Miller, 2012-10-16 In Ray Kurzweil's New York Times bestseller *The Singularity is Near*, the futurist and entrepreneur describes the Singularity, a likely future utterly different than anything we can imagine. The Singularity is triggered by the tremendous growth of human and computing intelligence that is an almost inevitable outcome of Moore's Law. Since the book's publication, the coming of the Singularity is now eagerly anticipated by many of the leading thinkers in Silicon Valley, from PayPal mastermind Peter Thiel to Google co-founder Larry Page. The formation of the Singularity University, and the huge popularity of the Singularity website kurzweilai.com, speak to the importance of this intellectual movement. How will the Singularity affect our daily lives—our jobs, our families, and our wealth? *Singularity Rising: Surviving and Thriving in a Smarter, Richer, and More Dangerous World* focuses on the implications of a future society faced with an abundance of human and artificial intelligence. James D. Miller, an economics professor and popular speaker on the Singularity, reveals how natural selection has been increasing human intelligence over the past few thousand years and speculates on how intelligence enhancements will shape civilization over the next forty years. Miller considers several possible scenarios in this coming singularity: A merger of man and machine making society fantastically wealthy and nearly immortal Competition with billions of cheap AIs drive human wages to almost
