Continuous Disclosure of Chinese Cross-Border Listed Companies in Australia Belle Qi Guo, 2023-10-04 This book studies an overarching question of the challenges faced by Chinese lawmakers, Chinese listed companies, Chinese companies' external advisers, and securities regulators in dealing with Chinese cross-border listed companies' continuous disclosure in Australia, and how can these challenges be addressed. Chinese listed companies are struggling to meet the continuous disclosure requirements while listing in Australia and have even been depicted as having poor corporate governance and transparency. Many get delisted from the securities market in Australia subsequently due to non-compliance in continuous disclosure or are straight rejected from listing because of continuous disclosure compliance concerns. This book cuts in from this angle and delves deep into the overarching question through the following four sub-questions: What are the theories and policies behind the continuous disclosure regimes in Australia and China and how have they been differently implemented in the securities markets in these two countries? What are the deficiencies, at the intracompany level, contributing to Chinese cross-border listed companies' non-compliant continuous disclosure in Australia? What are the limitations, from the perspective of external advisers' efforts, contributing to Chinese cross-border listed companies' non-compliant continuous disclosure in Australia? What are the difficulties, at the regulatory level, contributing to Chinese cross-border listed companies' non-compliant continuous disclosure in Australia? In addressing these questions and putting forward corresponding reform proposals, this book takes not only legal but also historical, cultural, and political-economic factors into consideration.

Bull Market The rise and eclipse of Australian stock exchanges John Tilston, 2016-02-22 Stock exchanges were crucial in developing Australia by greasing the often-creaking wheels of investment. Their spluttering into life in the 1880s was fractious and disorganized, but fledgling stockbrokers couldn't ignore the need for marketplaces to trade stocks and shares in the burgeoning mining industry. They struggled through the great economic distress of the Federation Drought in the 1890s and emerged as coherent, collegiate markets based in state capitals that endured for 80 years. Globalisation and technology disrupted the stock exchanges, forcing them to amalgamate and then become public company itself. Now global banks using technology to dominate the modern era. Dark pools and high frequency trading have the ASX scrambling to stay relevant. Yet it still holds some aces: transparent pricing guides and the scaffolding to support a range of investment

products. The book reviews the often turbulent history of what has become the ASX, highlighting the contribution of key individuals and events.

Building an EU Securities Market Eilís Ferran, 2004-11-25 This book considers some of the fundamental issues concerning the legal framework that has been established to support a single EU securities market. It focuses particularly on how the emerging legal framework will affect issuers' access to the primary and secondary market. The Financial Services Action Plan (FSAP, 1999) was an attempt to equip the community better to meet the challenges of monetary union and to capitalise on the potential benefits of a single market in financial services. It led to extensive change in securities market regulation: new laws; new law making processes, and more attention to the mechanisms for the supervision of securities market activity and legal enforcement. With the FSAP nearing completion, it is a good time to take stock of what has been achieved, and to identify the challenges that lie ahead.

Corporate Disclosure and Corporate Governance in China Jane Fu, 2010-01-01 Rapid economic development has focused attention from around the world upon China's corporate governance regime-particularly as, during the past few years, some of China's companies, mainly large, state-owned companies, have been aggressively buying foreign businesses overseas. China's huge capital injection and aggressive foreign investments have raised increasing and deep concerns among the target countries' governments, their business communities, and the global public. It is clearly of great importance that the people's Republic of China's business-partner countries understand corporate governance of many Chinese state-owned companies calls for a closer look at China's corporate governance theory and practice. The corporate disclosure regime plays a critical role in this regard. This timely and highly informative book provides, for the first time, comprehensive research on corporate governance in China, with detailed attention to the formation and reform of its corporate disclosure laws and

regulations. Among the many factors analyzed are the following: -the role of the government in the management of state-owned companies; -the legal and regulatory environment; -majority shareholders' infringement of listed companies' interests' -the increasing independence of the boards of directors; -the role of institutional investor; -the shareholding structure; -law enforcement and shareholders' legal actions; -unmonitored insiders' control of corporate affairs; -the external governance structure; and -the absence of fiduciary duty. The author describes the nature of the many breaches of disclosure laws and rules in the two decades or so of the history of China's securities market and the pressures within the relevant government agencies confronting the problem. As a detailed analysis of the Chinese corporate disclosure regime that has emerged during the period of China's economic transition since the 1990's, this incomparable book will be of great interest to legal researchers, policymakers, and legal practitioners working with business investments in China.

