Position Trading Alpha Bull Traders ,2019-08-12 Finally, an investing book which isn't an infomercial! When you are learning to trade, there are 2 types of books that you don't need. There are the dry-as-dust academic books that require a PhD in math to read. And then there are the books about a trader who turned \$5,000 into \$100 million, but with no details about how he did it... but he'll let you pay thousands of dollars to learn how. Here's the deal. Position trading is how men like Warren Buffett and Ray Dalio amassed a net worth of tens of billions of dollars. By trading a few times per year, rather than a few times per day. Which is why people who have followed their advice to the letter... Have literally made millions of dollars just from doing exactly as the advice suggests... No more and no less! And many of these people started off as small part-time traders like you and I. Over the years, the team at Alpha Bull Traders has continually refined a position trading strategy which has resulted in untold amounts of profit. Using a combination of western technical and fundamental analysis and ancient Japanese candlestick charting techniques - we are able to note which days you should... and more importantly which days you shouldn't be trading. Because here's the big "secret" which people don't want you to know... You only need to trade between 5-15 times a year to make huge profits in the stock market! In fact, some years have seen huge gains in our portfolio with as little as 3 trades. Here's just a fraction of what you'll learn inside: How to easily profit from the bear market with one simple fund. 95% of beginner investors and trader don't know about it, and yet you can easily net 10-12% a year in a bear market. The #1 thing new traders miss about aftermarket trading. Get this right and you'll have a huge advantage How to set a proper stop loss so you don't get stopped out prematurely. One of the biggest mistakes new traders make is having a stop loss which is too tight. Do this instead and you'll profit when the market moves in your favor. The "zen trader" strategy which makes you immune to losses (which although rare, will occur with any trading plan) A useful, yet barely known website which breaks company news faster than relying on mainstream news services. How to use the "other 80/20 rule" to profit from short term price movements. 3 profit securing lessons to learn from the DOTCOM bubble How to beat the market without

spending hours each day monitoring stocks. Why a new trader should never trade cryptocurrency, and what to trade instead
How one trader made \$1.4 million in a single day with 1 options trade, and why you shouldn't try to replicate their strategy
Money management for absolute beginners
How to profit from legal marijuana (all the upside of cannabis growing companies but without the red tape and volatility) ...and much, much more. You may have experienced various obnoxious and even misleading advertisements of easy, get rich trading strategies. This is not one of those. You won't have to spend thousands on expensive trading software or "magic bullet systems" In fact, you can get started using an online trading account and use free websites for your information (you'll find the best two in Chapter 7) You will build up both your skills and confidence, with practical "how-to" approaches. All written in plain, easy to understand English. So if you want to make money in your spare time, and have fun while doing it... scroll up and click "add to cart"

Swing and Day Trading Thomas N. Bulkowski,2013-01-22 Comprehensive coverage of the four major trading styles
Evolution of a Trader explores the four trading styles that people use when learning to trade or invest in the stock market. Often, beginners enter the stock market by: Buying and holding onto a stock (value investing). That works well until the trend ends or a bear market begins. Then they try Position trading. This is the same as buy-and-hold, except the technique sells positions before a significant trend change occurs. Swing trading follows when traders increase their frequency of trading, trying to catch the short-term up and down swings. Finally, people try Day trading by completing their trades in a single day. This series provides comprehensive coverage of the four trading styles by offering numerous tips, sharing discoveries, and discussing specific trading setups to help you become a successful trader or investor as you journey through each style. Trading Basics takes an in-depth look at money management, stops, support and resistance, and offers dozens of tips every trader should know. Fundamental Analysis and Position Trading discusses when to sell a buy-and-hold position, uncovers which fundamentals work best, and uses them to find stocks that become 10-baggers—stocks that climb by 10 times their original value. Swing and Day Trading reveals methods to time the market swings, including specific trading setups, but it covers the basics as well, such as setting up a home trading office and how much money you can make day trading.
