**The Language of Landscape** Anne Whiston Spirn, 1998-01-01 This eloquent and powerful book combines poetry and pragmatism to teach the language of landscape. Anne Whiston Spirn, author of the award-winning *The Granite Garden: Urban Nature and Human Design*, argues that the language of landscape exists with its own syntax, grammar, and metaphors, and that we imperil ourselves by failing to learn to read and speak this language. To understand the meanings of landscape, our habitat, is to see the world differently and to enable ourselves to avoid profound aesthetic and environmental mistakes. Offering examples that range across thousands of years and five continents, Spirn examines urban, rural, and natural landscapes. She discusses the thought of renowned landscape authors--Thomas Jefferson, Frank Lloyd Wright, Frederick Law Olmsted, Lawrence Halprin--and of less well known pioneers, including Australian architect Glenn Murcutt and Danish landscape artist C. Th. Sørensen. She discusses instances of great landscape designers using landscape fluently, masterfully, and sometimes cynically. And, in a probing analysis of the many meanings of landscape, Spirn shows how one person's ideal landscape may be another's nightmare, how Utopian landscapes can be dark. There is danger when we lose the connection between a place and our understanding of it, Spirn warns, and she calls for change in the way we shape our environment, based on the notions of nature as a set of ideas and landscape as the expression of action and ideas in place.

*Conflict Landscapes* Nicholas J. Saunders, Paul Cornish, 2021-06-24 *Conflict Landscapes* explores the long under-acknowledged and under-investigated aspects of where and how modern conflict landscapes interact and conjoin with pre-twentieth-century places, activities, and beliefs, as well as with individuals and groups. Investigating and understanding the often unpredictable power and legacies of landscapes that have seen (and often still viscerally embody) the consequences of mass death and destruction, the book shows, through these landscapes, the power of destruction to preserve, refocus, and often reconfigure the past. Responding to the complexity of modern conflict, the book offers a coherent, integrated, and sensitized hybrid approach, which calls on different disciplines where they overlap in a shared common terrain. Dealing with issues such as memory, identity, emotion, and wellbeing, the chapters tease out the human experience of modern conflict and its relationship to landscape. *Conflict Landscapes* will appeal to a wide range of disciplines involved in studying conflict, such as archaeology, anthropology, material culture studies, art history, cultural history, cultural geography, military history, and heritage and museum studies.

*Landscapes of Loss* Naomi Greene, 1999-04-18 In this book, Naomi Greene makes new sense of the rich variety of postwar French films by exploring the obsession with the national past that has characterized French cinema since the late 1960s. Observing that the sense of grandeur and destiny that once shaped French identity has eroded under the weight of recent history, Greene examines the ways in which French cinema has represented traumatic and defining moments of the nation's past: the political battles of the 1930s, the Vichy era, decolonization, the collapse of ideologies. Drawing upon a broad spectrum of films and directors, she shows how postwar films have reflected contemporary concerns even as they have created images and myths that have helped determine the contours of French memory. This study of the intricate links between French history, memory, and cinema begins by examining the long shadow cast by the Vichy past, and shifting political and historical perspectives toward the nation's more distant past, which also emerged in these years. Finally, the mood of nostalgia and melancholy that appears to haunt contemporary France is analyzed in the context of films about the nation's imperial past as well as those that hark back to a golden age, a remembered paradis perdu, of French cinema itself.

**Collateral Values** Todd R. Lookingbill, Peter D. Smallwood, 2019-07-30 This book explores the unanticipated benefits that may arise after wars and conflicts, showing how the preservation of battlefields and the establishment of borderlands can create natural capital in the former landscapes of war. The editors call this Collateral Value, in contrast to the collateral damage that war inflicts upon infrastructure, natural capital, and human capital. The book includes case studies recounting successes and failures, opportunities and risks, and ambitious proposals. The book is organized in two sections. The first visits U.S., English, and French battlefield sites dating from medieval England to World War I. The second explores borderlands located on several continents, established to end or prevent conflict. Both of these can create value beyond their original purpose, by preserving natural areas and restoring biodiversity. Among the topics covered are: · Registering English Battlefields · Old forts and new amenities in the Southern Plains of the U.S. · Verdun, France, and the conservation of WWI cultural and natural heritage · Conservation lessons learned in the Cordillera del Condor Corridor of the Andes mountains · Korea's DMZ and its nature preserve · Wakhan National Park, a mountainous buffer area between Afghanistan and Pakistan The book examines state-of-the-art applications of landscape ecology, including methods for change detection, connectivity analysis, and the quantification of ecosystem services. Also included is a chapter on a creative proposal for "Guantánamo 2.0," which would transform the Gitmo detention facility into a peace park and ecological research center. A concluding

chapter appraises the past, present, and future of Collateral Values. *Collateral Values: The Natural Capital Created by Landscapes of War* benefits a broad audience of advanced undergraduate and graduate students, researchers, and practicing professionals.

