**Joseph Walter Mountin, Aaron W. Christensen**

*The structure of government and the challenge of climate change* Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2007-10-29 The Committee's report finds that, over the past decade, the Government has failed to rise fully to the domestic challenge of climate change, and its likely failure to reach its domestic target on reducing carbon dioxide emissions will have a damaging impact on the UK's international leadership role in reaching a post-Kyoto agreement. Although the Government has introduced some new arrangements for co-ordinating climate change policy more effectively across Whitehall, the scale of the challenge and the complexity involved in radically restructuring the economy to bring about the needed emission reduction targets requires further changes. There is a need for a strategic review of Government action to ensure that the leadership and responsibility for the development and delivery of climate change mitigation and adaptation policies is clear, as well as a new long-term policy framework to ensure that policies introduced today do not undermine our ability to reduce emissions in the future. The Committee also recommends that a new and authoritative body be established within the Cabinet Office to drive forward policy and to diminish the potential for a conflict of objectives between departments.

**Introduction to American Government** Frederic Austin Ogg, Perley Orman Ray, 1928

*Government Employment and Pay* Mr. Peter S. Heller, Mr. Alan A. Tait, 1983-10-31 How many people are employed by the government? How many are employed by the central government compared with the state and local authorities? How many are employed in public enterprise? How much are they all paid? How much are they paid relative to each other, or relative to the private sector? Such questions interest people in general and economists and policymakers in particular; yet it is remarkable how little information is readily accessible on these topics.

**Decentralizing Infrastructure** Antonio Estache, 1995 World Bank Discussion Paper No. 286. This report was commissioned as part of a project on the effectiveness of credit policies in East Asian countries. In the Republic of Korea, the government has played a pervasive role in promoting industrialization and economic development. The report documents the use of directed credit programs and highlights what made government intervention effective: its close consultation with industry, the existence of a competitive business environment, and a strong monitoring and evaluation system. The report notes the risk-sharing arrangements developed by Korean policymakers and the flexible adaptation of directed credit programs to the changing needs of the Korean economy. The authors also emphasize the long-term costs of reliance on directed credit programs and the measures taken in recent years to redirect the programs' objectives and redress the imbalances that have arisen along Korea's path to economic development.

*Government Communication* Karen Sanders, Maria Jose Canel, 2013-06-20 This book is available as open access through the Bloomsbury Open Access programme and is available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com). Government communication is a curiously neglected area of discursive analysis. No considered examination of the subject exists which provides either an account of the contemporary governmental landscape or an explanation of the common and divergent themes on both a domestic and international basis. This volume aims to fill that gap, providing a concise and illuminating case-study based review of government communication. It will be divided into three sections to reflect differences in both geography and

political allegiances, scrutinizing continental Europe, Anglo-American traditions and newly emerging democracies. Offering a global and thematic account, it is an indispensable resource for all students of political communication.

Representing Structure in Phonology and Syntax Marc van Oostendorp, Henk van Riemsdijk, 2015-08-17 Formal grammars by definition need two parts: a theory of computation (or derivation), and a theory of representation. While recent attention in mainstream syntactic and phonological theory has been devoted to the former, the papers in this volume aim to show that the importance of representational details is not diminished by the insights of such theories.

*Introduction to Kazakhstan* Gilad James, PhD, Kazakhstan is a country located in Central Asia and Eastern Europe, bordered by Russia to the north and China to the east. It is the world's ninth largest country by land area, covering an area of 2.7 million square kilometers, and is rich in natural resources such as oil, gas, and minerals. Kazakhstan gained independence in 1991 following the collapse of the Soviet Union, and has since undergone significant economic and political reforms to become one of the world's fastest growing economies. Despite its vast territory and abundance of resources, Kazakhstan has a relatively small population of just over 18 million people, with Kazakhs being the largest ethnic group followed by Russians and Uzbeks. The country has a diverse landscape ranging from the mountainous regions in the east to the flat, arid plains in the west. The capital city, Nur-Sultan (formerly Astana), is located in the northern part of the country and is known for its futuristic architecture. Kazakhstan's national language is Kazakh, which is also the official language of the country, although Russian is widely spoken and understood. The country has a unique cultural heritage that has been shaped by its nomadic history and Islamic traditions. Modern Kazakhstan is known for its advancements in technology and space exploration, as well as its efforts to promote regional stability and economic development.
