IL MUSEO DI STORIA NATURALE dell'Università degli Studi di Firenze THE MUSEUM OF NATURAL HISTORY OF THE UNIVERSITY OF FLORENCE Volume V - The Anthropological and Ethnological Collections Jacopo Moggi Cecchi, Roscoe Stanyon, 2022

*The Italian Genius on Display* Francesco Barreca, 2022-07-04 Held in Florence in 1929, the First National Exhibition of History of Science was a pivotal event in the shaping of Italian cultural panorama. With more than 8000 items on display coming from public and private lenders, it showed the general public how rich the Italian scientific heritage was and how it could be regarded as part of a general nation-claiming narrative, thus laying the foundation for today's protection policy and scholarly research. Moreover, it is also a telling case-study that offers precious insights into the complex relationships between cultural enterprises and political power during the fascist era, helping us understand how today's geography of Italian cultural institutions have been shaped and reshaped through time.

*Il museo di storia naturale dell'Università di Firenze. Ediz. italiana e inglese* Mauro Raffaelli, 2009 The Natural History Museum of the University of Florence, founded in 1775 by Grand-Duke Pietro Leopold, is the oldest scientific museum in Europe. With this second volume on the Botanical Collection, Florence University Press continues its series dedicated to the six Sections of the Museum. The first part of the volume recounts the birth of botanical sciences in Florence and the history of the museum collections from sixteenth century to today. Then follows the second part which describes the historical and modern Herbaria, for each of which the main events that went to their formation, the importance of the plants they contain and biographical information on those who built the collections are described. The third section expounds the other collections in the Botanical Section of the Museum, among which of particular interest are the wax models of plants and fruits, manufactured by the old Grand-ducal Ceroplastics Laboratory, the wood collection, plaster of Paris mushrooms and the eighteenth century still life paintings of fruits and vegetables by Bartolomeo Bimbi. Finally, the last part illustrates the importance that herbaria play today in modern scientific research, drawing attention to the fact that they are an archive that holds taxonomical, chorological and ecological information in function of the plants they contain, as well as historical-biographical information on the scholars who, through their efforts, built up the collections.

Great White Sharks Preserved in European Museums Alessandro De Maddalena, 2009-03-26 The Author has condensed virtually everything that is known about the great white sharks that are preserved in European museums in this book. Available data of 105 great white sharks from 45 institutions is presented herein. Most material consists of taxidermied specimens and jaws. Most specimens with known capture locations come from the Mediterranean Sea. The majority of specimens are very old. The jaws belonging to the Biblioteca Ambrosiana in Milan, dated from at least 1640-1660, are the oldest white shark material preserved in Europe. The largest specimens of which parts are preserved in any European museum may be those of which skeletal parts are preserved in the Museo di Anatomia Comparata of Rome, Italy, and the Museo Zoologico La Specola of Florence, Italy. The cast of a 5.65 m female great white shark preserved in the Musée cantonal de Zoologie of Lausanne, is the world's largest that has been reconstructed directly from a whole specimen. The largest skin-mounted specimen is a 5.22 m female preserved in the Museo Civico di Storia Naturale of Trieste. The 1.50 m female preserved in the Senckenberg Forschungsinstitut und Naturmuseum of Frankfurt is the smallest taxidermied white shark preserved in Europe. The publication also includes a concise general account of white shark evolution, anatomy, physiology, reproduction, feeding, attacks on humans and fishery. Up-to-date literature references are included. Extensively researched, this encyclopedic account is enhanced by many photographs and drawings, that bring to life the extraordinary world of the great white shark. The ease of reading of the book and its thoroughness will make it a welcomed addition to any naturalist's library.

Organized by country and city within individual nations, entries include address ... telephone, fax, and e-mail numbers ... description of holdings and facilities ... museum director's name ... and more.

Curculionoidea II , 2013-08-05 Volume 8 of the Catalogue of Palaearctic Coleoptera provides a list of all taxa of the bulk of the family Curculionidae and of Cryptolaryngidae reported from the biogeographical realm covered. For the genus and

species-groups taxa all available names are given, and for the valid species and subspecies the distribution per country is shown, including more details for endemic taxa. Type species are listed for all genus-group names. The work is based on verification of the primary sources, and the respective references are given. Particular chapters deal with the actual impediments of taxonomy, nomenclatural and taxonomic problems, and corrections to previously published volumes of the Catalogue.
