Common and Uncommon Quotes: A Theory and History of Epigraphs Jared A. Griffin, 2023-03-07 'Common and Uncommon Quotes: A Theory and History of Epigraphs' is a prolegomenon to the study of epigraphic paratextuality. Building on the work of Gerard Genette's paratextual studies, this volume contextualizes and traces the practice of epigraphy in Anglophone literary history, from the fifteenth to the early twentieth century. This study explores how epigraphs are used by author-functions as a hermeneutic for their text and to establish ethos with their audience, and how that paratextual relationship changed as publishing opportunities and literacy rates grew over four centuries. The first broad-reaching study of this kind, 'Common and Uncommon Quotes' seeks to understand how epigraphs work: through their privilege on the page, their appeal to conjured ideas of the past, and their calls to citizenship.

**Islam, Nationalism, and 1000 Years of European Poetry** David Aberbach, 2025-08-29 *Islam, Nationalism, and 1000 Years of European Poetry* considers the long history of Islam and European poetry and its central importance in the development of European culture. David Aberbach offers a panoramic history of European poetry as it was affected by the centuries-long conflict between Islam and Christianity, from the early-medieval Old French *chanson de geste*, *The Song of Roland*, set against the Muslim invasion of France in the eighth century, to Fishta's *The Highland Lute*, the early-twentieth-century Albanian epic of the struggle for independence from Ottoman rule, achieved in 1912. Aberbach surveys some of the outstanding poetry set against Islamic conquests and domination, particularly in Spain and the Balkans. The book includes detailed comparisons between medieval and modern Arabic and Hebrew poetry, closely linked in technique and subject matter, but moving apart after 1789. A result of constant religious warfare in Europe was disillusionment with religion, increasing focus on humanistic concerns, and the evolution of a secular State separate from religion. This captivating history of Islam and European poetry will be of great interest to any scholars of nationalism, Jewish and Islamic Studies, history, comparative literature, and cultural studies.

**A Dictionary of the English Language: an Anthology** Samuel Johnson, 2006-11-30 Samuel Johnson's Dictionary, published in 1755, marked a milestone in a language in desperate need of standards. No English dictionary before it had devoted so much space to everyday words, been so thorough in its definitions, or illustrated usage by quoting from Shakespeare and other great writers. Johnson's was the dictionary used by Jane Austen and Charles Dickens, Wordsworth and Coleridge, the Brontës and the Brownings, Thomas Hardy and Oscar Wilde. This new edition, edited by David Crystal, will contain a selection from the original, offering memorable passages on subjects ranging from books and critics to dreams and ethics.

**Binary Oppositions in American Society and Culture** Arthur Asa Berger, 2024-02-06 This book, which explores the social, psychological, cultural and political significance of the concept of binarism, is intertextual in nature and borrows from the ideas and writings of scholars whose ideas help us understand binarism and from some modified and updated versions of my previous writings. The concept of intertextuality is derived from the writings of the Russian communications theorist M. M. Bakhtin and his theories about dialogism, which are of central importance in this book. Intertextuality is a concept that refers to the interconnectedness of texts, where one text refers to quotes, or incorporates elements from another text. It is the idea that no text exists in isolation, but it is influenced by and refers to other texts that came before it. 'Binaries' is also multi-disciplinary and is a cultural studies analysis that uses semiotics, psychoanalytic theory, sociological theory and Marxist theory to investigate the role binary oppositions play in shaping American culture, character, and society.

**Acceptable words** Jeffrey Wainwright, 2013-07-19 Geoffrey Hill has said that some great poetry 'recognises that words fail us'. These essays explore Hill's struggle over fifty years with the recalcitrance of language. This book seeks to show how all his work is marked by the quest for the right pitch of utterance whether it is sorrowing, angry, satiric or erotic. It shows how Hill's words are never lightly 'acceptable' but an ethical act, how he seeks out words he can stand by - words that are 'getting it right'. This book is the most comprehensive and up-to-date critical work on Geoffrey Hill so far, covering all his work up to 'Scenes from Comus' (2005), as well as some poems yet to appear in book form. It aims to contribute something to the understanding of his poetry among those who have followed it for many years and students and other readers encountering this major poet for the first time.

