*Defining the Fringe of Contemporary Australian Archaeology* Rocco Bosco, Darran Jordan, 2018-04-18 Popular culture has often presented a mythologised version of archaeology that at times misinforms the general public about broader academic intentions. The fantastic and bizarre continue to capture the public imagination, so that while archaeological teams excavate, survey and record, they occupy the same geographic locations as ghost tour operators and seekers of the supernatural. Not only does archaeology operate within the same geography as modern mythology, but widespread access to technology, from satellite imagery to GPS data, means that enthusiastic amateurs can partake in their own investigations. With limited landscape identification training, an enthusiasm for discovery and strange cultural biases, fringe operators have utilised new technologies to justify old fallacies through variant forms of amateur archaeology. This collection draws on the wealth of work currently being undertaken by contemporary archaeologists in Australia, from rock art observations to art/archaeology experiments and even space archaeology. It explores archaeology on the edge, contextualising the fringe dwellers that operate on the periphery of accepted academia. It also looks at contemporary archaeological theory and practice in relation to these fringe operators, developing approaches toward interaction, in contrast to the more common reaction of repudiation. The relationship between the accepted centre and the outer edge in contemporary archaeological practice and theory unveils much about popular misconceptions and how archaeological spaces can be overlaid with variant mythological and cultural interpretations.

*Desert Landscapes of the World with Google Earth* Andrew Goudie, 2023-01-01 This book presents an introduction to desert landscapes—primarily landforms that are natural and man-made. It is based around the presentation of a series of beautiful and informative annotated Google Earth images. These are accompanied by text that describes the feature(s) concerned, their location, and their origin. There are also, in some cases, ground images taken by the author.

**The International Harvester Company** Chaim M. Rosenberg,2019-05-13 Ancient farmers used draft animals for plowing but the heavy work of harvesting fell to the humans, using sickle and scythe. Change came in the mid-19th century

when Cyrus Hall McCormick built the mechanical harvester. Though the McCormicks used their wealth to establish art collections and universities, battle disease, and develop birth control, members of the family faced constant scrutiny and scandal. This book recounts their story as well as the history of the International Harvester Company (IHC)--a merger of the McCormick and Deering companies and the world's leader in agricultural machinery in the 1900s.

Lost Continents & the Hollow Earth David Hatcher Childress,Richard S. Shaver,1999 This book is Childress' thorough examination of the early hollow earth stories of Richard Shaver, and the fascination that fringe fantasy subjects such as lost continents, UFOs, and the hollow earth have had on people. Shaver's rare 1948 book, I Remember Lemuria is reprinted in its entirety, and the book is packed with illustrations from Ray Palmer's Amazing Stories issues of the 1940s. Childress discusses famous hollow earth books and delves deep into whatever reality may be behind the stories of tunnels underground.

*The Three-ray Megacontinent of the Earth* Yuri Bakulin,Anatoly Zhirnov,2019-12-10 This book explores many mysterious features of the structure and evolution of the Earth's continents, still unknown to the scientific community and a wider audience. Science has now proved that the southern continents of South America, Africa and Australia represent the southern ends of a single three-beam megacontinent. It began to form 4.4 billion years ago in a huge three-beam cavity on the planet's surface and grew vertically up to its present state. Proof of the reality of a single three-beam megacontinent is a fundamental discovery in Earth sciences, and represents a new level in the understanding of the planet's structure. The text will appeal to researchers of Earth sciences, university teachers and students, and secondary school teachers of geography

and geology, as well as all readers with an interest in the history of our planet.

**Key Lines and Earth Energies** David Cowan, 2003 This exploration shows how natural forces affect our behavior, how they can be used to enhance our health and well being, and ultimately, how they bring us closer to penetrating one of the deepest mysteries being explored.

**On the Edge of Reality** Colin Andrews, Synthia Andrews, 2013-08-24 A global expansion of consciousness is underway. As predicted by ancient prophecy, old ways of thinking and of seeing the world are shifting. Mind-stretching new phenomena are challenging current reality. New frontiers of science are disclosing a connection between our consciousness and physical reality. As consciousness changes, so do our perceptions. The door is opening to a new reality. Join Colin and Synthia as they explore what is beyond this door. Examine the multitude of current changes—from the bases of society to the foundations of science—that indicate the unfolding of a new paradigm. Investigate non-ordinary reality and unexplained phenomena as interactions of consciousness. In this fascinating new title, you will explore and learn about: Parallel cases of inexplicable exchanges between lights in the sky and crop circles on the ground Strange sounds in the sky heard and recorded around the world Photographic orbs of light The Norway Spiral, a rotating spiral of light seen by hundreds of people in 2009 Unexplained RADAR interference patterns correlating with weather anomalies

**Planet Earth** Rani Iyer, 2011-01-01 About one-fifth of the earth is covered by deserts. But what are deserts? Are they always hot and sandy? What do you find in a desert? Learn about the climate, plant and animal life, the people of the deserts, and much more. From the hot, dry Sahara Desert to the icy expanse of Antarctica, this book explores and brings alive the deserts of the world.

Maps of the Ancient Sea Kings Charles H. Hapgood, 1966 Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt. Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century. Hapgood believes that they mapped all the continents. This would mean that the Americas were mapped thousands of years

before Columbus. Antarctica would have been mapped when its coasts were free of ice. Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene, Ice Age 'land bridge'.
