To be or not to be? The Verbum Substantivum from Synchronic, Diachronic and Typological Perspectives Michail L. Kotin, Richard Whitt, 2015-10-13 The verbs of the 'to be'-group, also called verba substantiva, belong to the most enigmatic phenomena of the human language. Combining a distinct suppletivity of their conjugational forms in most languages with a striking semantic and functional ambiguity, as well as unique syntactic capabilities, they form a very specific class of linguistic entities. They can be referred to, without exaggeration, as one of the conceptually gravest and most symptomatic language formations. Typologically, the be-verbs demonstrate, on the one hand, a set of similar features in almost every language, which is excellent evidence of their universal validity. On the other hand, the differences between these verbs in various language groups and even in particular languages are remarkable proof of language relativism. Historically, the be-verbs show a sequence of relevant stages in their formal, semantic and syntactic developments, which in many aspects coincide with their typological and individual, idioethnic features and properties. One can trace, among other things, paths and mechanisms of their development and salient changes of their functions in language systems of different types. Especially important are also changes in the form and function of the be-verbs arising from language contact, for they indicate essential tendencies in the evolution of these entities accelerated by the influence of language interaction triggers. The contribution of to be-verbs to the morphology, semantics and syntax of the majority of the languages of the world is substantial from a number of perspectives, and these verbs belong to the most complex and simultaneously central entities of human language. For this reason their analysis must continually be synchronized with the newest results of general linguistic research. This volume, hence, describes and interprets the to be-verbs and constructions in the broad context of contemporary linguistic research, including synchrony, diachrony, diatopy, language contrast and typology.

To be Or Not to Be? Is that the Question? And Other Studies in Ontology, Epistemology and Logic Leon Gumański, 1999 This volume may be of interest for all those who wish that philosophy had a scientific character. As an adherent of the Polish Lvov-Warsaw Philosophical School, the author of this collection of papers endeavours to clarify some basic notions of epistemology, ontology and psychology of cognitive acts, such as judgment, existence, being etc. In his investigations he refrains from unnecessary rejection of common-sense knowledge but at the same time searches for suitable patterns in contemporary sciences. Regarding formal logic as a fundamental tool for the precise expression and justification of thoughts, the author tries to clear logic from ontological commitments, shows how to construct logic of norms and how to use safely different definitions in research works. The book presents a new conception of antinomies and an innovative approach to realistic epistemology. Moreover, some applications of logical methods are illustrated by examples of semantical analyses of the general notion of similarity and the biological concept of homology.

Introduction to Medio-Translatology Xie Tianzhen,2023-07-20 This book offers a comprehensive introduction to medio-translatology, including its historical and literary setting, its core concept, and its practice and theory. Medio-translatology, inspired by scholarship in comparative literature and the “cultural turn” in Western translation studies, has tackled many issues which previously went unnoticed or were ignored in traditional translation studies in China; it falls within the scope of literary studies and cultural studies, extending beyond the confines of language and treating literary translations and translating as historical facts. Emerging from comparative literature, medio-translatology looks at literary translation from a new and broader perspective, and explains, with illustrative and compelling examples, that literary translation is “an act of creative treason.” The originality of this approach is also evident in its distinguishing between the history of translated literature and the history of literary translation, as well as in its addressing the nature and status of translated literature. The Chinese edition of this book, being the first of its kind and well received in China, has been hailed as a milestone in exploring translation studies in the context of comparative literature in Chinese academia, and it introduces to students and researchers alike a wide range of new thoughts and ideas.

Bad Girls and Boys Go to Hell (or not) Gloria Neufeld Redekop,2012-07-26 To question the idea of hell as a default destination is to question the entire fundamentalist evangelical worldview. This book does just that. Fundamentalist evangelicalism holds that the Bible is an infallible authority and that all are born in sin. Sinners go to hell, but Jesus, taking their place, died to save them from hell. How did this belief come to be? What were the effects on people brought up with a belief in the reality of hell? What has been the process of people leaving the fundamentalist evangelical movement? In *Bad Girls and Boys Go To Hell (or not)*, Gloria Neufeld Redekop takes us on her own personal journey as she engages a movement in which she was raised, conducting a careful study of the history of fundamentalist evangelicalism, the attachment to a literal-factual interpretation of the Bible, and an analysis of the experience of those who have left the movement.