**Scarred Landscapes** C. Pearson, 2008-10-31 Based on detailed archival research and site visits, *Scarred Landscapes* is the first environmental history of Vichy France. From mountains and marshlands to foresters and resisters, it examines the intricate and often surprising connections between war, history, and the 'natural' environment during these turbulent years.

*Landscapes of Trauma* Nigel Hunt, 2019-08-08 Integrating trauma studies with historical research and social psychology, *Landscapes of Trauma* examines a range of battlefields from across history, including Waterloo, the Battle of Sedan, the Battle of the Ebro and the Battle of Normandy, to bring to light what these battlefields say about our collective and individual psyches. Hunt explores how war shapes the nature of trauma, not only by its innate horror but also by the historical and societal contexts it is fought in, from the cultural and social conventions of the period to the topography of the settings. This book provides a deep analysis of how war is experienced and remembered in different eras and by different generations. Moving beyond the clinical concept of post-traumatic stress disorder, Hunt discusses how trauma can be understood socially and historically, as well as through the lens of individual suffering. This book also investigates the psychological foundations of memorialisation, remembrance and commemoration that shape the legacy of the battles discussed. Using interviews with veterans, their letters, journals and diaries, as well as literary and historical sources, Hunt locates the battlefield as a place where humans explore the parameters of human behaviour, thought and emotion. This book is an important resource for students and scholars interested in the psychology of trauma and war, as well as military history.

*Untold War* Heather Jones, Jennifer O'Brien, Christoph Schmidt-Supprian, 2008-05-31 Complex, brutal and challenging, the First World War continues to inspire dynamic research and debate. The third volume to emerge from the pioneering work of the International Society for First World War Studies, this collection of new essays reveals just how plural the conflict actually was - its totalizing tendencies are shown here to have paradoxically produced diversity, innovation and difference, as much as they also gave rise to certain similarities across wartime societies. Exploring the nature of this 'plural war,' the contributions to this volume cover diverse themes such as combat, occupation, civic identity, juvenile delinquency, chaplains, art and remembrance, across a wide range of societies, including Germany, France, Britain, German colonial Africa, Belgium and Romania. With chapters on both military and cultural history, this book highlights how the first total war of the twentieth century changed social, cultural and military perceptions to an untold extent. Contributors: Alan Kramer, Dan Todman, Claudia Siebrecht, Vanessa Ther, Jan Vermeiren, Wencke Meteling, Daniel Steinbach, Aurore François, Edward Madigan, Catriona Pennell, François Bouloc, Sonja Müller, Joëlle Beurier, Lisa Mayerhofer, Heather Jones, Christoph Schmidt-Supprian, Jennifer O'Brien.

*The Battle of Verdun: A Captivating Guide to the Longest and Largest Battle of World War 1 That Took Place on the Western Front Between Germ* Captivating History,2019-02-13 If you want to discover the captivating history of the Battle of Verdun, then keep reading... Today, the landscape is marked by shell craters, pillboxes, and empty trenches. Mother Nature has tried to reclaim the terrain; the trees have grown again, and the ground is covered by lush green grass, but despite her best efforts, the scars on the landscape still remain, a constant reminder of the devastation and misery that was experienced here more than a century ago. And that is as it should be because the world should never forget what happened in this small corner of France. The battle scars on the landscape of Verdun are a testament to the horrors of a war that will live on in the collective memory of a nation forever, but they are also a memorial to the brave men who fought and died in the muddy fields defending their country and their countrymen from a foreign invader. But Verdun was not just a battle; it was a seminal moment in French history. This is the battle that defines the First World War for France, but it cannot be viewed in isolation. It is part of a far greater story, influenced by the many events and battles that took place during this bloody time in Europe's history. In *The Battle of Verdun: A Captivating Guide to the Longest and Largest Battle of World War 1 That Took Place on the Western Front Between Germany and France*, you will discover topics such as *The Road to Verdun* *The Citadel of Verdun* *The Significance of Verdun* *The First Phase of the Battle of Verdun* *The Battle of Verdun Gets Bogged Down in the Trenches* *A Summer in Hell* And much, much more! [Making Sense of Suffering: Theory, Practice, Representation](#) ,2020-09-25 Suffering may be universal, but it is not universally understood. In this collection, scholars from many nations and disciplines explore theoretical and practical approaches to understanding suffering as well as the ethics and effects of representing suffering in art and literature.

