Programas pioneros de administración de empresas en Bogotá Pérez Gómez, Carlos Hernán, 2012-09-10 Esta obra se delimita a la ciudad de Bogotá, donde se observó un desarrollo pronunciado en la pasada centuria a raíz de la implementación del modelo de urbanización que ve su auge luego de la década que comprendió los años cincuenta. Se observa cómo el cambio que se da en el país en la primera mitad del siglo XX va a transformar la actividad empresarial de manera notoria y cómo se materializa y consolida el desarrollo empresarial, lo que hace necesaria la formación de administradores para la conducción de las organizaciones de los sectores empresariales que evolucionaron en las principales ciudades del país. Este texto reúne información de diversas fuentes y archivos universitarios y de instituciones públicas y privadas, y presenta los orígenes de los programas de administración de las universidades objeto de estudio; asimismo relaciona las convergencias y divergencias de las escuelas y facultades de administración pioneras en la formación de administradores de empresas, tanto en cuanto a temas administrativos de las instituciones como sobre los programas de formación, mediante la exposición de los planes de estudio. El estudio permite también caracterizar los estudiantes y profesores que contribuyeron a la formación administrativa de carácter profesional en las universidades que fueron objeto de investigación. Todo lo anterior se materializa en las conclusiones de la obra, misma que constituye un primer intento por reconocer los fundamentos de creación de los programas de administración de empresas en Colombia y presentar los pioneros de la educación profesional en materia administrativa. Sociología jurídica e infancia Laura Lora, 2023-03-01 Los capítulos de este libro trazan panoramas de la sociología jurídica con la finalidad de mantener actualizado el conocimiento respecto de las relaciones sociales que están en continua transformación. Se considera a la sociología jurídica como la disciplina que estudia al derecho desde el punto de vista de la acción social, y a esta como una acción comunicativa –en este sentido se une tanto lo macro como lo microsociológico del derecho–. La atención se corre del objeto en sí a sus particulares manifestaciones. Asimismo, el libro aborda temas especializados sobre sociología jurídica tales como son el acceso a la justicia y el género en relación con la infancia, que han sido estudiados a partir de las experiencias y prácticas de profesionales especializados en lo jurídico, lo político, lo sociológico y el psicoanálisis. Incluye trabajos elaborados por los integrantes del Proyecto Ubacyt titulado “Los conflictos socio-jurídicos en torno a la infancia”, junto a estudios y perspectivas psicoanalíticas de estos temas. Cuenta también con textos de Vincenzo Ferrari, un relevante académico italiano, cuya trayectoria internacional de investigación y de docencia en el campo de las ciencias sociales –especialmente la filosofía y la sociología jurídica–, además de sus vínculos académicos con la comunidad de la Facultad de Derecho de la Universidad de Buenos Aires, fueron reconocidos mediante la distinción del título de doctor honoris causa.

Agua segura como derecho humano María Cristina Garros, Elizabeth Safar, 2020-06-01 Cuidar el agua es una responsabilidad de todos y debe ser un eje fundamental en las políticas de Estado, además de estar en el centro de la discusión de los distintos organismos nacionales e internacionales. Este libro nace como iniciativa de los miembros del Instituto de Derecho Ambiental y de la Sustentabilidad (IDEAS) de la Universidad Católica de Salta y se trata de una obra de múltiples autores que desde sus diferentes especialidades realizan un aporte significativo ante esta crisis vital que atraviesa nuestro siglo. Sin agua, el mundo es insostenible, con estas palabras de Néstor Cafferatta sintetizamos el contenido del volumen, en donde se exponen diferentes perspectivas sobre la importancia del agua para todos los seres vivos, para la preservación de la naturaleza en su conjunto y para la integridad del medio ambiente. Por otro lado, en él se afirma contundentemente que la disponibilidad del agua segura o potable es un derecho humano ya que de ella dependen la calidad y nivel de vida de los seres humanos, su salud, su bienestar y su crecimiento. Siendo esta la situación, nos dice Graciela Ayala Flores: El agua brota como el mayor conflicto geopolítico del siglo XXI, ya que se espera que en el 2025 la demanda de este elemento tan necesario para la vida humana será un 56 % superior que el suministro.
