Futuristic Cars and Space Bicycles Jeremy Withers,2020 Examining representations of cars and bicycles in American science fiction from the late nineteenth century to the present day, Futuristic Cars and Space Bicycles argues that science fiction by and large perceives the car as anything but a marvelous invention of modernity. Rather, the genre often scorns and ridicules the automobile and instead promotes more sustainable, more benign, more restrained technologies of movement such as the bicycle.

Bicycle Transportation John Forester, 1994 This new edition of John Forester's handbook for transportation policy makers and bicycling advocates has been completely rewritten to reflect changes of the last decade. It includes new chapters on European bikeway engineering, city planning, integration with mass transit and long-distance carriers, traffic calming, and the art of encouraging private-sector support for bicycle commuting. A professional engineer and an avid bicyclist, John Forester combined those interests in founding the discipline of cycling transportation engineering, which regards bicycling as a form of vehicular transportation equal to any other form of transportation. Forester, who believes that riding a bicycle along streets with traffic is safer than pedaling on restricted bike paths and bike lanes, argues the case for cyclists' rights with zeal and with statistics based on experience, traffic studies, and roadway design standards. Over the nearly two decades since *Bicycle Transportation* was first published, he has brought about many changes in the national standards for highways, bikeways, bicycles, and traffic laws. His Effective Cycling Program continues to grow.

Cycle World Magazine, 2009-01

The Shattered Peloton Graham Healy, 2014-05-01 A generation of young athletes decimated in the carnage of war. The Shattered Peloton is a mind-boggling account of young athletes in their prime destroyed in the hell of war. A mesmerizing view of cycling in its golden age, and the darkness that followed. On June 28, 1914, one hundred and forty-five riders lined up in a suburb of Paris at 3 a.m. to start the first stage of the Tour de France. The race, which had been founded just a decade earlier, had grown to become the biggest bicycle race in the world. The riders did not know it at the time, but as they raced, an event was taking place on the opposite side of Europe which would change all of their lives forever: Gavrilo Princip assassinated Archduke Franz Ferdinand of Austria, triggering World War I. While racing went on in France, a diplomatic crisis had started that would try but fail to avert war. Shortly after the finish of the race, France mobilized its troops and went to war with Germany. The organizer of the Tour de France, Henri Desgrange, despite being fifty years old, enrolled in the army shortly afterwards and encouraged the cyclists to do the same. The war would see over 16 million soldiers and civilians die. Many of the riders from that Tour de France did not return, and three previous winners of the race would be

among those killed in action. The Shattered Peloton tells the story of the 1914 Tour and what happened to the top cyclists of the day during the course of the war. A brilliant, disturbing, important book for anyone with an interest in cycling or military history.

Bicycle Days 1888-1895 Lost Century of Sports Collection,Frances E. Willard,2024-04-26 From 1888 to 1895, American cycling underwent a transformative journey from clunky three-wheel tricycles to sleek and efficient two-wheel bicycles, marking a pivotal moment in the history of women's cycling. The introduction of the safety bike, with its equal-sized wheels, replaced the cumbersome big-wheel "ordinary" contraption, and made cycling more accessible to women and reshaped the social and cultural landscape. The transition from sitting securely on three wheels to balancing precariously on two wheels was met with skepticism and intrigue. The novel concept of forward momentum and equilibrium presented challenges in conveying its simplicity, especially to those unfamiliar with the experience. Steering remained a mystery, and the restrictive nature of women's skirts posed a significant obstacle to mounting a saddle and pedaling. The emergence of the drop frame (later known as a girl's bike), invented to accommodate women's fashions, was countered by advances in the dress reform movement and a public outcry over the adoption of bloomers and knickerbockers. This volume of the Sports She Wrote series presents 86 articles (121,000 words) and 79 illustrations from this era, subdivided into four sections: Part 1 features ten

articles by Grace E. Denison, a notable figure in the cycling community and one of the “Sweet Sixteen” founders of the Canadian Women’s Press Club. Part 2 focuses on the life and writings of Mary Sargent Hopkins, also known as Merrie Wheeler, one of the most influential women bicyclists of the era, who is also prominent in other volumes of this series. Part 3 presents 38 chronological articles written by more than two dozen women from 1888 to 1895, providing diverse perspectives and lively debate. Part 4 features 53-year-old women’s rights advocate Frances E. Willard’s seminal book, *How I Learned to Ride the Wheel*, offering psychological and philosophical insight into women’s empowerment through cycling, as well as practical advice for women learning to ride and those who were too timid to try. *Sports She Wrote* is a 31-volume time-capsule of primary documents written by more than 500 women in the 19th century, including nine volumes on cycling.

The Joy of Cycling Jackie Corley, 2019-06-25 *The Joy of Cycling* is a collection of over 200 fun and inspirational quotes on the wonderfulness of riding a bike. We all remember what it was like the first time we tried to ride a bike. After some falls, a few bruises and lots of practice, we eventually succeed--and it's this feeling of accomplishment, freedom, and excitement that is prominently highlighted in *The Joy of Cycling*. Akin to learning how to drive for the first time, riding a bike offers very unique experiences and certainly is more accessible to a lot more people than driving a car. *The Joy of Cycling* is the perfect gift for all bike lovers.

Mapping the Megalopolis Glen David Kuecker, Alejandro Puga, 2017-12-22 *Mapping the Megalopolis: Order and Disorder in Mexico City* brings the humanities and the social sciences into a conversation about Mexico City in its social, political, and aesthetic manifestations. Through a shared exploration of the order and disorder that mutually constitute the city, contributing authors engage topics such as the privatization of public space, challenges to existing conceptualizations of the urban form, and variations on the flâneur and other urban actors. Mexico City is truly a city of versions, and *Mapping the Megalopolis* celebrates the intersection of the image of the city and the lived experience of it. Readers will find substantive entries on a great variety of Mexico City’s monumental and counter-monumental spaces, as well as some of its pivotal contemporary debates and cultural products. The volume serves both as supplemental reading on the world city or the Latin American city, and as a central text in a multidisciplinary study of Mexico City.
