Hugh Warwick

Cull of the Wild Hugh Warwick, 2024-03-28 LONGLISTED FOR THE WAINWRIGHT PRIZE FOR WRITING ON CONSERVATION Investigating the ethical and practical challenges of one of the greatest threats to biodiversity: invasive species. Across the world, invasive species pose a danger to ecosystems. The UN Convention on Biological Diversity ranks them as a major threat to biodiversity on par with habitat loss, climate change and pollution. Tackling this isn't easy, and no one knows this better than Hugh Warwick, a conservationist who loathes the idea of killing, harming or even eating animals. Yet as an ecologist, he is acutely aware of the need, at times, to kill invasive species whose presence harms the wider environment. Hugh explores the complex history of species control, revealing the global movement of species and the impacts of their presence. Combining scientific theory with gentle humour in his signature style, he explains the issues conservationists face to control non-native animals and protect native species – including grey and red squirrels on Anglesey, ravens and tortoises in the Mojave Desert, cane toads in Australia and the smooth-billed ani on the Galapagos – and describes cases like Pablo Escobar's cocaine hippos and the Burmese python pet trade. Taking a balanced and open approach to this emotive subject, Hugh speaks to experts on all sides of the debate. How do we protect endangered native species? Which species do we prioritise? And how do we reckon with the ethics of killing anything in the name of conservation?

Biological Invasions in South Africa Brian W. van Wilgen, John Measey, David M. Richardson, John R. Wilson, Tsungai A. Zengeya, 2020-03-10 This open access volume presents a comprehensive account of all aspects of biological invasions in South Africa, where research has been conducted over more than three decades, and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological, economic and social effects. It covers a broad range of themes, including history, policy development and implementation, the status of invasions of animals and plants in terrestrial, marine and freshwater environments, the development of a robust ecological theory around biological invasions, the effectiveness of management interventions, and scenarios for the future. The South African situation stands out because of the remarkable diversity of the country, and the wide range of problems encountered in its varied ecosystems, which has resulted in a disproportionate investment into both research and management. The South African experience holds many lessons for other parts of the world, and this book should be of immense value to researchers, students, managers, and policy-makers who deal with biological invasions and ecosystem management and conservation in most other regions.

Ecology and Conservation of Tropical Ungulates in Latin America Sonia Gallina-Tessaro, 2019-11-20 This book brings together the latest information on tropical ungulates in different Latin American countries. These animals are not only important from the point of view of their role in different ecosystems, but also have cultural value for people. The book also discusses topics such as habitat transformation and hunting as these species are an important source of food in many places. Addressing ungulate natural communities in diverse ecosystems and countries, the book provides information on specific aspects of each of the most representative species, and highlights topics to help readers better understand these species and develop effective management and conservation strategies. The information presented also reveals the need for more knowledge and will hopefully provide the incentive for continued studies on this important group of animals. This publication serves as a reference for academic research on ungulate ecology, behavior and dynamics, as well as the basis for conservation strategies.

Biological Invasions in Changing Ecosystems João Canning-Clode, 2015-01-01 When organisms are deliberately or accidentally introduced into a new ecosystem a biological invasion may take place. These so-called 'invasive species' may establish, spread and ecologically alter the invaded community. Biological invasions by animals, plants, pathogens or vectors are one of the greatest environmental and economic threats and, along with habitat destruction, a leading cause of global biodiversity loss. In this book, more than 50 worldwide invasion scientists cover our current understanding of biological invasions, its impacts, patterns and mechanisms in both aquatic and terrestrial systems.

Dopeworld Niko Vorobyov, 2020-08-18 In this irreverent ode to gonzo journalism, one writer travels the globe to explore the use of recreational drugs in cultures around the world. After I got out of jail, I was determined to find out more about how the issue of drugs not only landed me there, but has shaped the entire world: wars, scandals, coups, revolutions. I read every book, watched every documentary. I saved up to buy plane tickets. I went to Colombia, Mexico, Russia, Italy, Japan and the Afghan border—all in all, fifteen countries across five continents. Call me Narco Polo. Just as Anthony Bourdain's *No Reservations* did for the world of food, *Dopeworld* is an intoxicating journey into the world of drugs. From the cocaine farms in South America to the streets of Manila, *Dopeworld* traces the emergence of psychoactive substances and our intimate relationship with them. As a former drug dealer turned subversive scholar, with unparalleled access to drug lords, cartel leaders, street dealers and government officials, journalist Niko Vorobyov attempts to shine a light on the dark underbelly of the drug world. At once a bold piece of journalism and a hugely entertaining travelogue, *Dopeworld* is a brilliant and enlightening journey across the world, revealing how drug use is at the heart of our history, our lives, and our future.

It's a Wild Life: How My Life Became a Zoo Bud DeYoung, 2014-05-19 Pursuing your passion includes a whole lot of crap. For Bud DeYoung, that's about two hundred pounds a day! Since childhood, Bud had a passion for animals. As an adult, that passion led to the rescue of a bear who lived in his family's house, then more animals crowding for space, until Bud

eventually built an entire private zoo around his home in Michigan's Upper Peninsula. Along the way, a regular visitor named Carrie joined her passion for animals with Bud's. Together they now educate the public about animal conservation, battle the harsh winters and blazing summers, and daily dole out love to the hundreds of rescued animals in their care. Meanwhile, they teach by example how to make the world a better place while pursuing their passion. Welcome to the fascinating, heartwarming journey of one man, one woman, and an amazing cast of critters, whose stories will warm your soul. Welcome to the wild life of the DeYoung Family Zoo.

