Public City Beau B Beza, Brendan Gleeson, 2014-11-25 Paul Mees' urban ideal counted on watchful, confident and well-informed citizenry to work collectively in a quest for fair and just cities. As such, The Public City is largely a critique of neo-liberalism and its arguably negative influence on urban prospects. As Mees explained it, neo-liberal urbanism was much more than a political aberration; it was a threat that imposed many costly failures in an age overshadowed by grave ecological challenges. Fifteen of Australia and New Zealand's leading urban scholars, including Professor Emeritus Jean Hillier and Professor Brendan Gleeson, have contributed to this collection. The Public City includes a foreword by the late Professor Sir Peter Hall, a world leader in urban planning from Britain. Kenneth Davidson, one of Australia's top economic columnists, has also contributed a chapter. The collective works in this book extend beyond an analysis of urban patterns to provide a blueprint for the improvement of civic and institutional purpose in the creation of the public city.

Real Estate and GIS Richard Reed, Chris Pettit, 2018-07-17 Real Estate and GIS focuses on the application of geographic information systems (GIS) and mapping technologies in the expanding property and real estate discipline. Whilst a thorough understanding of location is understood to be fundamental to the property discipline, real estate professionals and students have yet to harness the full potential of spatial analysis and mapping in their work. This book demonstrates the crucial role that technological advances can play in collecting, organising and analysing large volumes of real estate data in order to improve decision-making. International case studies, chapter summaries and discussion questions make this book the perfect textbook for property and applied GIS courses. Property and real estate professionals including surveyors, valuers, property developers, urban economists and financial analysts will also find this book an invaluable guide to the understanding and application of GIS technology within a real estate industry context.

Research Handbook on Housing, the Home and Society Keith Jacobs, Kathleen Flanagan, Jacqueline De Vries, Emma MacDonald, 2024-08-06 This dynamic Research Handbook explores key perspectives, topics and methodologies used to understand housing, the home and society. Pairing social theory with a broad range of case studies from the Global North and South, it offers a unique insight into the field.

Australian Urban Policy Robert Freestone,Bill Randolph,Wendy Steele,2024-03-19 Urban Australia confronts numerous challenges in the 21st century: climate change, housing, transport, greenspace, social inequality, and governance, among them. While state and local governments wrestle with these issues, they are continent wide and require national leadership, direction and participation. As a highly urbanised country without a national approach to urban policy, Australia is an outlier. Contributors to this book argue that this policy gap needs to be addressed. They ask: How have productive, sustainable and liveable cities so far been enhanced? Where have aspirations fallen short or produced negative outcomes? And what approaches are emerging to challenge existing and devise new urban policy settings? In the face of ongoing crises and escalating change, the need for policy to quickly transform urban Australia is daunting. Problems, wicked in their complexity, require innovative, ethical solutions. This book offers new ideas that challenge policy orthodoxy.

Open Cities | Open Data Scott Hawken,Hoon Han,Chris Pettit,2019-09-26 Today the world's largest economies and corporations trade in data and its products to generate value in new disruptive markets. Within these markets vast streams of data are often inaccessible or untapped and controlled by powerful monopolies. Counter to this exclusive use of data is a promising world-wide "open-data" movement, promoting freely accessible information to share, reuse and redistribute. The provision and application of open data has enormous potential to transform exclusive, technocratic "smart cities" into inclusive and responsive "open-cities". This book argues that those who contribute urban data should benefit from its production. Like the city itself, the information landscape is a public asset produced through collective effort, attention, and resources. People produce data through their engagement with the city, creating digital footprints through social media, mobility applications, and city sensors. By opening up data there is potential to generate greater value by supporting unforeseen collaborations, spontaneous urban innovations and solutions, and improved decision-making insights. Yet achieving more open cities is made challenging by conflicting desires for urban anonymity, sociability, privacy and transparency. This book engages with these issues through a variety of critical perspectives, and presents strategies, tools and case studies that enable this transformation.

