

Fiction S About Mental Health

Peter Clough, Dan Goodley, Rebecca Lawthom, Michelle Moore

Facts and Fictions in Mental Health Hal Arkowitz, Scott O. Lilienfeld, 2017-01-25 Written in a lively and entertaining style, *Facts and Fictions in Mental Health* examines common conceptions and misconceptions surrounding mental health and its treatment. Each chapter focuses on a misconception and is followed by a discussion of related findings from scientific research. A compilation of the authors' *Facts and Fictions* columns written for *Scientific American Mind*, with the addition of six new columns exclusive to this book. Written in a lively and often entertaining style, accessible to both the undergraduate and the interested general reader. Each chapter covers a different fiction and allows readers to gain a more balanced and accurate view of important topics in mental health. The six new columns examine myths and misconceptions of considerable interest and relevance to undergraduates in abnormal psychology courses. Introductory material and references are included throughout the book.

Clinical Fictions Jeffrey Berman, 2025-07-14 *Clinical Fictions: Psychoanalytic Novelists and Short Story Writers* is the first book to explore works of fiction written by prominent psychoanalysts. Broken down into thematic sections, the book traces the literary output of pioneering psychoanalysts such as Julia Kristeva, Bruce Fink, Thomas Odgen, and Gregorio Kohon, among others. Berman looks at works of historical fiction, detective fiction, and the short story, and shows how recurring themes typical of these genres can be understood both psychoanalytically and through a literary lens. The works included investigate experiences of childhood adversity, life in dystopian societies, experiences of psychosis, bodily autonomy, personal loss and, above all, trauma. Unpacking these themes, and their depiction through fiction, Berman gives the reader the tools to apply psychoanalytic literary theory to further works. Interweaving his personal correspondence with authors, including a heartwarming exchange with Cliff Wilkerson, Berman offers unparalleled access to the inner workings of the writers' minds. This book will be of interest to students and researchers using psychoanalytic literary theory, as well as mental health practitioners who are interested in the intersections between literature and psychoanalysis and discovering new ways of probing the unspoken and unconscious.

Fictions of Home Martin Mühlheim, 2018-04-23 This study aims to counter right-wing discourses of belonging. It discusses key theoretical concepts for the study of home, focusing in particular on Marxist, feminist, postcolonial, and psychoanalytic contributions. The book also maintains that postmodern celebrations of nomadism and exile tend to be

incapable of providing an alternative to conservative, xenophobic appropriations of home. In detailed readings of one film and six novels, a view is developed according to which home, as a spatio-temporal imaginary, is rooted in our species being, and as such constitutes the inevitable starting point for any progressive politics.

Useful Fictions Michael Austin, 2010-01-01 'We tell ourselves stories in order to live,' Joan Didion observed in *The White Album*. Why is this? Michael Austin asks, in *Useful Fictions*. Why, in particular, are human beings, whose very survival depends on obtaining true information, so drawn to fictional narratives? After all, virtually every human culture reveres some form of storytelling. Might there be an evolutionary reason behind our species' need for stories? Drawing on evolutionary biology, anthropology, narrative theory, cognitive psychology, game theory, and evolutionary aesthetics, Austin develops the concept of a 'useful fiction,' a simple narrative that serves an adaptive function unrelated to its factual one. In his work we see how these useful fictions play a key role in neutralizing the overwhelming anxiety that humans can experience as their minds gather and process information. Rudimentary narratives constructed for this purpose, Austin suggests, provided a cognitive scaffold that might have become the basis for our well-documented love of fictional stories. Written in clear, jargon-free prose and employing abundant literary examples—from the Bible to *One Thousand and One Arabian Nights* and *Don Quixote* to *No Exit*—Austin's work offers a new way of understanding the relationship between fiction and evolutionary processes—and, perhaps, the very origins of literature.

Mediating Mental Health Michael Birch, 2016-04-29 The problem of media representations about mental health is now a global issue with health agencies expressing concern about produced stigma and its outcomes, specifically social exclusion. In many countries, the statistic of one in four people experiencing a mental health condition prevails, making it essential that more is known about how to improve media portrayals. With a globally projected increase in mental health conditions *Mediating Mental Health* offers a detailed critical analysis of media representations in two phases looking closely at genre form. The book looks across fictional and factual genres in film, television and radio examining media constructions of mental health identity. It also questions the opinions of journalists, mental healthcare professionals and people with conditions with regard to mediated mental health meanings. Finally, as a result of a production project, people with conditions develop new images making critical contrasts with dominant media portrayals. Thus, useful and practical recommendations for developing media practice ensue. As such, this book will appeal to mental health professionals, people with conditions, journalists, sociologists, students and scholars of media and cultural studies, practitioners in applied theatre, and anyone interested in media representations of social groups.

