Construction Technology for Builders Glenn Costin, 2020-06-26 Construction Technology for Builders, 1e addresses requirements of the Certificate IV in Building and Construction (Building). The text addresses 14 competency units with learning activities and work sheets for downloading. The chapters are aligned to specific competency units, and the material in this text requires, and emphasises that the reader engage with Standards and Codes such as the NCC. Communication is a critical component of the building and construction process and the preparation of sketches and drawings is a vital part of that communication skill set; the text has a dedicated chapter on preparing building sketches and drawings. There are two chapters on structures, the first introducing the concepts underlying structural principles, and underpins the following chapter that applies this knowledge to the various elements of a building. Additional learning material, such as plans and specifications is provided in the Appendices to assist with the understanding of examples and exercises in the text.

Making Projects Work Lynda Bourne, 2015-02-12 This book provides a framework for understanding and managing factors required for achieving successful project and program outcomes. It presents guidelines to help readers develop an understanding of governance and its connection to strategy as the starting point for decisions on what work needs to be done. The book describes how to craft appropriate communication strategies to develop and maintain successful relationships with stakeholders. It highlights the strengths and weaknesses of existing project controls and outlines effective communication techniques for managing expectations and acquiring the support required for successful delivery.

Construction Company Management Abid Hasan, Asheem Shrestha, Kumar Neeraj Jha, 2024-09-23 Construction Company Management will give readers a detailed understanding of the critical aspects of managing a successful construction company in a dynamic and complex construction business environment characterised by intense competition, supply chain disruptions, and rapid changes in technology, regulations, client preferences, and market conditions. The book will introduce readers to different dimensions of construction company management. The topics covered reflect current business practices in the construction industry, including company strategy and business models, stakeholder management, contract management, resource management, risk management, knowledge management, company finance, digital innovation, organisational resilience, and the regulatory environment. The book also includes much-needed discussions on ethics, integrity and professional standards, and diversity, equity, and inclusion in construction companies. It explores the opportunities and challenges relevant to construction company management in global contexts with the help of case studies from different regions of the world. Providing a concise book on this essential subject, Construction Company Management serves both students and those educators who teach it in their built environment courses. Practitioners will find the theory-informed company management practices discussed in the book valuable and useful in their practical contexts.

Global Knowledge Cultures ,2007-01-01 Knowledge is about cultural power. Considering that it is both resource and product within the brave new world of fast capitalism, this collection argues for knowledge cultures that are mutually engaged and hence more culturally inclusive and socially productive. Globalized intellectual property regimes, the privatization of information, and their counterpoint, the information and creative commons movements, constitute productive sites for the exploration of epistemologies that talk with each other rather than at and past each other. Global Knowledge Cultures provides a collection of accessible essays by some of the world's leading legal scholars, new media analysts, techno activists, library professionals, educators and philosophers. Issues canvassed by the authors include the ownership of knowledge, open content licensing, knowledge policy, the common-wealth of learning, transnational cultural governance, and information futures. Together, they call for sustained intercultural dialogue for more ethical knowledge cultures within contexts of fast knowledge capitalism.
