Daughter of the Deep Rick Riordan, 2021-10-26 #1 New York Times best-selling author Rick Riordan pays homage to Jules Verne in his exciting modern take on 20,000 Leagues Under the Sea. Ana Dakkar is a freshman at Harding-Pencroft Academy, a five-year high school that graduates the best marine scientists, naval warriors, navigators, and underwater explorers in the world. Ana's parents died while on a scientific expedition two years ago, and the only family's she's got left is her older brother, Dev, also a student at HP. Ana's freshman year culminates with the class's weekend trial at sea, the details of which have been kept secret. She only hopes she has what it'll take to succeed. All her worries are blown out of the water when, on the bus ride to the ship, Ana and her schoolmates witness a terrible tragedy that will change the trajectory of their lives. But wait, there's more. The professor accompanying them informs Ana that their rival school, Land Institute, and Harding-Pencroft have been fighting a cold war for a hundred and fifty years. Now that cold war has been turned up to a full broil, and the freshman are in danger of becoming fish food. In a race against deadly enemies, Ana will make amazing friends and astounding discoveries about her heritage as she puts her leadership skills to the test for the first time. Rick Riordan's trademark humor, fast-paced action, and wide cast of characters are on full display in this undersea adventure that puts a new spin on Captain Nemo and the submarine Nautilus. Hollywood Presents Jules Verne Brian Taves, 2015-05-26 An “illuminating” look at how filmmakers have taken us around the world, under the sea, and to the center of the earth over the course of a century (Milwaukee Express). Even for those who have never read Jules Verne, the author’s very name conjures visions of the submarine in Twenty Thousand Leagues Under the Sea, the epic race in Around the World in Eighty Days, the spacecraft in From the Earth to the Moon, and the daring descent in Journey to the Center of the Earth. One of the most widely translated authors of all time, Verne has inspired

filmmakers since the early silent period and continues to fascinate audiences more than a century after his works were first published. His riveting plots and vivid descriptions easily transform into compelling scripts and dramatic visual compositions. In *Hollywood Presents Jules Verne*, Brian Taves investigates the indelible mark that the author has left on English-language cinema. Adaptations of Verne's tales have taken many forms—early movie shorts, serials, feature films, miniseries, and television shows—and have been produced as both animated and live-action films. Taves illuminates how, as these stories have been made and remade over the years, each new adaptation looks back not only to Verne's words but also to previous screen incarnations. He also examines how generations of actors have portrayed iconic characters such as Phileas Fogg and Captain Nemo, and how these figures are treated in pastiches such as *Journey 2: The Mysterious Island*. Investigating the biggest box-office hits as well as lower-budget productions, this comprehensive study will appeal not only to fans of the writer's work but also to readers interested in the ever-changing relationship between literature, theater, and film.

Command-Line Rust Ken Youens-Clark, 2022-01-13 Updated in 2024: A new version has been released that simplifies the programs used in the book, based on changes in the Rust language and crates since original publication. The code has been updated to reflect version 4 of the clap crate. For several consecutive years, Rust has been voted most loved programming language in Stack Overflow's annual developer survey. This open source systems programming language is now used for everything from game engines and operating systems to browser components and virtual reality simulation engines. But Rust is also an incredibly complex language with a notoriously difficult learning curve. Rather than focusing on the language as a whole, this guide teaches Rust using a single small, complete, focused program in each chapter. Author Ken Youens-Clark shows you how to start, write, and test each of these programs to create a finished product. You'll learn how to handle errors in Rust, read and write files, and use regular expressions, Rust types, structs, and more. Discover how to: Use Rust's standard libraries and data types such as numbers, strings, vectors, structs, Options, and Results to create command-line programs Write and test Rust programs and functions Read and write files, including stdin, stdout, and stderr Document and validate command-line arguments Write programs that fail gracefully Parse raw and delimited text manually, using regular expressions and Rust crates Use and control randomness

An Odyssey for Our Time Georgina Paul, 2013-11-10 In her 2007 poem cycle *Niemand's Frau*, Barbara Köhler returns to Homer's *Odyssey*, not to retell it, but to take up some of the threads it has woven into the cultural tradition of the West – and to unravel them, just as Penelope, the wife of the hero who called himself Nobody, unravelled each night the web she re-wove by day. Köhler's return to the *Odyssey* takes place under the sign of a grammatical shift, from 'er' to 'sie', from the singular hero to a plurality of female voices – Nausicaa, Circe, Calypso, Ino Leucothea, Helen and Penelope herself – with implications for thinking about identity, power and knowledge, about gender and relationality, but also about the corporeality and multivocality which underlies the 'virtual reality' of the printed text. The eight essays in this volume explore Köhler's

iridescent poem cycle from a variety of different angles: its context in contemporary German refigurations of the classical; its engagement with Homer and the classical tradition; its contribution to feminist philosophy of the subject and a female 'dialectic of enlightenment'; its incorporation of the voices of poetic predecessors; and the surprising alliance it uncovers between poetry and quantum theory.

