, Archer traces the rise and imminent fall of gay. Along the way, he cites historical examples of greater sexual liberation, embracing the lessons of these precedents as models for our own less inhibited times. Celebrating art that expresses love and passion unfettered by gender, Archer claims Shakespeare and Prince, Goethe and Madonna, as icons for a new, more open age of sex. Stimulating, engaging and

entertaining, The End of Gay is a bold work that looks forward to the vast possibilities of love without labels.