Water Policy, Tourism, and Recreation Lin Crase,Suzanne O'Keefe,2012-12-06 This book explores the complicated interrelationships between freshwater resources and tourism and recreation. The focus is on Australia, but comparisons with the experience of other countries are also made throughout. Yet Australia has been at the forefront of conflicts over drought and water use, particularly for irrigated agriculture, as well as of the design of policies and institutions for water policy, so there are many lessons which can be applied to other parts of the world. The authors examine in detail the relationships between water economics and supply, and the needs for tourism and recreation. The book discusses water use and access and the conflict between urban and recreational demands. It considers the institutional arrangements around water and the significance of property rights, including water markets and water pricing. Theoretical and practical models for increasing

collaboration and cooperation such as the use of trusts are also developed and water trusts in the USA are examined. Specific chapters highlight the role of interest groups, such as the boating industry, to influence policy thinking and the practical trade-offs between access to urban water supplies and the requirements of recreation. Tourist behavior in relation to water use and pricing is also assessed.

Multigenerational Family Living Edgar Liu, Hazel Easthope, 2016-11-03 Multigenerational living – where more than one generation of related adults cohabit in the same dwelling – is recognized as a common arrangement amongst many Asian, Middle Eastern and Southern European cultures, but this arrangement is becoming increasingly familiar in many Western societies. Much Western research on multigenerational households has highlighted young adults' delayed first home leaving, the result of difficult economic prospects and the prolonged adolescence of generation Y. This book shows that the causes and results of this phenomenon are more complex. The book sheds fresh light on a range of structural and social drivers that have led multigenerational families to cohabit and the ways in which families negotiate the dynamic interactions amongst these drivers in their everyday lives. It critically examines factors such as demographics, the environment, culture and family considerations of identity, health, care and well-being, revealing how such factors reflect (and are reflected by) a retracting welfare state and changing understandings of families in an increasingly mobile world. Based on a series of qualitative and quantitative research projects conducted in Australia, the book provides an interdisciplinary examination of intergenerational cohabitation that explores a variety of concerns and experiences. It will appeal to scholars across the social sciences with interests in housing, demographics and the sociology of the family.

Universal Design 2014: Three Days of Creativity and Diversity H.A. Caltenco, P.-O. Hedvall, A. Larsson, 2014-05-30 Universal Design, Design for All and Inclusive Design are all aimed at dismantling physical and social barriers to inclusion in all areas of life. Engagement in universal design is on the increase worldwide as practitioners and researchers explore creative and desirable solutions to shape the future of universal design products and practices. This book is a collection of the papers presented at UD2014, the International Conference on Universal Design, held in Lund, Sweden, in June 2014. The conference offered a creative and diverse meeting place for all participants to exchange knowledge, experiences and ideas, and to build global connections and creative networks for future work on universal design. The themes of UD2014 span many aspects of societal life, and the papers included here cover areas as diverse as architecture, public transport, educational and play environments, housing, universal workspaces, and the Internet of things, as well as designs and adaptations for assistive technology. The book clearly demonstrates the breadth of universal design and its ongoing adoption in societies all over the world, and will be of interest to anyone whose work involves building a more inclusive environment for all.

Condominium Governance and Law in Global Urban Context Randy K. Lippert, Stefan Treffers, 2021-02-09 This book examines condominium, property, governance, and law in international and conceptual perspective and reveals this urban

realm as complex and mutating. Condominiums are proliferating the world over and transforming the socio-spatial organization of cities and residential life. The collection assembles arguably the most prominent scholars in the world currently working in this broad area and situated in multiple disciplines, including legal and socio-legal studies, political science, public administration, and sociology. Their analyses span condominium governance and law on five continents and in nine countries: the United States (US), China, Australia, the United Kingdom (UK), Canada, South Africa, Israel, Denmark, and Spain. Neglected issues and emerging trends related to condominium governance and law in cities from Tel Aviv to Chicago to Melbourne are discerned and analysed. The book pursues fresh empirical inquiries and cogent conceptual engagements regarding how condominiums are governed through law and other means. It includes accounts of a wide range of governance difficulties including chronic anti-social owner behaviour, short-term rentals, and even the COVID-19 pandemic, and how they are being dealt with. By uncovering crucial cross-national commonalities, the book reveals the global urban context of condominium governance and law as empirically rich and conceptually fruitful. The book will appeal to researchers and students in socio-legal studies, law, sociology, political science, urban studies, and public administration as well as journalists, social activists, policymakers, and condo owners/board members.