In *Thirty Days in the Kingdom*, he relays his day-to-day experiences beginning on September 1, 2008, and continuing each day for the rest of the month. Following an inner urge to relive his childhood, Ferrell experiences the sights, sounds, rides, crowds, food, music, shows, characters, and more at this popular theme park. Engines of Empire Douglas R. Burgess Jr., 2016-05-04 In 1859, the S.S. Great Eastern departed from England on her maiden voyage. She was a remarkable wonder of the nineteenth century: an iron city longer than Trafalgar Square, taller than Big Ben's tower, heavier than Westminster Cathedral. Her paddles were the size of Ferris wheels; her decks could hold

four thousand passengers bound for America, or ten thousand troops bound for the Raj. Yet she ended her days as a floating carnival before being unceremoniously dismantled in 1889. Steamships like the Great Eastern occupied a singular place in the Victorian mind. Crossing oceans, ferrying tourists and troops alike, they became emblems of nationalism, modernity, and humankind's triumph over the cruel elements. Throughout the nineteenth century, the spectacle of a ship's launch was one of the most recognizable symbols of British social and technological progress. Yet this celebration of the power of the empire masked overconfidence and an almost religious veneration of technology. Equating steam with civilization had catastrophic consequences for subjugated peoples around the world. *Engines of Empire* tells the story of the complex relationship between Victorians and their wondrous steamships, following famous travelers like Mark Twain, Charles Dickens, and Jules Verne as well as ordinary spectators, tourists, and imperial administrators as they crossed oceans bound for the colonies. Rich with anecdotes and wry humor, it is a fascinating glimpse into a world where an empire felt powerful and anything seemed possible—if there was an engine behind it.

Walt Disney Jane Sutcliffe, 2009-01-01 Profiles the life and career of Walt Disney.

The Mouse Machine J. P. Telotte, 2010-10-01 Throughout Disney's phenomenally successful run in the entertainment industry, the company has negotiated the use of cutting-edge film and media technologies that, J. P. Telotte argues, have proven fundamental to the company's identity. Disney's technological developments include the use of stereophonic surround sound for *Fantasia*, experimentation with wide-screen technology, inaugural adoption of three-strip Technicolor film, and early efforts at fostering depth in the animated image. Telotte also chronicles Disney's partnership with television, development of the theme park, and depiction of technology in science fiction narratives. An in-depth discussion of Disney's shift into digital filmmaking with its Pixar partnership and an emphasis on digital special effects in live-action films, such as the *Pirates of the Caribbean* series, also highlight the studio's historical investment in technology. By exploring the technological context for Disney creations throughout its history, *The Mouse Machine* illuminates Disney's extraordinary growth into one of the largest and most influential media and entertainment companies in the world. Hardback is unjacketed.

The Ecopoetics of War Sylvain Belluc, Isabelle Brasme, Guillaume Tanguy, 2024-12-30 *The Ecopoetics of War* explores the interrelationality of human and nonhuman entities in the context of conflict, as recorded in literature and culture. This collection of essays demonstrates the specific and fertile role of literature in representations of war, as it foregrounds the manifold ways in which the borders between human and nonhuman—including flora, fauna, and technology—become porous, thus questioning traditional onto-epistemological and ethical categories. Bringing together British, American, and postcolonial studies, *The Ecopoetics of War* covers a variety of historical periods, geographical areas, and literary genres. Interdisciplinary in its outlook, it intertwines war studies, ecocriticism, literary theory, philosophy, and cultural studies. By analyzing the stylistic and discursive strategies devised by writers to translate the sensory experience of the battlefield, the

contributors shed light on the unique capacity of literature to foreground the entanglement of human and nonhuman in the context of armed conflict, and thus unveil an “ecopoetics of war.” This collection will interest scholars of literature, specialists of war studies and ecocriticism, and any reader interested in such issues such as ecowar, ecocide, the Anthropocene, or environmental justice. It can inspire interdisciplinary teaching or research projects, especially in the current context of global environmental crisis.