**Hobbes's Philosophy of Religion** Thomas Holden, 2023-01-10 Hobbes's Philosophy of Religion presents a new scholarly interpretation of Hobbes's treatment of religious speech and practice. It argues that the key to Hobbes's treatment of religion is his theory of religious language. According to Hobbes, the proper function of religious language is not to describe, state facts, or affirm truths. Instead, such talk ought only to express attitudes of honour, reverence, and humility before the incomprehensible great cause of nature. His theory valorises the traditional discourses of theism, natural religion, and revealed religion, but only as an expression of reverence without descriptive import. Hobbes is sincerely pious, rejecting

atheism and irreligion. But he also rejects literal-minded theism, and any realist conception of the divine attributes. The book provides a comprehensive study of Hobbes's highly original treatment of religion. It also offers an integrated account of Hobbes's philosophical thought around religious topics. The account brings out the connections between Hobbes's theoretical philosophy - including his philosophy of mind, language, and human nature - and his practical religious politics, including his views on religious toleration, ecclesiology, and the religious function of the civil state.

*Leviathan* Thomas Hobbes, Sheba Blake, 2017-06-21 *Leviathan* is a book written by Thomas Hobbes (1588-1679). Its name derives from the biblical Leviathan. The work concerns the structure of society and legitimate government, and is regarded as one of the earliest and most influential examples of social contract theory. *Leviathan* ranks as a classic western work on statecraft comparable to Machiavelli's *The Prince*. Written during the English Civil War (1642-1651), *Leviathan* argues for a social contract and rule by an absolute sovereign. Hobbes wrote that civil war and the brute situation of a state of nature (the war of all against all) could only be avoided by strong, undivided government. After lengthy discussion with Thomas Hobbes, the Parisian Abraham Bosse created the etching for the book's famous frontispiece in the geometrique style which Bosse himself had refined. It is similar in organisation to the frontispiece of Hobbes' *De Cive* (1642), created by Jean Matheus. The frontispiece has two main elements, of which the upper part is by far the more striking. In it, a giant crowned figure is seen emerging from the landscape, clutching a sword and a crosier, beneath a quote from the Book of Job - *Non est potestas Super Terram quae Comparetur ei. Iob. 41 . 24* (There is no power on earth to be compared to him. Job 41 . 24) - linking the figure to the monster of that book. (Due to disagreements over the precise location of the chapters and verses when they were divided in the late Middle ages, the verse Hobbes quotes is usually given as Job 41:33 in modern Christian translations into English, Job 41:25 in the Masoretic text, Septuagint, and the Luther Bible; it is 41:24 in the Vulgate.) The torso and arms of the figure are composed of over three hundred persons, in the style of Giuseppe Arcimboldo; all are facing inwards with just the giant's head having visible features. (A manuscript of *Leviathan* created for Charles II in 1651 has notable differences - a different main head but significantly the body is also composed of many faces, all looking outwards from the body and with a range of expressions.) The lower portion is a triptych, framed in a wooden border. The centre form contains the title on an ornate curtain. The two sides reflect the sword and crosier of the main figure - earthly power on the left and the powers of the church on the right. Each side element reflects the equivalent power - castle to church, crown to mitre, cannon to excommunication, weapons to logic, and the battlefield to the religious courts. The giant holds the symbols of both sides, reflecting the union of secular, and spiritual in the sovereign, but the construction of the torso also makes the figure the

state.

**Quotology** Willis Goth Regier, 2010-10-01 Erasmus advised readers to learn quotations by heart and copy them everywhere: write them in the front and back of books; inscribe them on rings and cups; paint them on doors and walls, even on the glass of a window. Emerson noted that in Europe, every church is a kind of book or bible, so covered is it with inscriptions and pictures. In Arabic script as tall as a man, the Koran is quoted on the walls and domes of mosques. We quote to admire, provoke, commemorate, dispute, play, and inspire. Quotations signal class, club, clique, and alma mater. They animate wit, relay prophecies, guide meditation, and accessorize fashion. In Quotology Willis Goth Regier draws on world literature and contemporary events to show how vital quotations are, how they are collected and organized, and how deceptive they can be. He probes all these aspects, identifying fifty-nine types of quotations, including misquotations and anonymous sayings. Following the logic of quotology, Quotology concludes with famous last words.
