**Regulatory Program of the United States Government** United States. Office of Management and Budget,1990

**Risk Communication for the Future** Mathilde Bourrier,Corinne Bieder,2018-06-27 The conventional approach to risk communication, based on a centralized and controlled model, has led to blatant failures in the management of recent safety related events. In parallel, several cases have proved that actors not thought of as risk governance or safety management contributors may play a positive role regarding safety. Building on these two observations and bridging the gap between risk communication and safety practices leads to a new, more societal perspective on risk communication, that allows for smart risk governance and safety management. This book is Open Access under a CC-BY licence.

**Risks and Challenges in Medical Tourism** Jill R. Hodges,Ann Marie Kimball,Leigh Turner,2012-07-06 A multidisciplinary international team examines the safety, ethics, and health implications of the emerging global market for health care, and the issues that arise when patients cross borders for medical procedures they cannot afford or access at home, from liposuction to kidney transplants. Risks and Challenges in Medical Tourism: Understanding the Global Market for Health Services provides an in-depth, comprehensive assessment of the benefits and risks when health care becomes a global commodity. The collection includes contributions from leading scholars in law and public policy, medicine and public health, bioethics, anthropology, health geography, and economics. This timely and informative handbook looks at medical tourism from the perspective of some of the major regions that send and receive medical tourists, including the United States, the European Union, Southeast Asia, and Latin America. Contributors examine how government agencies, medical tourism companies, international hospital chains, and other organizations promote medical tourism and the globalization of health care. The topics explored include the legal remedies available to medical tourists when procedures go awry; potential consequences when patients cross borders for medical procedures that are illegal in their home countries; the relationship of medical tourism to international spread of infectious disease; and the lack of adequate transnational policies and regulations governing the global market for health services.

**Air quality** Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2011-11-14 Dangerous levels of particulate matter (PM2.5 or PM10) and chemicals (such as NO<sub>2</sub>) in the air are contributing to tens of thousands of early deaths every year in UK cities. Yet the Committee found that Ministers appear to be actively trying to dilute safety standards to avoid EU fines. 30,000 deaths in the UK were linked to air pollution in 2008 - with 4,000 in London alone. But business plans produced by the Department for Transport and Defra do not even mention air quality - despite a commitment in the Coalition agreement to work towards full compliance with EU air quality standards. The Government will be able to pass EU fines for air pollution breaches to local authorities, subject to new procedures in the Localism Bill. However, this report raises a number of concerns about the ability of councils to tackle this problem without coordination and assistance from central Government and points out that the causes of poor air quality are often beyond an individual authority's control. The committee is calling on the Government to establish a national framework of low emissions zones to help local authorities reduce traffic pollution. It is also urging Ministers to launch a public awareness campaign to drive air quality up the political agenda. Under European Union air quality laws the daily pollution levels of PM10 must not be above the legal limit on more than 35 days in a year. By the 21 April 2011 London had already exceeded this year's target, according to the Campaign for Clean Air in London.

**Macprudential Banking Supervision & Monetary Policy** Luca Amorello, 2018-08-27 The European experience suggests that the efforts made to achieve an efficient trade-off between monetary policy and prudential supervision ultimately failed. The severity of the global crisis have pushed central banks to explore innovative tools—within or beyond their statutory constraints—capable of restoring the smooth functioning of the financial cycle, including setting macroprudential policy instruments in the regulatory toolkit. But macroprudential and monetary policies, by sharing multiple transmission channels, may interact—and conflict—with each other. Such conflicts may represent not only an economic challenge in the pursuit of

price and financial stability, but also a legal uncertainty characterizing the regulatory developments of the EU macroprudential and monetary frameworks. In analyzing the “legal interaction” between the two frameworks in the EU, this book seeks to provide evidence of the inconsistencies associated with the structural separation of macroprudential and monetary frameworks, shedding light upon the legal instruments that could reconcile any potential policy inconsistency.

