Pearl River James Vincent Cassetta,2014-09-15

Pearl River James Vincent Cassetta,2014-09-15 Pearl River was part of a royal land patent issued to two New York businessmen, Daniel Honan and Michael Hawdon. Honan, the accountant general of New Amsterdam, and Hawdon, a friend of the infamous Captain Kidd. Immigrants later settled in areas they called Naurausaun, Middletown, Pascack, Sickletown, Orangeville, and Muddy Brook. In the 1870s, Julius Braunsdorf permitted the New York & New Jersey Railroad to run an extension through his property, which gave his new sewing machine factory access to markets and materials. The factory would later be enhanced to produce the first newspaper-folding machines. In 1906, Dr. Ernst Lederle, a former New York health commissioner, began a laboratory to produce antitoxins and other medicines. With the success and growth of these inventors and their businesses, Pearl River became a nationally known company town. Since the opening of the Tappan Zee Bridge, it has evolved into a friendly, modern bedroom community of New York City and the second-largest hamlet in New York State.

This book is divided thematically into 4 parts. Part I introduces the unique geographical characteristics of the region. Part II focuses on environmental and landscape dynamics and the impacts of rapid economic development on the natural environment since 1978. Part III ponders on developmental issues, such as urbanization,

A review of major river basins and large lakes relevant to inland fisheries Ainsworth, R., Cowx, I.G., Funge-Smith, S.J., 2021-01-21 This review presents summary information on 45 river and great lake basins of the world, which support inland fisheries. The information presented is drawn from published information in peer-reviewed journals as well as grey literature. Each basin summary is presented in a common format, covering the description of the fishery, estimates of catch and numbers of people engaged in the fishery, important biodiversity features and threats to the fishery. An analysis of the replacement costs of inland fish of the basin is also presented. This is expressed in terms of the water, land and greenhouse gas footprint that would arise if the inland fish that are currently produced had to be replaced with other forms of food (such as aquaculture fish, livestock or field crops).