Gilgamesh to Gierach James W. White, 2024-08-02 Fish have figured profoundly in both human history and imagination for millennia. They are both gifts of the sea, drawing civilizations to the water, and terrors of the deep, holding revelations of the unconscious and the unknown. Today, fly fishing attracts millions looking to escape modern life and reconnect with some primal, meditative instinct to partake in nature’s offerings. *Gilgamesh to Gierach* is a collection of three hundred fishing, water, and fish tales spanning four millennia and numerous genres. More than a historical overview, White has distilled this immense topic into threads that flow through time, from legends and literature to nursery rhymes, poems, and humorous fish tales. Anglers will discover fly fishing’s ancient roots and spiritual seekers the fish’s religious and existential implications. Among the included voices are Homer, St. John, Ovid, Brendan the Navigator, Dame Juliana Berners, Shakespeare, Walton, Melville, Yeats, Thoreau, Hemingway, Rodrick Haig-Brown, and Norman Maclean. Whether told in full or, more often, condensed, these stories will leave the reader with a strong sense of the fish’s significance to many of the world’s greatest thinkers. Brimming with jokes, histories, simple folk tales, and great tragedies, this impressive work offers something for everyone.

Damn You, Entropy! Guy P. Harrison, 2024-06-04 Science fiction has hosted some of the greatest minds and most innovative thinkers in human history. From H.G. Wells to Octavia Butler, *Star Trek* to *Star Wars*, in books, on television, and at the movies, science fiction has shaped our future, pushed the limits of human imagination, and guided us within ourselves to examine universal truths of life. In this smartly curated book, author Guy P. Harrison collects 1,001 of the most influential and transformative quotations spanning four centuries of sci-fi, such as: “Better to make a good future than predict a bad one.”—Isaac Asimov, *Prelude to Foundation*, 1988 novel “Hope clouds observation.”—Frank Herbert, *Dune*, 1965 novel “No amount of money ever bought a second of time.”—*Avengers: Endgame*, 2019 film, written by Christopher Markus and Stephen McFeely Whether you are a Dr. Who superfan, a diehard sci-fi reader, or an outer space film buff—or are simply curious about the cosmos—*Damn You, Entropy!* is an essential addition to every science fiction fan’s library.

The Underwater Eye Margaret Cohen, 2022-04-12 In *The Underwater Eye*, Margaret Cohen tells the fascinating story of how the development of modern diving equipment and movie camera technology has allowed documentary and narrative filmmakers to take human vision into the depths, creating new imagery of the seas and the underwater realm, and expanding the scope of popular imagination. Innovating on the most challenging film set on earth, filmmakers have tapped the

emotional power of the underwater environment to forge new visions of horror, tragedy, adventure, beauty, and surrealism, entertaining the public and shaping its perception of ocean reality. Examining works by filmmakers ranging from J. E. Williamson, inventor of the first undersea film technology in 1914, to Wes Anderson, who filmed the underwater scenes of his 2004 *The Life Aquatic with Steve Zissou* entirely in a pool, *The Underwater Eye* traces how the radically alien qualities of underwater optics have shaped liquid fantasies for more than a century. Richly illustrated, the book explores documentaries by Jacques Cousteau, Louis Malle, and Hans Hass, art films by Man Ray and Jean Vigo, and popular movies and television shows such as *20,000 Leagues Under the Sea*, *Creature from the Black Lagoon*, *Sea Hunt*, the Bond films, *Jaws*, *The Abyss*, and *Titanic*. In exploring the cultural impact of underwater filmmaking, the book also asks compelling questions about the role film plays in engaging the public with the remote ocean, a frontline of climate change.

The Country You Have Never Seen Joanna Russ, 2007-07-01 In 1959, at the age of 22, Joanna Russ published her first science fiction story, "Nor Custom Stale," in *The Magazine of Science Fiction and Fantasy*. In the forty-five years since, Russ has continued to write some of the most popular, creative, and important novels and stories in science fiction. She was a central figure, along with contemporaries Ursula K. Le Guin and James Tiptree, in revolutionizing science fiction in the 1960s and 1970s, and her 1970 novel *The Female Man* is widely regarded as one of the most successful and influential depictions of a feminist utopia in the entire genre. *The Country You Have Never Seen* gathers Joanna Russ's most important essays and reviews, revealing the vital part she played over the years in the never-ending conversation among writers and fans about the roles, boundaries, and potential of science fiction. Spanning her entire career, the collection shines a light on Russ's role in the development of new wave science fiction and feminist science fiction, while at the same time providing fascinating insight into her own development as a writer.

Disney and His Worlds Alan Bryman, 1995 This work provides an overview of the Disney organization, in particular the theme parks and their significance for contemporary culture. The author examines topics such as Walt Disney's life and how his biography has been constructed, the Disney Company in the years after his death and various writings about the Disney theme parks. He raises important issues about the parks such as: whether they are harbingers of postmodernism; the significance of consumption at the parks; and the representation of past and future. The discussion of theme parks links with the presentation of Disney's biography and his organization by showing how central economic and business considerations have been in their development and how the significance of these considerations is typically marginalized in order to place an emphasis on fantasy and magic.
