**Peter B. Kaufman**

Hollywood Online Ian London, 2024-03-07 Hollywood Online provides a historical account of motion picture websites from 1993 to 2008 and their marketing function as industrial advertisements for video and other media in the digital age. The Blair Witch Project is the most important example of online film promotion in cinema history. Over the last thirty years only a small number of major and independent distributors have converted internet-created buzz into box-office revenues with similar levels of success. Yet readings of how the film's internet campaign broke new ground in the summer of 1999 tend to minimize, overlook or ignore the significance of other online film promotions. Similarly, claims that Blair initiated a cycle of imitators have been repeated in film publications and academic studies for more than two decades. This book challenges three major narratives in studies about online film marketing: Hollywood's major studios and independents had no significant relationship to the internet in the 1990s; online film promotions only took off after 1999 because of Blair; and Hollywood cashed-in by initiating a cycle of imitators and scaling up corporate activities online. Hollywood Online tests these assumptions by exploring internet marketing up to and including the film's success online (Pre-Blair, 1993-9), then by examining the period immediately after Blair (Post-Blair, 2000-8) which broadly coincides with the rise and decline of DVD, as well as the emergence of the social media sites MySpace, Facebook and Twitter.

The New Enlightenment and the Fight to Free Knowledge Peter B. Kaufman, 2021-02-23 How do we create a universe of truthful and verifiable information, available to everyone? In *The New Enlightenment and the Fight to Free Knowledge*, MIT Open Learning's Peter B. Kaufman describes the powerful forces that have purposely crippled our efforts to share knowledge widely and freely. Popes and their inquisitors, emperors and their hangmen, commissars and their secret police—throughout history, all have sought to stanch the free flow of information. Kaufman writes of times when the Bible could not be translated—you'd be burned for trying; when dictionaries and encyclopedias were forbidden; when literature and science and history books were trashed and pulped—sometimes along with their authors; and when efforts to develop public television

and radio networks were quashed by private industry. In the 21st century, the enemies of free thought have taken on new and different guises—giant corporate behemoths, sprawling national security agencies, gutted regulatory commissions. Bereft of any real moral compass or sense of social responsibility, their work to surveil and control us are no less nefarious than their 16th- and 18th- and 20th- century predecessors. They are all part of what Kaufman calls the Monsterverse. The New Enlightenment and the Fight to Free Knowledge maps out the opportunities to mobilize for the fight ahead of us. With the Internet and other means of media production and distribution—video especially—at hand, knowledge institutions like universities, libraries, museums, and archives have a special responsibility now to counter misinformation, disinformation, and fake news—and especially efforts to control the free flow of information. A film and video producer and former book publisher, Kaufman begins to draft a new social contract for our networked video age. He draws his inspiration from those who fought tooth and nail against earlier incarnations of the Monsterverse—including William Tyndale in the 16th century; Denis Diderot in the 18th; untold numbers of Soviet and Central and East European dissidents in the 20th—many of whom paid the ultimate price. Their successors? Advocates of free knowledge like Aaron Swartz, of free software like Richard Stallman, of an enlightened public television and radio network like James Killian, of a freer Internet like Tim Berners-Lee, of fuller rights and freedoms like Edward Snowden. All have been striving to secure for us a better world, marked by the right balance between state, society, and private gain. The concluding section of the book, its largest piece, builds on their work, drawing up a progressive agenda for how today's free thinkers can band together now to fight and win. With everything shut and everyone going online, *The New Enlightenment and the Fight to Free Knowledge* is a rousing call to action that expands the definition of what it means to be a citizen in the 21st century.

The Internet Revolution in the Sciences and Humanities Alan G. Gross, Joseph E. Harmon, 2016-05-10 The Internet Revolution in the Sciences and Humanities takes a new look at C.P. Snow's distinction between the two cultures, a distinction that provides the driving force for a book that contends that the Internet revolution has sown the seeds for transformative changes in both the sciences and the humanities. It is because of this common situation that the humanities can learn from the sciences, as well as the sciences from the humanities, in matters central to both: generating, evaluating, and communicating knowledge on the Internet. In a succession of chapters, the authors deal with the state of the art in web-based journal articles and books, web sites, peer review, and post-publication review. In the final chapter, they address the obstacles the academy and scientific organizations face in taking full advantage of the Internet: outmoded tenure and promotion procedures, the cost of open access, and restrictive patent and copyright law. They also argue that overcoming these obstacles does not require revolutionary institutional change. In their view, change must be incremental, making use of the powers and prerogatives scientific and academic organizations already have.

