Alternate Worlds James Gunn,2018-08-24 Alternate Worlds was first published in 1975 and became an instant classic, winning a Hugo award. This third edition brings the history of science fiction up to date, covering developments over the past forty years--a period that has seen the advent of technologies only imagined in the genre's Golden Age. As a literature of change, science fiction has become ever more meaningful, presaging dangers to humanity and, as Alvin Toffler wrote, guarding against the premature arrival of the future. The world has begun to recognize science fiction in many different ways, incorporating its elements in products, visual media and huge conventions.

The Rifters Box Collection Books 1-3 M. Pax,2018-02-11 A monstrous secret hides in the backwoods of a remote western town—a portal connecting our world to forty-two other universes. The visitors—most would call them terrifying—often have devastating effects. Their destruction hasn't been intentional... until lately. The usual band of protectors, The Rifters, defend us with daring and weapons built from coils, gears, and crystals, which is no longer enough. Earth's survival depends on an outlaw from 1888 and a librarian with a knack for ghosts. The Rifters Box Set includes: *The Rifters*, *The Initiate*, and *The Reader*. *The Rifters*: Daelin Long moves to Settler, Oregon, after being laid off from her job and robbed at gunpoint in New York City. County librarian isn't her dream job, but she's excited to reconnect with her younger sister. Only, her sister is missing and there's a phantom stealing heads. The town is plain weird and gets worse when Daelin stumbles upon its deepest secrets. *The Initiate*: Daelin Long joins the Rifters in hopes of finding her lost sister. Instead, she finds a swarm of killer bees like no other. These bees start off as pebbles and sting like fire. Her first lesson is to trust her fellow Rifters absolutely. Daelin does, but they can't trust her. She has her sister's secrets to keep. *The Reader*: Daelin Long rises in the ranks of the Rifters. The rift closes for the season, and Daelin worries over her sister stuck on the other side. With the rift closed, the town should be quiet. Only, it's not. Dead people are coming to life, and those who should be around are missing. Daelin and the Rifters must figure out how to fight a monster without the energy of the rift to power their weapons.

The Tracer M. Pax,2018-03-13 The portal connecting Earth to other worlds reopens, and Daelin Long stands ready to rescue her sister. After a winter of strenuous training, she's prepared to battle the evil her sister warns against. Only, the rift is more unpredictable. The Mothman arrives whispering of death and transports Daelin to a land with seven moons. There,

she faces a monster that can exist in two universes at the same time. Refusing to believe her fate is sealed, Daelin searches for the way home. With only her staff, her wits, and an uninformed detective, she dares to lead the fight. Otherwise, her sister and Earth don't have a chance.

The Rogue Element M. Pax, 2018-04-10 Rogue versus world. Who will win? New planets, hidden lands, and places no one would dare dream of arise from the elements of earth, air, fire, and water. Visions of the future where we verge on extinction and only daring can forge hope. Alternative realms on Earth lead to darkness. The Rogue Element is: "Patchworker 2.0", "Corrosive", "The Vagaries of Eloise Stanton", and "The Wallows." Patchworker 2.0: Humanity is forced to live in domed cities as foul as the Earth we destroyed. Artificial Intelligence holds the remains of society together, and a special team of patchworkers keep the AI functioning at peak performance. Patchworker Evalyn Shore leads the investigation of a homicidal AI. The AI is taking over minds and leaving patchworkers as sacks of bio matter ready for recycling. Can Evalyn create the patch to repair the AI? Or will it kill her first? Corrosive: Which seeds will aid Bex in saving her world? On an Earth ruined by long-forgotten ancestors, Bex sets off to establish a new homestead with her ideal man. The fact he's a robot and has to do everything she says is a dream. For a day. When she arrives at the plot of land, where she and her dreambot will nurture the precious seeds she's been entrusted with, it's already occupied. By a man. With radical ideas as corrosive as the air. The Vagaries of Eloise Stanton: Lucy's family disappeared when she was a child, lost in a world of mirror. At every turn, she is confronted by images of her family in mirrors and panes of glass. Her experiments to bring them home continue to fail... until tonight. On the verge of at last being reunited, Lucy meets the woman who stands as the barrier between the two realms and the real battle begins. The Wallows: Ever wish for a new life? Evernee Weems wants to escape in this world in the worst way. Her daughter needs everything, the rent is being raised, Evernee's job barely pays minimum wage, and she has little hope for better. Inside a puddle is a different reality, and she jumps in, happy to trade her problems for a life in which worries don't exist. Will it turn out to be better?

