Unrelenting Change, Innovation, and Risk Daniel J. Phelan, 2016-04-08 Arguably, the nation's community colleges have experienced more change in the last several years than they have over the prior 115 years of their existence. Rapid changes in technology, external pressures for accountability and student completion, aggressive competition from other higher education institutions (i.e., public, for-profit, and private), changes in enrollment demographics, as well as new economic, market, and operational models stand to completely disrupt this relatively young enterprise. *Unrelenting Change* provides useful, practical examples for community college leaders as they seek to thoughtfully and strategically align their organization for the new dynamic in higher education. Furthermore, *Unrelenting Change* offers insights into the change process, including institutional assessment and readiness, consideration of cultural implications, strategic intentions toward innovation, as well as risk, failure, and success. Rather than perceiving change and disruptive innovation as merely happenstance, or luck, the author provides discernment into the topic so as to give community college leaders solid, guidance, if not improved odds, in undertaking this important, competitive edge for the future of their intuitions, and by extension, their students.

The Twelfth Off-Campus Library Services Conference Proceedings Julie A. Garrison, 2013-04-03 An essential tool for digital services for every campus library *The Twelfth Off-Campus Library Services Proceedings* is a selection of superb presentations from the twelfth annual conference on library services held in Savannah, Georgia in April 2006. Our Cherished Halls of Ivy Phillip L. Beukema, 2022-10-10 Higher education has both supporters and detractors, although not in equal numbers. Some would have us believe that our higher education enterprise is on the brink of disaster, that it's falling apart at the seams. Some go so far as to call the system broken beyond repair, suggesting that it be rebuilt from the ground up. Can it be this bad? Drawing on his long experience in higher ed administration, the author examines the sea change that's affected nearly every corner of the higher learning landscape. These corners include the high-and-rising costs of tuition, the crushing levels of student debt, the shamefully low graduation rates in too many schools, the growing "million-dollar clubs" whose members include university presidents and football and basketball coaches, the inadequacies of accreditation, and the growing influence of partisan politics in the conduct of our public universities. That's for starters. With an insider's perspective, the author paints a picture that is up-front and honest, laying bare the depth and extent of specific problems confronting that crucial engine of our economy - higher education. In each case, he spells out what needs a tune-up and what needs something closer to an overhaul. Of course, he offers specific proposals for 'fixing' those problems. They're

likely to be controversial, but the author hopes they spark a debate that ultimately leads to productive solutions.

Higher Education Design Hamish Coates,2020-12-01 This book advances new views on higher education design, steps beyond prevailing problems and perspectives, and stimulates broader contributions. The 2020 pandemic has shocked already fragile business and academic models, and the time is ripe for innovating global online education, shifting towards Asia and lifelong learning, and investing in 21st century institutions and partnerships. Rather than dwell on dystopian discontents, the book charts narratives for developing the industry and the field. It is written for commercial, governmental and collegial communities to inject major research-driven insights into contemporary transformations and research.

Introduction to Information Systems R. Kelly Rainer,Brad Prince,2023-09-20 Introduction to Information Systems, 10th Edition teaches undergraduate business majors how to use information technology to master their current or future jobs. Students will see how global businesses use technology and information systems to increase their profitability, gain market share, develop and improve their customer relations, and manage daily operations. This course demonstrates that IT is the backbone of any business, whether a student is majoring in accounting, finance, marketing, human resources, production/operations management, or MIS. In short, students will learn how information systems provide the foundation for all modern organizations, whether they are public sector, private sector, for-profit, or not-for-profit.

Enough to Be Shared: a Purpose-Driven Name Dr. George Appiah-Sokye,2021-06-06 Do names have meaning? Is there a relationship between the meaning of a name and the purpose of one's life? Can the name of a person tell his or her life story? Can the experiences of a person present useful life lessons? Most names of African origin have meaning. A lot of people name their children after good people so that the children will turn out to be good citizens. Several biographies and autobiographies have been written; but in this book the author seeks to draw an association between the meaning of his name and the purpose of his life, using his lived experiences-both negative and positive to present useful lessons to people, especially, the younger generation. The author views life as a journey, involving experiences that are not captured by resumes and profiles of people. In 30 Chapters, the author tells his life story from both Africa and the United States of America to present useful lessons to be explored to improve human life. In this book-Enough to be Shared: A Purpose-Driven Name-A Vivid Life Story Application of George Appiah-Sokye; the author responds to requests for mentorship from both current and prospective accounting students in particular; as well as, the younger generation and Africans in the Diaspora in general. It is hoped the reader will find the contents of this book very useful.