**Love the Heartbeat of God for Revival** Dr. Jo Anna Watson, 2014-06-11 The end times are upon us and since God is more concerned about redemption than judgment He is calling all people, especially the church, to return to Him in first love. We have been given a commandment to love God with all of our mind, soul, will, and strength, and to love others as we love ourselves. Unfortunately, such love is lacking. Many are crying out for revival, but unless there is a turning back to God with sincere repentance, there will be no substance for the fires of revival to be ignited during these end times. God's love, as does all love, demands a response and He is waiting for your response. When love is returned wholeheartedly, who knows if God will rend the heavens and come down in power, thus ushering in a revival that will blaze through our churches and nations bringing the much needed healing to our lands.

*Bookshelves in the Age of the COVID-19 Pandemic* provides the first detailed scholarly investigation of the cultural phenomenon of bookshelves (and the social practices around them) since the start of the pandemic in March 2020. With a foreword by Lydia Pyne, author of *Bookshelf* (2016), the volume brings together 17 scholars from 6 countries (Australia, Canada, Germany, the Netherlands, the UK, and the USA) with expertise in literary studies, book history, publishing, visual arts, and pedagogy to critically examine the role of bookshelves during the current pandemic. This volume interrogates the complex relationship between the physical book and its digital manifestation via online platforms, a relationship brought to widespread public and scholarly attention by the global shift to working from home and the rise of online pedagogy. It also goes beyond the (digital) bookshelf to consider bookselling, book accessibility, and pandemic reading habits.

*Beyond the First Draft: The Art of Fiction* John Casey, 2014-08-18 For students and writers alike, a brilliant guide to the craft of writing by the National Book Award-winning author of *Spartina*. National Book Award winner John Casey is a masterful novelist who is also an inspiring and beloved teacher. In *Beyond the First Draft* he offers essential and original insights into the art of writing—and rewriting—fiction. Through anecdotes about other writers' methods and habits (as well as his own) and close readings of literature from Aristotle to Zola, the essays in this collection offer "suggestions about things to do, things to think about when your writing has got you lost in the woods." In "Dogma and Anti-dogma" Casey sets out the tried-and-true advice and then comments on when to apply it and when to ignore it. In "What's Funny" he considers the range of comedy from pratfalls to elegant wit. In "In Other Words" he discusses translations and the surprising effects that translating can have on one's native language. In "Mentors" he pays tribute to those who have guided him and other writers. Throughout the fourteen essays there are notes on voice, point of view, structure, and other crucial elements. This book is an invaluable resource for aspiring writers and a revitalizing companion for seasoned ones.

*Media Technologies* Tarleton Gillespie, Pablo J. Boczkowski, Kirsten A. Foot, 2014-01-24 Scholars from communication and media studies join those from science and technology studies to examine media technologies as complex, sociomaterial phenomena. In recent years, scholarship around media technologies has finally shed the assumption that these technologies are separate from and powerfully determining of social life, looking at them instead as produced by and embedded in distinct social, cultural, and political practices. Communication and media scholars have increasingly taken theoretical perspectives originating in science and technology studies (STS), while some STS scholars interested in information technologies have linked their research to media studies inquiries into the symbolic dimensions of these tools. In this volume, scholars from both fields come together to advance this view of media technologies as complex sociomaterial phenomena. The contributors first address the relationship between materiality and mediation, considering such topics as the lived realities of network

infrastructure. The contributors then highlight media technologies as always in motion, held together through the minute, unobserved work of many, including efforts to keep these technologies alive. Contributors Pablo J. Boczkowski, Geoffrey C. Bowker, Finn Brunton, Gabriella Coleman, Gregory J. Downey, Kirsten A. Foot, Tarleton Gillespie, Steven J. Jackson, Christopher M. Kelty, Leah A. Lievrouw, Sonia Livingstone, Ignacio Siles, Jonathan Sterne, Lucy Suchman, Fred Turner

**The African American Experience** Salman Akhtar, 2012-06-21 *The African American Experience: Psychoanalytic Perspectives* edited by Salman Akhtar brings together the contributions of distinguished mental health professionals and scholars of humanities to offer a multifaceted perspective on the transgenerational trauma of slavery, the hardship of single parent families, the ruthlessness of anti-black racism, and the crushing burden of poverty and social disenfranchisement on the African American individual. The book also sheds light on the resilience of spirit, the dignity of perseverance, and the glow of talent that is widespread in this group. It contains penetrating and informative biographical essays on Martin Luther King, Jr., Malcolm X, Mohammad Ali, Barack Obama, and Oprah Winfrey. Such discourse on human greatness is balanced by

the considerations of daily joy and anguish on clinical and societal levels. This wide-ranging and nuanced volume on the history, culture, and psychosocial struggles of African American people fills an important gap in the literature on psychotherapy and psychoanalysis.