Building Materials, Health and Indoor Air Quality Tom Woolley,2024-05-23 In Building Materials, Health and Indoor Air Quality: Volume 2 Tom Woolley uses new research to continue to advocate for limiting the use of hazardous materials in construction and raise awareness of the links between pollutants found in building materials, poor indoor air quality and health problems. Chapters in this volume reinforce previous arguments and present new ones covering: Further evidence of the health impacts of hazardous emissions from materials Hazardous materials to be avoided and why Fire and smoke toxicity - the Lakanal House and Grenfell Tower legacy Sub-standard retrofits leading to damp and mould in previously sound houses A critical review of recent reports from UK Government and others on air quality and health problems including policy changes on flame retardants Growing evidence of cancer risks and the failure of cancer research organisations to address these issues A critical review of recent climate change and zero carbon policies and a discussion on whether extreme energy efficiency is a good thing This book asks some important and, for some, uncomfortable questions, but in doing so it brings to light important areas for research and provides much needed guidance for architects, engineers, construction professionals, students and researchers on hazardous materials and how to reduce their use and design and build healthier buildings for all occupants.

*Smallholder Agriculture and Market Participation* Food and Agriculture Organization of the United Nations,2018-08-09

Smallholder Agriculture and Market Participation discusses the evolution of policies for smallholder development, including the role of value chains, and the linkages that exist with the Sustainable Development Goals. New, innovative financial mechanisms and linked initiatives are outlined, and their potential to improve the availability of financial services and reduce market transaction costs. Risk management for agricultural smallholders is covered, together with the increasing role of insurance as a mechanism for risk management among smallholders. Empirical data are used to illustrate the more conceptual work. The last part of the book provides case studies of selected commodity value chain investments involving smallholders in Africa (Ethiopia, Tanzania and Zimbabwe) and South America (Peru), implemented by FAO. The lessons concern project design and targeting, product and market analysis, regulatory issues, sustainability and improved natural resources management.

**Maternal Newborn Nursing Care** Mr. Rohit Manglik, 2024-07-30 Comprehensive coverage of prenatal, intrapartum, postpartum, and neonatal nursing care, focusing on patient-centered and evidence-based practices.

**Nutrition** Barbara A. Brehm, 2015-06-10 This thorough one-stop resource draws on solid science and the latest research to play a dual educational role—providing background for students while answering general readers' questions about a wide range of nutrition-related topics. Nutrition is a popular but often misunderstood topic, one about which there is a great deal of interest as evidenced by the plethora of available advice. Because nutrition is a key factor in health, it is important that the public have a source of information they can trust. This is that source: a comprehensive overview that will help readers make sense of conflicting information they find in the media regarding what is healthy and what is not. Organized alphabetically, the two-volume work covers the most important topics in human nutrition including nutrients, nutrition-related health concerns, aging and nutrition, eating disorders, and the value of dietary supplements. The digestive system and its organs are discussed, with particular attention to health issues such as irritable bowel syndrome and the role of helpful bacteria. The physiology of hunger and the psychology of appetite and eating behaviors are explained. The work also delves into data on foods that have been featured in recent research, such as garlic, ginger, and turmeric, and it offers consumers a clearer understanding of nutrition-related practices such as organic farming, genetically modified foods, and the use of food additives.

*Oxford Casebook of Forensic Psychiatry* Nigel Eastman, Gwen Adshead, Simone Fox, Richard Latham, Seán Whyte, 2023 Designed as a companion to the Forensic Psychiatry (Oxford Specialist Handbook), Second Edition, this new casebook complements the domains of both theory and practice put forward in the handbook, but also works as a standalone volume for those who wish to enhance their decision making in cases they may confront in their discipline. Organised into three sections, the casebook allows the practitioner to think through not only the technical medical aspects of real-life clinical cases, but also the legal and ethical aspects. Part A provides an introduction to the theory and practice of decision-making;

Part B presents cases across clinical, legal, and ethical domains; and Part C offers frameworks for critiquing decisions. This robustly discursive approach to a fact-based but also value-laden discipline enhances the opportunity to put knowledge into practice. The Oxford Casebook of Forensic Psychiatry expresses the concept that 'knowing is the only part of deciding', offering an essential practitioner's guide to decision making in clinical, forensic, and legal psychiatry.