Fictions of Dementia Susanne Katharina Christ, 2022-09-20 Taking its cues from both classical and post-classical narratologies, this study explores both forms and functions of the representation of dementia in Anglophone fictions. Initially, dementia is conceptualised as a narrative-epistemological paradox: The more those affected know what it is like to have

dementia, the less they can tell about it. Narrative fiction is the only discourse that provides an imaginative glimpse at the subjective experience of dementia in language. The narratological modelling of four 'narrative modes' elaborates how the paradox becomes productive in fiction: Depending on the narrative perspective taken, but also on the type of narration, the technique for representing consciousness and the epistemic strategy of narrating dementia, the respective narrative modes come with different prerequisites and possibilities for narrating dementia. The analysis of four contemporary Anglophone dementia fictions based on the developed model reveals their potential functions: Fiction allows readers to learn about the challenges of dementia, grants them perspective-taking, it trains cognitive flexibility, and explores the meaning of memory, knowledge, narrative and imagination, and thus also offers trajectories of a cultural coping with dementia.

Mental Health Symptoms in Literature since Modernism Nicolas Pierre Boileau, 2023-09-22 *Mental Health Symptoms in Literature since Modernism* looks at various ways of treating symptoms of psychological disorders in the literature of the long twentieth century. This book shows that literature can, in its questioning of commonly accepted views of this lived experience of psychic symptoms, help engender new theories about the functioning of subjective cases. Modernism emerged at about the same time as Freudian psychoanalysis did and the aim of this book is to also show that to a certain extent, Woolf preceded Freud in her exploration of the symptom and contributed to fashioning another approach that is now more common, especially in writers from the 1990s-onwards.

Stories We've Heard, Stories We've Told Jeffrey A. Kottler, 2015 If you ask someone the question, Tell me a story that changed your life, there will almost certainly be a thoughtful pause before a huge grin emerges. Everyone's life has been guided and impacted by stories, beginning with the earliest fables and nursery rhymes our parents used to instill moral values to the last time you wanted to illustrate a point in a meeting or get a laugh out of a friend over dinner. Storytelling is a uniquely human activity, among our first and most enduring forms of communication. This is a book about the meaning of stories in people's lives, especially those that have produced enduring changes in their values, behavior, lifestyle, and worldview. Carefully documented and supported by research from the social sciences, as well as from neurobiology, the humanities, media studies, and arts, Jeffrey Kottler will explore how and why stories are so powerfully influential in people's lives, especially those that lead to major life transformations.

Reporting Mental Illness in China Guy Ramsay, 2020-10-29 This book examines how Chinese-language newspapers across greater China report on severe mental illness, and why they do so in the ways they do, given that reporting in local newspapers can strongly influence how Chinese readers view the illness. By assessing how the reporting in three leading broadsheet newspapers from mainland China, Hong Kong, and Taiwan constructs the illness, the book considers how the distinct social and political histories of the three culturally Chinese communities shape the reporting, and whether it bears out or contests the intense stigma against the illness that prevails locally. The findings can usefully encourage and inform attempts to humanise, include, and empower those with a severe mental illness across greater China and the global Chinese diaspora. Employing a well-tested, transparent discourse analytic approach, the book also includes numerous Chinese-English bilingual news report extracts to illustrate its claims. As such, Reporting Mental Illness in China will be of interest to sinologists, discourse analysts, mental health professionals and public health authorities across the globe, especially in places where there are large Chinese-speaking populations.

Smashing Stigma Connie Goldsmith, 2023-09-05 Stigma is everywhere around us. People may mistrust the unhoused or discriminate against those suffering from an addiction. They may change the way they interact with someone after witnessing

a panic attack from anxiety or PTSD. Or they may judge others for their appearance and their weight. Stigma leads to harmful stereotypes, prejudice, and discrimination. It can keep people from seeking the help and support they need. They may internalize others' stigma and start to blame themselves for their condition or experiences. In some cases, the effects of stigma can even be life threatening. Even with so many examples, it can be difficult to identify stigma in real time and even harder to work against it. But learning about common types of stigma can help to reduce them. Author and registered nurse Connie Goldsmith covers six stigmatized conditions—poor mental health, addiction, homelessness, relationship abuse, PTSD, and above average weight—to help you understand what stigma looks like and how it affects real people. Discover how you can dismantle stigma and work to reduce stereotypes, prejudice, and discrimination.