The Initiate M. Pax, 2014-10-20 Book 2 in the Rifters series. A junction erupts between the worlds in Settler, Oregon, a rift from which horrors attack our world. The Rifters defend us. To trust unquestioningly is the first lesson Daelin Long must learn as the newest Initiate of the Rifters. Her first day is a disaster. She stands on a deserted street in a town smaller than a city district, courting killer rocks from another world with her ancestor from the Revolutionary War. Normal no longer exists. While she struggles, Earl Blacke grapples with atoning for his past ill deeds, running far and fast from Settler, Oregon. The Shaman of the Desert promises him redemption, and an old mine puts the possibility of a gold strike in his grasp. His luck has changed for the better, but he can't have both. You're never a hero until you are.

Semper Audacia M. Pax, 2015-11-04 Alone. Leda is the last living member of the brigade, the sole defender of her world. War took everyone she knew, leaving her in the company of memories and ghosts. Or is it madness? The siren blares. The

enemy is coming. Or is it? The approaching vessel isn't a friendly design, but it answers with the correct code. Leda must figure out whether the arrival is reinforcements or the final assault. In an aging flyer, she ventures out to meet her world's fate, the last stand.

The Rifters M. Pax, 2014-08-17 The Gold Rush trickles to a fool's quest and a string of stagecoach heists. In 1888, Earl Blacke decides to make a new start and become a better man. He escapes into the mountains, heading north. In the wilds of Oregon, a rift inside an ancient volcano opens and sends him into the future, into the present day. It also shaves forty years off his age, forty years to live over again and atone for what he's done. Starting over is hard to do. In current day New York, Daelin Long's dream job at a publishing house goes the way of the dinosaurs her sister chases. With no money and nowhere else to go, Daelin accepts the librarian position in her sister's dinky town in the middle of Oregon. Nestled inside ancient volcanic peaks, the town of Settler holds onto many secrets. Residents roam the streets with weirdly fashioned devices, and odd lights pulse in the night skies. People whisper of a phantom outlaw and start dying, murdered and missing their heads. On top of it all, Daelin's sister is missing, and Daelin doesn't know who to trust. Earl knows more than he's saying. He shares a notorious history with the phantom, one he'll see remains buried. Keeping Daelin's sister's secrets is his only chance at redemption, and the only way to keep this world safe. This first book in the series is free.

The Reader M. Pax, 2015-11-21 With the rift closed for the season and no more monsters to fight, Daelin Long gets bored as librarian in the podunk town of Settler, Oregon. A job interview and her brother's arrival present a tempting opportunity to escape, until her brother and her best friend, a ghost, disappear. While Daelin searches for them, more mysteries pile up: dead people coming back to life, portraits of the town founders replaced with strange white trees, and people on the other side of the rift returning. It's impossible. The portal that allows monsters from other universes to come to Earth is sealed until next summer. The Rifiers, a secret group protecting our world, believe the troubles are nothing more than the tantrums of an offended ghost. Daelin disagrees. If she's right, the evil hell-bent on destroying Earth has new technology making the rift more deadly. Before the monster summons the next apocalypse, Daelin must find it and destroy it. Book 3 in the Rifter series.

Ten Boys from History Kate Dickinson Sweetser, 2001-12 This volume contains boys of many lands and races whose

stories are told because each one achieved something noteworthy as a boy. Each boy's character, whether historic or legendary, courage was the marked trait. The stories of these ten boys were selected not because they later became famous men, but for what each accomplished as a boy.

Space Exploration on Film Paul Meehan, 2022-05-10 Over the course of several decades, scientific fact has overtaken science fiction as humankind's understanding of the universe has expanded. Mirroring this development, the cinematic depictions of space exploration over the last century have evolved from whimsical sci-fi fantasies to more fact-based portrayals. This book chronologically examines 75 films that depict voyages into outer space and offers the historical, cultural, and scientific context of each. These films range from Georges Melies' fantastical *A Trip to the Moon* to speculative science fiction works such as *2001: A Space Odyssey*, *Solaris*, and *Contact*, and fact-based accounts of actual space missions as depicted in *The Right Stuff*, *Apollo 13*, *Salyut 7* and *First Man*. Each film is analyzed not only in terms of its direction, screenplay, and other cinematic aspects but also its scientific and historical accuracy. The works of acclaimed directors, including Fritz Lang, George Pal, Stanley Kubrick, Andrei Tarkovsky, Robert Wise, Ron Howard, Robert Zemeckis, Ridley Scott, and Christopher Nolan, are accorded special attention for their memorable contributions to this vital and evolving subgenre of science fiction film.
