*The Penguin Book Of South African Sports Trivia* David O'Sullivan, 2012-09-24 David O'Sullivan and Kevin McCallum are passionate about sport. They are fascinated by its vivid characters, heart-stopping moments and its endless drama. Over years of watching, reading and reporting on great sporting events, they have amassed a wealth of knowledge. After much deliberation, debate and pursuit of famous sports stars for personal anecdotes, they have produced this book: a fascinating collection of trivia and behind-the-scenes stories about South African sport over the years. The Penguin Book of South African Sports Trivia is the perfect companion for sports fanatics or people who just want to show off in front of their sports-mad mates. Do you know: which one-eyed Norwegian captained the South African cricket team; why Percy Montgomery punched Butch James before the Rugby World Cup in 2007; how Thabo Mbeki was responsible for the first loss the West Indian cricket team suffered on their tour of England in June 1966; which kwaito star has a father famous for his exploits in showjumping; how Madonna helped to kick-start Gary Kirsten's international cricket career; what Jomo Sono did during his wedding reception; why Pieter Hendriks' try in the opening match of the 1995 Rugby World Cup should never have been awarded. Find out the answers to these questions and hundreds more to impress your friends with your extraordinary knowledge of South African sport.

**Racing Green** Kit Chapman, 2022-03-03 Racing Green is the story of how motorsport science has become smarter and more environmentally friendly, and how these developments on the track are changing the world. Motor racing is one of the world's most watched sports. In the United States alone, NASCAR has over 75 million fans and counting. It's also the most scientifically demanding sport on Earth, requiring a combination of peak physical and mental skill, world-class engineers and a constant drive for technological innovation. Racing Green explores the science that has been translated from racing to the road, from the early 19th century through to innovations such as electric cars and autonomous vehicles. The history of motor racing, both its glories and its tragedies, led to some of the most important modern developments we see in car design today. Just as the heartbreaking death of Dale Earnhardt at the Daytona 500 led NASCAR to introduce a new raceway barrier method, ideas pioneered during races – such as crush zones to crash helmets – have been incorporated into race car and track designs around the world. Cleaner technologies first trialed and improved in modern racing are also shaping our communities beyond the track, from the hidden aerodynamics in everything from your grocery aisle to Apple's new \$5 billion headquarters to a Porsche made from flax and tires made from dandelions. Through exclusive interviews with NASCAR's Research and Development Center, Formula 1 insiders, engineers, scientists and drivers, lifelong motorsport fan Kit Chapman goes behind the scenes of the current breakthroughs to show where motorsport is likely to take us in the future, picking up extraordinary tales along the way, such as the Ohio State University's experimental electric car, the Buckeye Bullet, which broke the electric land speed record on the salt flats in Utah, hitting an astounding 340 mph, and the untold story of how motorsport used its unparalleled mechanical expertise to help during the COVID-19 pandemic. Racing Green is a mix of travelogue and historical retrospective, combining visits to the experts and discussing the science with retellings of real-life incidents that represent milestones in shaping the modern world

**SPORTOPOLI** Antonio Giangrande, E' comodo definirsi scrittori da parte di chi non ha arte né parte. I letterati, che non siano poeti, cioè scrittori stringati, si dividono in narratori e saggisti. E' facile scrivere "C'era una volta...." e parlare di cazzate con nomi di fantasia. In questo modo il successo è assicurato e non hai rompiballe che si sentono diffamati e che ti querelano e che, spesso, sono gli stessi che ti condannano. Meno facile è essere saggisti e scrivere "C'è adesso...." e parlare di cose reali con nomi e cognomi. Impossibile poi è essere saggisti e scrivere delle malefatte dei magistrati e del Potere in generale, che per logica ti perseguitano per farti cessare di scrivere. Devastante è farlo senza essere di sinistra. Quando si parla di veri scrittori ci si ricordi di Dante Alighieri e della fine che fece il primo saggista mondiale. Le vittime, vere o presunte, di soprusi, parlano solo di loro, inascoltati, pretendendo aiuto. Io da vittima non racconto di me e delle mie traversie. Ascoltato e seguito, parlo degli altri, vittime o carnefici, che l'aiuto cercato non lo concederanno mai. "Chi non conosce la verità è uno sciocco, ma chi, conoscendola, la chiama bugia, è un delinquente". Aforisma di Bertolt Brecht. Bene. Tante verità soggettive e tante omertà son tasselli che la mente corrompono. Io le cerco, le filtro e nei miei libri compongo il puzzle, svelando l'immagine che dimostra la verità oggettiva censurata da interessi economici ed ideologie vetuste e criminali. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italiani. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Trajectories of Translation Kobus Marais, 2023-06-23 This book builds on Marais's innovative A (Bio)Semiotic Theory of Translation to explore the implications of this conceptualization of translation as the semiotic work from which social-cultural reality emerges and chart the way forward for applications in empirical research. The volume brings together some of the latest developments in biosemiotics, social semiotics and Peircean semiotics with emergent work in translation studies towards better understanding the emergence of trajectories in society-culture through semiotic processes. The book further develops lines of thinking around thermodynamics in the work of Terrence Deacon to consider the ways in which ideas emerge from matter, creating meaning, and its opposites, namely the ways in which ideas constrain matter. Marais links these theoretical strands to empirical case studies in the final three chapters towards operationalizing these concepts for further empirical work. This book is aimed at academics in the fields of translation studies, semiotics, multimodal/multimedial studies, cultural studies and development studies. It will also be applicable to postgraduate students in these fields.