The Cambridge Handbook of Shareholder Engagement and Voting Harpreet Kaur,Chao Xi,Christoph Van der Elst,Anne Lafarre,2022-09-15 All over the world, companies play an important role in the economy. Different types of stakeholders hold the reins in these companies. An important class are the shareholders that finance the activities of these companies. In return, stakeholders have a say on how these companies should be organized and structure their activities. This is primarily done through voting and engaging. These mechanisms of voting and engaging allow the shareholders to decide significant aspects of the company structure, from who governs it to how much directors are paid. However, how

shareholders vote and engage and how far their rights stretch are organized differently in different countries. This pioneering book provides insights into what rights these shareholders have and how the shareholders of companies in nineteen different jurisdictions participate in corporate life through voting and engaging. Comparative and international in scope, it pays particular attention to how jurisdictions align and differ around the world.

German Corporate Governance in International and European Context Jean J. du Plessis, Bernhard Großfeld, Claus Luttermann, Ingo Saenger, Otto Sandrock, Matthias Casper, 2012-01-14 Corporate governance encompasses the free enterprise system, which is treated comprehensively in this book from a German perspective. This distinguishes the book from other books written in English in this subject area, not only because of the comprehensive way it covers German corporate law and corporate governance, but also because of the fact that it provides international and European perspectives on these important topics. This second edition is an extensively revised and updated version of the first edition, in particular with a view to the worldwide debt crisis. The authors provide readers with an overview of the unique features of German business and enterprise law and an in-depth analysis of the organs of governance of German public limited companies (general meeting, management board, supervisory board). In addition, approaches for reforms required at the international level are also suggested and discussed, including, among others, the unique interplay and dynamics of the German two-tier board model with the system of codetermination, referring to the arrangement of employees sitting on the supervisory boards of German public limited companies and private companies employing more than 500 employees; also covered are significant recent legal developments in Europe. The book highlights the core function of valuation and financial reporting at the international, European and German levels, with accounting as the documentary proof of good corporate governance. It also expands the scope of the first edition by a treatment of the German financial sector, global corporate finance and governance, and by including a new chapter on compliance of corporate governance laws, rules and standards in Germany. As far as comparative law is concerned, new developments in the area of corporate governance in the EU, the OECD Principles of Corporate Governance and corporate governance in the US, the UK and Australia are covered. The book is addressed to researchers, practitioners and basically anyone with an interest in the complex, but intriguing areas of

The Report: Papua New Guinea 2014 Oxford Business Group,2014-09-04 Papua New Guinea is poised for change, as the country's mineral riches are providing a major opportunity for economic development through the exploitation of natural resources. The government's five-year strategic plan focuses on key development enablers such as free education, improvements to health services, the strengthening of law and order, rural development projects and infrastructure construction. Inward investment has increasingly been driven by the extractive sector, including oil and gas, whose share of the country's total investment stock rose from 71% to 87% between 2004 and 2012. Statistics from the Investment Promotion

Authority reveal that the largest share of new foreign direct investment in 2013, some 24.6%, targeted the construction sector, outpacing that in financial services, manufacturing and mining, which accounted for 19.8%, 18.1% and 10.9%, respectively. While minerals and hydrocarbons dominate exports, around 85% of the country's population is employed in the agriculture sector. The start of liquefied natural gas exports in 2014 is expected to return the current account to a surplus in 2015, forecast as high as 12.1% of GDP before returning to 9.1% the following year. While the outlook for state revenues remains strong in the medium term, ensuring the sustainability of further spending increases will be key to preserving macroeconomic stability.

The Report: Papua New Guinea 2015 Oxford Business Group, 2016-09-17 In Papua New Guinea hopes are high that real change is on its way; the country's political, administrative, financial and technical leaders now have to find a way to ensure the most productive distribution and use of financial resources. Many international actors are watching closely to see how this young country negotiates its path. Papua New Guinea became a major exporter of gas in 2014 when the \$19bn PNG liquefied natural gas (LNG) project was completed ahead of schedule and within budget, significantly increasing the size and strength of the economy. The year ahead is likely to see PNG benefit from the further development of its hydrocarbons sector, fuelling the growth of its economy as a whole. The LNG influx also poses challenges, however, in terms of ensuring inclusive growth and productive use of the new revenues. PNG takes pride in being a final frontier of natural and cultural development, but the task ahead is to protect the country's heritage while becoming part of the global economy.