Understanding and Addressing Commuter Student Needs J. Patrick Biddix,2015-06-17 Despite representing a majority of the college student population, a surprising lack of research has focused on the unique issues and needs of commuter

students. This volume reviews the contemporary research and thinking about commuters. Topics include: • theoretical perspectives and discussions of foremost topics and issues, • specific examples for applying contemporary research with students of color, students with disabilities, and online students, • perspectives for immediate work and strategic planning, and • practical applications, recommendations, and suggestions for supporting commuter students. The volume has four major sections: theory, profiles and issues, support and services, and general applications. This is the 150th volume of this Jossey-Bass higher education quarterly series. An indispensable resource for vice presidents of student affairs, deans of students, student counselors, and other student services professionals, *New Directions for Student Services* offers guidelines and programs for aiding students in their total development: emotional, social, physical, and intellectual.

Off-Campus Study, Study Abroad, and Study Away in Economics Joshua Hall, Kim Holder, 2021-10-08 This volume discusses diverse methodologies in economics education, focusing on experiential economic education away from campus through study abroad, study away, and other off-campus programs. These twenty-three chapters provide a 'how-to' guide for economic educators looking to expand their pedagogical repertoire, whether they want to take students to Ireland to study Adam Smith or South Africa to study poverty. Readers are provided with information about the economic content of the course as well as the nuts-and-bolts of on-the-ground experiences. Delivering a modern take on economic education, this volume is intended for economics educators wishing to engage students in new and creative ways.

American Higher Education in the Twenty-First Century Michael N. Bastedo, Philip G. Altbach, Patricia J. Gumport, 2023-01-31 Now in its fifth edition! An indispensable reference for anyone concerned with the future of American colleges and universities. Whether it is advances in information technology, organized social movements, or racial inequality and social class stratification, higher education serves as a lens for examining significant issues within American society. First published in 1998, *American Higher Education in the Twenty-First Century* offers a comprehensive introduction to the complex realities of American higher education, including its history, financing, governance, and relationship with the states and federal government. This thoroughly revised edition brings the classic volume completely up to date. Each chapter has been rewritten to address major recent issues in higher education, including the COVID-19 pandemic, the movement for racial justice, and turmoil in the for-profit sector. Three entirely new chapters cover broad-access colleges, race and racism, and organized social movements. Reflecting on the implications of ethnic and socioeconomic diversity within higher education, the book also grapples with growing concerns about the responsiveness and future of the academy. No other book covers such wide-ranging issues under the broader theme of higher education's relationship to society. Highly acclaimed and incorporating cutting-edge research, *American Higher Education in the Twenty-First Century* is now more useful and engaging than ever. Contributors: Michael N. Bastedo, Philip G. Altbach, Patricia J. Gumport, Peter Riley Bahr, Joy Blanchard, Julia Brickfield, Michael Brown, Katherine S. Cho, Daniela Conde, Charles H. F. Davis III, Hans de Wit, Peter D.

Education in a New Society Jal Mehta, Scott Davies, 2018-04-26 In recent decades, sociology of education has been dominated by quantitative analyses of race, class, and gender gaps in educational achievement. And while there's no question that such work is important, it leaves a lot of other fruitful areas of inquiry unstudied. This book takes that problem seriously, considering the way the field has developed since the 1960s and arguing powerfully for its renewal. The sociology of education, the contributors show, largely works with themes, concepts, and theories that were generated decades ago, even as both the actual world of education and the discipline of sociology have changed considerably. The moment has come, they argue, to break free of the past and begin asking new questions and developing new programs of empirical study. Both rallying cry and road map, *Education in a New Society* will galvanize the field.

Handbook of Research on Credential Innovations for Inclusive Pathways to Professions Huang, Yi, 2021-09-24 With increasingly interconnected educational and employment ecosystems, credential innovations are trailblazing multiple pathways to professions at a pivotal moment of rapid change. In the current state of credential proliferation, the quest for simultaneous improvement of quality and value reflects heightened cross-sector interests, while at the same time the quest for concurrent enhancement of access and success remains. With the evolving educational models, technologies, and organizations, credential innovations will continue to serve as powerful catalysts in realizing the great promise for inclusive pathways to professions. The *Handbook of Research on Credential Innovations for Inclusive Pathways to Professions* surveys the state of credential innovations, examines trends and issues, and explores models and strategies with case studies across sectors and disciplines. The 21 chapters are organized in three sections. Section I, *Credential Innovations Amid Evolving Ecosystems*, features a powerful array of change theories-in-action with topics ranging from conceptual re-visioning to organizational restructuring and programmatic reengineering within evolving ecosystems. Section II, *Credential Innovations and Propositions Across Sectors*, spotlights diverse approaches to and propositions of credentials within complex socio-economic landscapes across education, business, and technology industries. Section III, *Credential Innovation Models and Strategies*, showcases institutional innovations ranging from model developments, pedagogical approaches, and personalized engagements to outcome measurements and strategies for sustainable implementation. Lessons learned and implications are explored to share promising practices, inform current development, and influence future policies toward inclusive excellence in education and the workplace.