**Water Quality Policy and Management in Asia** Cecilia Tortajada, 2014-10-14 Asia's 48 countries have an estimated 1.757 billion urban population and 2.4 billion people in rural areas (or approximately 60 per cent of the global population). Divided into central, eastern, southern, south-eastern and western regions, the continent is also extremely heterogeneous in terms of water quality conditions. The policies and management practices vary significantly from one country to another, and even within one country, depending on specific economic, political, social, environmental, legal and institutional factors. In order to appreciate the complexities associated with water quality policy and management, it is important to acknowledge the multiplicity of interrelated and often conflicting events, issues, actors and interests, both within and outside the water sector that impact them. This complexity, alongside institutional inability for systematic and coordinated collaboration, are potent reasons as to why, in the second decade of the 21st century, formulation and implementation of efficient water quality management policies benefitting humankind and the environment have still not been achieved. The book was originally published as a special issue of the International Journal of Water Resources Development.

**Nexus of Environmental Quality and Technology Innovation** Ahmadi, Ali, Mna, Ali, 2025-05-22 The intersection of environmental quality and technological innovation represents a critical nexus in sustainable development. As global challenges like climate change, pollution, and resource depletion increase, the role of technology in addressing these issues has become vital. Innovations ranging from clean energy solutions and smart agriculture to waste reduction technologies and environmental monitoring systems transform the way societies manage and protect natural ecosystems. This convergence may enhance environmental outcomes and drive economic growth and social well-being, making it a powerful catalyst for a more resilient and sustainable future. Nexus of Environmental Quality and Technology Innovation examines the challenges and solutions to technology innovation and its impact on business management. It addresses the barriers to strengthening environmental quality, technology innovation, and business management nexus in international evidence, and provides a clear roadmap for overcoming these hurdles. This book covers topics such as carbon emissions, green tourism, and sustainability, and is a useful resource for business owners, policymakers, economists, academicians, researchers, and environmental scientists.

*The National Underwriter*, 1918

**Handbook of Environmental Psychology and Quality of Life Research** Ghoulane Fleury-Bahi, Enric Pol, Oscar Navarro, 2016-08-12 This Handbook presents a broad overview of the current research carried out in environmental

psychology which puts into perspective quality of life and relationships with living spaces, and shows how this original analytical framework can be used to understand different environmental and societal issues. Adopting an original approach, this Handbook focuses on the links with other specialties in psychology, especially social and health psychology, together with other disciplines such as geography, architecture, sociology, anthropology, urbanism and engineering. Faced with the problems of society which involve the quality of life of individuals and communities, it is fundamental to consider the relationships an individual has with his different living spaces. This issue of the links between quality of life and environment is becoming increasingly significant with, at a local level, problems resulting from different types of annoyances, such as pollution and noise, while, at a global level, there is the central question of climate change with its harmful consequences for humans and the planet. How can the impact on well-being of environmental nuisances and threats (for example, natural risks, pollution, and noise) be reduced? How can the quality of life within daily living spaces (home, cities, work environments) be improved? Why is it important to understand the psychological issues of our relationship with the global environment (climatic warming, ecological behaviours)? This Handbook is intended not only for students of various disciplines (geography, architecture, psychology, town planning, etc.) but also for social decision-makers and players who will find in it both theoretical and methodological perspectives, so that psychological and environmental dimensions can be better taken into account in their working practices.

Sustainability in Coffee Production Andrea Biswas-Tortajada, Asit K. Biswas, 2015-06-12 Coffee, as a commodity and through its global value chains, is the focus of much interest to achieve fair trade and equitable outcomes for producers, processors and consumers. It has iconic cultural and economic significance for Colombia, which is one of the world's major coffee producers for the global market. This book examines sustainable coffee production in Colombia, specifically the initiatives of Nestlé to create shared value. It describes the transformation of the coffee landscape by the development of economically, socially and environmentally viable and dedicated supply chains. Suppliers have been encouraged to shift production and quality paradigms, in order to develop long-term and sustainable strategies for higher value and premium quality products. This has been partially achieved by establishing a robust partnership with the Coffee Growers Federation and other public, private and social actors, thereby taking control of the institutional architecture and knowledge base that exists in the country. The book provides an important lesson of corporate social responsibility and the creation of shared value for the benefit of farmers, corporations and consumers.
