Trading Extreme Mostafa Afshari, 2025-01-20 Honestly, there are a few subjects that I now desire somebody taught me 20 years ago: actual underlying forces that drive the markets, high probability chart patterns, a straightforward, actionable method of volume and smart money analysis, price action signals confluence, and correlation trading strategy. You will find all this strategic trading stuff and many more in this book in one place. These days, I am surprised how it could be possible to trade without understanding and considering volume and smart money. I am even more amazed by the absence of correlation analysis in 99 percent of traders' routines. Correlation is the only strategy in the world that gives you one hundred percent confidence about your trades before execution because of its fundamental and macroeconomic nature. This is the characteristic that makes it unique and priceless. Literally, it is a money-printing machine. Those who have worked with volume based on classical theories know that volume analysis is not easy and sometimes subjective. During my trading course, I derived three straightforward yet accurate rules for analyzing volume. These rules help me pinpoint liquidity and supply-demand changes at any moment in any market, and believe me, I do it in just a few seconds! On the other hand, smart money makes me possible laser precision entry into my trades. To have an idea about the benefits of this book, please check the free sample, look at the table of contents and read the introduction, or find below a summary of what topics are waiting for you inside: - A standard system for analyzing and trading consists of five time-tested, permanent strategies whose confluence gives you 95%-99% winning trade signals. The good news is that it takes only a few seconds to implement it on any chart in any time frame! - Correlation trading strategy, a one-of-a-kind, million-dollar strategy that has been my top secret for nearly two decades. - 40 ready-to-trade correlation sets (i.e., 40 sets of leading and lagging assets), including selected currencies, commodities, stock indices, and cryptocurrencies. - All technical and fundamental forces that drive the markets. - More than 250 quality color pictures throughout the book to make sure you deeply grasp all concepts, techniques, and strategies. This leaves no room for any ambiguity or mistake. - About 50 carefully designed, challenging exercises to ensure you have comprehended all the material. After reading and comprehending this book, you will gain the following remarkable skills: -To professionally analyze any chart in any asset- whether it is currency, commodity, cryptocurrency, or stock- in any timeframe at a glance. To be more exact, in just 5 seconds! -To find the ideal trading opportunities on any chart. I mean those 95% winning trades that all savvy traders around the world select and take. -Depending on your background, achieving an unbelievable win rate in as short as a few days. Something that you may have dreamed of for many years. - Adopting a consistently winning attitude and mindset in just a few weeks. -Totally eliminate the psychological factor of

trading from the beginning. But to attain it we need to focus on what galvanizes learning, and ensure we are offering the tools and mindsets with which students can lean in. In this playbook, an ace team of educators give us the goods to guide self-starting learners. Nine modules show us how to: Coherent standards, success criteria, tasks, and goals so students can travel clear pathways Offer tools that allow learners to recognize the gap between their current performance and the expected performance, and select strategies to close that gap Talk with students about engagement as a continuum, and that there are actions they can take to heighten their buy-in to any endeavor Stress-test our lesson plans to ensure students can discuss, debate, create and problem-solve around highly relevant content Use lots of low-stakes assessment and feedback routines to develop effective collaboration that doesn't depend on us. Our job as teachers is to guide learning experiences that build knowledge and self-efficacy. But from there, we need to stay on the sidelines and let students play. Only then will they develop the muscle to persevere, the strategic actions to excel, and the confidence to make our curriculum the springboard of their own dreams and goals.