The Life Cycle charts her mission to find out why biodiversity is so important, what's happening to it, and what can be done to protect it. From the Pacific Ocean to rainforests and salt flats, Kate learns that armadillos can cross rivers by holding their breath, that Colombia has more species of birds than North America and Europe combined, and that in threatening ecosystems, we're tearing down our own life support system. En route, she witnesses the devastation of goldmining and oil drilling but finds hope in the incredible people working to regenerate habitats and communities. As she reaches the 'end of the world', she realises that to tackle biodiversity loss we all have a role to play.

Addicted Michael B. Miller, 2024-11-08 Humans are biologically hardwired to alter their mental state, drugs are the pathway, and America is their biggest consumer. From antiquity to modernity, use and prohibition have gone hand in hand. Addicted raises the curtain to expose the lies and fill in the blanks behind America's failed 50 year war on drugs and makes sense of the quagmire of misinformed laws and policy, blending Miller's investigative journalism with historical narrative. In addition, Miller tells the story of nature's three primary psychotropic plants and the history of government efforts to suppress them: Papaver Somniferum, the opium poppy, the drug of Asian mystery, which provides opium and its derivative alkaloids morphine and heroin; Erythroxylum Coca, which provides the cocaine of all night parties and glamor; and Cannabis Sativa, L., the historical intoxicant of rebellion and counterculture. These plants convert soil, water, nutrients, CO2, and light into complex chemical substances, which can elevate, intoxicate, and even heal. Addicted unravels the institutional mechanism that fuels the war's self-perpetuation, its abject failure, and its deplorable byproduct of racial injustice. The stories in Addicted feature a diverse cast of heroes, villains, and bureaucrats as well as all the post-Nixon Presidents who failed in their

version of the war.

Historia de las especies invasoras Ángel León Panal,2021-04-23 Gansos egipcios en París, plumas de avestruz por toda Europa, Darwin y las monkey flowers, cazadores de plantas, el extraño plan de Franklin Roosevelt, la enredadera que se comió —casi todo— el sur, el regalo del rey Kamehameha V, los renos de Islandia, las pieles de la guerra, Mr. North y los castores, la granja de Samuel Wilmot y los comerciantes de ostras, los cangrejos de Stalin, Edward Wilson, el hombre que quiso cambiar Australia... la historia de las invasiones biológicas por especies foráneas es apasionante, una formidable escuela de ecosistemas, zoología, botánica, economía, conflictos armados y caprichos de reyes... y hasta de narcos. Desde que en 1405 llegaron a las islas Canarias los primeros dromedarios, la modificación de los ecosistemas y el comercio mundial entre continentes han provocado que numerosas especies de plantas y animales hayan colonizado territorios que nunca hubiéramos imaginado. Algunas de estas invasiones cambiaron para siempre la vida natural a su alrededor, otras provocaron catástrofes relativamente limitadas en el tiempo o el espacio, los grupos más audaces se adaptaron desplazando a las especies autóctonas; pero en todos los casos aprendimos que el efecto mariposa propuesto por Lorenz también es aplicable a la Biología, y que, parafraseando al despecheretado guaperas Ian Malcolm en Jurassic Park, «la vida no puede contenerse, la vida se extiende a través de nuevos territorios y rompe las barreras dolorosamente, incluso peligrosamente... Sencillamente, la vida se abre camino». Escojan un calzado cómodo, llenen la mochila de víveres y cuadernos de notas, y acompáñennos en un fabuloso viaje por toda la geografía en busca de las especies invasoras. «La humanidad ha cubierto la Tierra con un manto que influye en toda la biosfera, dejando una profunda marca en ella. Nuestras acciones están dirigiendo el destino del resto de seres vivos. La introducción de especies podría ser identificado como uno de los jinetes de un apocalipsis ecológico. Un fenómeno que sigue abriendo nuevos capítulos mientras lees estas palabras».

Ecology, Conservation and Management of Wild Pigs and Peccaries Mario Melletti,Erik Meijaard,2017-11-23 Wild pigs inhabit vast areas in Europe, Southern Asia and Africa, and have been introduced in North and South America, while feral pigs are widespread in Australia and New Zealand. Many wild pig species are threatened with extinction, but Eurasian wild boar populations, however, are increasing in many regions. Covering all wild pig and peccary species, the Suidae and Tayassuidae families, this comprehensive review presents new information about the evolution, taxonomy and domestication of wild pigs and peccaries alongside novel case studies on conservation activities and management. One hundred leading experts from twenty five countries synthesise understanding of this group of species; discussing current research, and gaps in the knowledge of researchers, conservation biologists, zoologists, wildlife managers and students. This beautifully illustrated reference includes the long history of interactions between wild pigs and humans, the benefits some species have

brought us and their role and impact on natural ecosystems.

Every Day The River Changes Jordan Salama, 2022-11-15 An exhilarating travelogue for a new generation about a journey along Colombia's Magdalena River, exploring life by the banks of a majestic river now at risk, and how a country recovers from conflict. Richly observed. —Liesl Schillinger, The New York Times Book Review An American writer of Argentine, Syrian, and Iraqi Jewish descent, Jordan Salama tells the story of the Río Magdalena, nearly one thousand miles long, the heart of Colombia. This is Gabriel García Márquez's territory—rumor has it Macondo was partly inspired by the port town of Mompox—as much as that of the Middle Eastern immigrants who run fabric stores by its banks. Following the river from its source high in the Andes to its mouth on the Caribbean coast, journeying by boat, bus, and improvised motobalinera, Salama writes against stereotype and toward the rich lives of those he meets. Among them are a canoe builder, biologists who study invasive hippopotamuses, a Queens transplant managing a failing hotel, a jeweler practicing the art of silver filigree, and a traveling librarian whose donkeys, Alfa and Beto, haul books to rural children. Joy, mourning, and humor come together in this astonishing debut, about a country too often seen as only a site of war, and a tale of lively adventure following a legendary river.
