However, I often see where those who are dealing with financing (banks and investment houses for bonds) use the MM for millions of dollars. That being said, I think the most appropriate usage is using one alpha symbol consistently so that ... *Is it proper to state percentages greater than 100%?* [closed] People often say that percentages greater than 100 make no sense because you can't have more than all of something. This is simply silly and mathematically ignorant. A percentage is just a ratio between two numbers. There are many situations where it is perfectly reasonable for the numerator of a fraction to be greater than the denominator. **Correct use of "circa" - English Language & Usage Stack Exchange** Aug 11, 2011 · I understand the use of circa / c. as it applies to approximating dates. However, I have a writer who (over)uses the word in other contexts. Examples: ... from circa early 1990s up until circa 8 y... *Does a percentage quantity take singular or plural verb* ... The above Ngram search would suggest that a one hundred has always been less frequently used in written language and as such should probably be avoided. Your other suggestion of by one ... **Should it be 10 US\$ or US\$ 10? - English Language & Usage ...** May 21, 2011 · Which is correct to use in a sentence, 10 US\$ or US\$ 10. Perhaps USD should be used instead or even something else? *proverbs - Is there an English equivalent of the Hindi saying "sau ...* Mar 15, 2016 · In Hindi language, there is a prevalent saying: sau chuhe maar billi haj ko chali which, if directly translated into English, becomes After killing/eating 100 mice, the cat goes on a pilgrimage I **Why is "a 100% increase" the same amount as "a two-fold** ... Nov 15, 2012 · 24 Yes, the correct usage is that 100% increase is the same as a two-fold increase. The reason is that when using percentages we are referring to the difference between the final amount and the initial amount as a fraction (or percent) of the original amount. **How to write numbers and percentage? - English Language** May 20, 2019 · [Relevant examples;] 1% [;] 45% [;]

100% In discussions involving infrequent use of numbers you may spell out a percentage or an amount of money if you can do so in three words or fewer (five dollars, forty-five percent, two thousand dollars, sixty-eight cents).