**Places of Memory: Spatialised Practices of Remembrance from Prehistory to Today** Christian Horn,Gustav Wollentz,Gianpiero Di Maida,Annette Haug,2020-09-24 This book examines spatialised practices of remembrance and its role in reshaping societies from prehistory to today; it presents a reflection on the creation of memories through the organisation and use of landscapes and spaces that explicitly considers the multiplicity of meanings of the past.

**Matters of Conflict** Nicholas J. Saunders,2004-06-01 *Matters of Conflict* looks at the definitive invention of the twentieth century - industrialised war - and its vast and varied material legacy. From trench art and postcards through avant-garde art, museum collections and prosthetic limbs to battlefield landscapes, the book examines the First World War and its significance through the things it left behind. The contributions come from a multidisciplinary perspective, uniting previously compartmentalized disciplines such as anthropology, archaeology, cultural history, museology and art history in their focus on material culture. This innovative, hybrid approach investigates the 'social life' of objects in order to understand them as

they move through time and space and intersect the lives of all who came in contact with them. The resulting survey sets a new agenda for study of the First World War, and ultimately of all twentieth-century conflict.

**Beneath the Killing Fields** Matthew Leonard, 2017-02-19 Beneath the Killing Fields of the Western Front still lies a hidden landscape of industrialised conflict virtually untouched since 1918. This subterranean world is an ambiguous environment filled with material culture that objectifies the scope and depth of human interaction with the diverse conflict landscapes of modern war. Covering the military reasoning for taking the war underground, as well as exploring the way that human beings interacted with these extraordinary alien environments, this book provides a more all-encompassing overview of the Western Front. The underground war was intrinsic to trench warfare and involved far more than simply trying to destroy the enemy's trenches from below. It also served as a home to thousands of men, protecting them from the metallic landscapes of the surface. With the aid of cutting edge fieldwork conducted by the author in these subterranean locales, this book combines military history, archaeology and anthropology together with primary data and unique imagery of British, French, German and American underground defences in order to explore the realities of subterranean warfare on the Western Front, and the effects on the human body and mind that living and fighting underground inevitably entailed.

A Field on Fire Mark D. Hersey, Ted Steinberg, 2019-01-29 A frank and engaging exploration of the burgeoning academic field of environmental history. Inspired by the pioneering work of preeminent environmental historian Donald Worster, the contributors to *A Field on Fire: The Future of Environmental History* reflect on the past and future of this discipline. Featuring wide-ranging essays by leading environmental historians from the United States, Europe, and China, the collection challenges scholars to rethink some of their orthodoxies, inviting them to approach familiar stories from new angles, to integrate new methodologies, and to think creatively about the questions this field is well positioned to answer. Worster's groundbreaking research serves as the organizational framework for the collection. Editors Mark D. Hersey and Ted Steinberg have arranged the book into three sections corresponding to the primary concerns of Worster's influential scholarship: the problem of natural limits, the transnational nature of environmental issues, and the question of method. Under the heading "Facing Limits," five essays explore the inherent tensions between democracy, technology, capitalism, and the environment. The "Crossing Borders" section underscores the ways in which environmental history moves easily across national and disciplinary boundaries. Finally, "Doing Environmental History" invokes Worster's work as an essayist by offering self-conscious reflections about the practice and purpose of environmental history. The essays aim to provoke a discussion on the future of the field, pointing to untapped and underdeveloped avenues ripe for further exploration. A forward thinker like Worster presents bold challenges to a new generation of environmental historians on everything from capitalism and the Anthropocene to war and wilderness. This engaging volume includes a very special afterword by one of Worster's oldest friends, the eminent intellectual historian Daniel Rodgers, who has known Worster for close to fifty years.