Deconstructing Stigma in Mental Health Canfield, Brittany A.,Cunningham, Holly A.,2018-05-11 Stigma continues to play an integral role in the multifaceted issues facing mental health. While identifying a clear operational definition of stigma has been a challenge in the field, the issues related to stigma grossly affect not only the mental health population but society as a whole. Deconstructing Stigma in Mental Health provides emerging research on issues related to stigma as a whole including ignorance, prejudice, and discrimination. While highlighting issues such as stigma and its role in mental health and how stigma is perpetuated in society, this publication explores the historical context of stigma, current issues and resolutions through intersectional collaboration, and the deconstruction of mental health stigmas. This book is a valuable resource for mental health administrators and clinicians, researchers, educators, policy makers, and psychology professionals seeking information on current mental health stigma trends.

How Stories Change Us Elaine Reese,2024-10-04 In How Stories Change Us, Elaine Reese integrates the latest scientific research on stories from fiction (books, TV shows and movies, videogames) with stories from real life (our personal experiences, including on social media) across the lifespan. The book offers an authoritative yet accessible overview of the new interdisciplinary science of stories, told by a developmental psychologist and autobiographical memory expert with over thirty years of experience conducting research on stories. Reese synthesizes cutting-edge research for an interdisciplinary audience, offers practical tips for parents, teachers, librarians, and policymakers, and she advocates for a more integrated science of stories to allow us to better choose the stories we consume and tell.

The Routledge Handbook of Health Communication and Popular Culture Christina S. Beck,2024-12-23 The Routledge Handbook of Health Communication and Popular Culture offers rich insights into the ways in which communication about health through popular culture can become a part of healing, wellness, and health-related decisions. This Handbook allows readers to understand and consider messages that inform and influence health-related choices through pop culture in the public sphere. Written in an accessible narrative style and including interdisciplinary, global, and diverse perspectives, a vast team of contributing authors from the field explores the intersections between health communication and

popular culture. The Handbook is divided into five parts: Framing of Health-Related Issues in Popular Culture; Exploring Popular Culture Influences on Health Behaviors and Beliefs; Considering Pro-Social Public Health Interventions in Popular Culture; Understanding Health Issues in Popular Culture from Diverse Perspectives; and Pop Culture and Health Communication: Looks to the Future. The Handbook will be of interest to students and scholars in the fields of Communication Studies, Health Communication, Public Health Policy, Media Literacy, and Cultural Studies.

Mass Media and Violence David Lange, Robert K. Baker, Sandra Ball-Rokeach, 1969 Report of the Task Force on Mass Media and Violence.

Researching Life Stories Peter Clough, Dan Goodley, Rebecca Lawthom, Michelle Moore, 2004-04-29 Researching Life Stories critically and pragmatically reflects upon the use of life stories in social and educational research. Using four life stories as examples, the authors apply four different, practical approaches to demonstrate effective research and analysis. As well as examining in detail the four life stories around which the book is written, areas covered include: * Method and methodology in life story research * Analysis * Reflections on analyses * Craft and ethics in researching life * Policy, practice and theory in life story research. Throughout the book the authors demystify the issues surrounding life story research and demonstrate the significance of this approach to understanding individual and social worlds. This unique approach to life story research will be a valuable resource for all social science and education researchers at undergraduate and postgraduate level.

Gay Conversion Practices in Memoir, Film and Fiction James E. Bennett, Marguerite Johnson, 2024-06-13 For over half a century, organizations and individuals promoting ex-gay, conversion and/ or reparative therapy have pushed the tenet that a person may be able to, and should, alter their sexual orientation. Their so-called treatments or therapies have taken various forms over the decades, ranging from medical (including psychiatric or psychological) rehabilitation approaches, to counselling, and religious healing. Gay Conversion Practices in Memoir, Film and Fiction provides an in-depth exploration of the disturbing phenomenon of gay conversion 'therapy' and its fictional and autobiographical representations across a broad range of films and books such as *But I'm a Cheerleader!* (1999), *This is What Love in Action Looks Like* (2011) and *Boy Erased* (2018). In doing so, the volume emphasizes the powerful role the arts and media play in communicating stories around conversion practices. Approaching the timely and urgent subject from an interdisciplinary perspective, contributors utilize film theory, queer theory, literary theory, mental health and social movement theory to discuss the medicalization and pathologizing of queer people, the power of institutions ranging from church, psychiatry and family (sometimes in alliance), and the real and fictional voices of survivors.
