Technologies in a Multilingual Environment Daria Bylieva, Alfred Nordmann, 2023-02-18 The book addresses the

challenge of living in a multilingual world from three perspectives: socio-linguistics and the study of multilingualism in contrast, philosophy of technology with its emphasis on the world as a technosphere—how it is made, how it is experienced, and how it can be managed, and then pedagogy and the question of teaching and learning to competently negotiate multilingual environments. In today's multicultural and multilingual world, technologies provide a common ground. The story of the technosphere as a multilingual environment offers new perspective, namely that of learning to cooperate and coordinate.

Classroom Practice and Teacher Cognition Nicholas Bradley, 2024-10-26 This collection occupies the middle ground between teachers showcasing their work and academics presenting research that is often situated in irreproducible, uncommon, or impractical classroom settings. The work presented here is provided by full-time university language educators who maintain a robust and active research agenda that focuses on their own classroom practice. Whether one wishes to label it under action research, exploratory practice, reflective practice or other, the findings of the research into their own practices and educational contexts are accessible and will resonate strongly with both practicing teachers and academics investigating classroom practice and teacher cognition. All articles are written with the aim of developing practice in a way that is recognisable to teachers and beneficial to their educational efforts. Indeed, recent literature calls for guidance to come from those actively engaged in classroom teaching and who apply sound research methods to the daily contexts lived by teachers and students.