Police in America Steven G. Brandl, 2020-01-07 Grounded in evidence-based research, *Police in America* provides a comprehensive and realistic introduction to modern-day policing in the United States. This reader-friendly text helps students understand best practices in everyday policing and think critically about the many misconceptions of police work. Author Steven G. Brandl draws from his experience with law enforcement to emphasize the positive aspects of policing without ignoring its controversies. Brandl tackles important topics that center on one question: What is good policing? Included are discussions of discretion, police use of force, and tough ethical and moral dilemmas—giving students a deeper look into the complex issues of policing to help them think more broadly about its impact on society. This title is accompanied by a complete teaching and learning package.

Handbook of Research on Education and Technology in a Changing Society Wang, Victor C. X., 2014-05-31 Technology has become an integral part of our everyday lives. This trend in ubiquitous technology has also found its way into the learning process at every level of education. The *Handbook of Research on Education and Technology in a Changing Society* offers an in-depth description of concepts related to different areas, issues, and trends within education and technological integration in modern society. This handbook includes definitions and terms, as well as explanations of concepts and processes regarding the integration of technology into education. Addressing all pertinent issues and concerns in education and technology in our changing society with a wide breadth of discussion, this handbook is an essential collection for educators, academicians, students, researchers, and librarians.

Handbook of Research on Competency-Based Education in University Settings Rasmussen, Karen, Northrup, Pamela, Colson, Robin, 2016-10-04 The majority of adult learners are looking to attain their desired academic credentials within the shortest amount of time possible. By implementing competency-based programs, learners are accelerated through their designed program or course. The *Handbook of Research on Competency-Based Education in University Settings* is a pivotal reference source for the latest academic research on the use of competency-based testing in higher education institutions. Focusing on innovative practices, strategies, and real-world scenarios, this book is ideally designed for educators, students, administrators, professionals, and academics interested in emerging developments for competency-based education initiatives.

Higher Education at Risk Sandra Featherman, 2023-07-03 Sandra Featherman believes that colleges are in denial about the severity of the threats to the current model of higher education. Based on her own experience as a president, as a trustee, and as a board member who has worked in private and public universities – and on interviews with the presidents of major institutions – she offers both a trenchant analysis of those threats and clear prescriptions about the painful but necessary decisions that colleges need to make to ensure they remain viable, accessible and affordable, and deliver a high-quality education. Sandra Featherman considers higher education to be at a game-changing moment. When markets don't function

well – as is the case with today’s college marketplace with offerings that cost too much and return too little – it opens the door to new types of suppliers, who offer new ways of providing what students are looking for, particularly the increasing cohort of mature, working students. In the face of new competitors – for-profit education companies, technology start-ups, and foreign universities vying for international students – trustees and senior level administrators are generally stuck in a traditional ethos and with decision-making processes unsuited to these times. They know what used to work, and find it easier to follow old ways than to make the difficult transition to new ways of delivering education. She lays out a strategy: that emphasizes the centrality of students and how to provide them with the most effective learning environment; that is clear-eyed about focusing on the core missions, and abandoning practices that constrain or impede them; and that requires constant self-monitoring to learn from and act upon what works. She offers a blueprint for redesigning institutions, for paring away what is unnecessary and cost ineffective, and for adopting the best technologies, all in the service of developing meaningful degree programs at an affordable price, and widening access for under-represented groups. She ranges over the implications of budget decisions, accreditation, and MOOCs; addresses government regulation and tuition costs; presents promising new models; and concludes with 11 key recommendations that should be heeded by all higher education administrators and trustees.

Online Education Anthony G. Picciano, 2018-07-17 Online Education is a comprehensive exploration of blended and fully online teaching platforms, addressing history, theory, research, planning, and practice. As colleges, universities, and schools around the world adopt large-scale technologies and traditional class models shift into seamless, digitally interactive environments, critical insights are needed into the implications for administration and pedagogy. Written by a major contributor to the field, this book contextualizes online education in the past and present before analyzing its fundamental changes to instruction, program integration, social interaction, content construction, networked media, policy, and more. A provocative concluding chapter speculates on the future of education as the sector becomes increasingly dependent on learning technologies.

Handbook of Research on Challenges and Opportunities in Launching a Technology-Driven International University Khosrow-Pour, D.B.A., Mehdi, 2019-02-22 The global digital economy continues to demand the need for educated and highly trained professionals, requiring higher learning institutions to provide accessible technology-driven experience to prepare future leaders effectively. However, there are challenges involved in creating a robust curriculum and recruiting top-notch faculty all over the world while also meeting the academic criteria to offer effective academic programs and degrees to students. The Handbook of Research on Challenges and Opportunities in Launching a Technology-Driven International University is a pivotal reference source that provides empirical and theoretical research focused on the effective construction of technology-driven higher learning international universities. While highlighting topics such as accelerated and innovative

curriculum, recruitment of international faculty, on-campus development, and distance learning systems, this publication explores the financial and economic impacts of launching a university, and the methods of how to identify the appropriate locale for universities and/or branch campuses that will ideally complement the local interest of business sectors within the selected location. This book is ideally designed for entrepreneurs, practitioners, academicians, administrators, government officials, researchers, and consultants.