Management of Privatised Housing Vincent Gruis, Sasha Tsenkova, N. Nieboer, 2009-11-09 The sale of public and social housing has been a major aspect of housing policies in recent decades. Privatisation and a general retreat by governments from the housing arena have pushed up sales; this has been particularly evident within Eastern European countries and China but is also taking place in many Western European countries and Australia. Wherever it occurs, such privatisation has led to new challenges for housing management. Many estates are now a mix of public and private, raising questions about the division of responsibilities between different owners. Legislation to address this is not adequate and public managers are still hampered by the bureaucratic mechanisms within their organisations, while the new owners are not used to their responsibilities for maintenance. Added to this are the limited financial resources for renewal and maintenance among both public and private owners at a time when the need for investments is urgent, especially within the massive housing estates dating from the communist era. Experts from Australia, France, the Netherlands, UK, Switzerland, China, the Czech Republic, Moldavia, Russia, Serbia and Slovenia present their country's context and the policies and practice for managing privatised housing, together with case studies illustrating the issues described. How privatised public housing is managed is of international concern, which will benefit from an international exchange of knowledge and best practice. The comparative analysis offered in *Management of Privatised Housing: International Policies & Practice* makes a significant contribution to the literature on this important topic.

Compulsory Property Acquisition for Urban Densification Glen Searle, 2018-06-14 Densification has been a central method of achieving smart, sustainable cities across the world. This book explores international examples of the property

rights tensions involved in attempting to develop denser, more sustainable cities through compulsory acquisition of property. The case studies from Europe, North America, eastern Asia and Australia show how well, or not, property rights have been recognised in each country. Chapters explore the significance of local legal frameworks and institutions in accommodating property rights in the densification process. In particular, the case studies address the following issues and more: Whether compulsory acquisition to increase densification is justified in practice and in theory The specific public benefits given for compulsory acquisition The role the development industry plays in facilitating, encouraging or promoting compulsory acquisition What compensation or offsets are offered for acquisition, and how are they funded? Is there a local or national history of compulsory property acquisition by government for a range of purposes? Is compulsory acquisition restricted to certain types or locations of densification? Where existing housing is acquired, are there obligations to provide alternative housing arrangements? The central aim of the book is to summarize international experiences of the extent to which property rights have or have not been protected in the use of compulsory property acquisition to achieve sustainable cities via urban densification. It is essential reading for all those interested in planning law, property rights, environmental law, urban studies, sustainable urban development and land use policy.

Urban Consumption Peter Wesley Newton, 2011-11-21 Growth in human consumption is the transcending problem of our times. In the short span of 50 years, high income societies have shifted from an era when a 'simple life' was the norm to one where material consumption is pervasive. Consumption has become the engine for post-industrial societies. The liveability of cities in these societies is directly attributable to the consumption of resources - indirectly via their built environments and directly by their residents. This pattern of development is not sustainable. Nor is it equitable. *Urban Consumption* explores the prospect for winding back current levels of household consumption in high income societies, covering such critical areas as energy, water, food, housing and travel.

Urban Nation Robert Freestone, 2010-04-01 *Urban Nation: Australia's Planning Heritage* provides the first national survey of the historical impact of urban planning and design on the Australian landscape. This ambitious account looks at every state and territory from the earliest days of European settlement to the present day. It identifies and documents hundreds of places - parks, public spaces, redeveloped precincts, neighbourhoods, suburbs up to whole towns - that contribute to the distinctive character of urban and suburban Australia. It sets these significant planned landscapes within the broader context of both international design trends and Australian efforts at nation and city building.

Urban Regeneration in Australia Kristian Ruming, 2018-02-20 Drawing together leading urban academics, this book

provides the first detailed and cohesive exploration of contemporary urban regeneration in Australian cities. It explores the multiple aspects and processes of regeneration, including planning policy (strategic and regulatory), development financing, sustainability, remediation and transport. The book puts forward a unique and innovative 'scaled' analysis of urban regeneration, which positions urban regeneration as more than just large-scale redevelopment projects. It examines the processes of urban change which occur outside inner suburbs, which contribute to regenerating the city as a whole. The book moves beyond the planning and economic considerations of the regeneration process to describe the social and cultural aspects of regeneration. In doing so, it focuses on the management of higher-density environments, culture as a trigger for regeneration, and community opposition to the regeneration process. Urban Regeneration in Australia would benefit academics, students and professionals of urban geography and planning, as well as those with a particular interest in Australian urbanism.

Australia and China Perspectives on Urban Regeneration and Rural Revitalization Raffaele Pernice, Bing Chen, 2024-04-30 This edited volume reviews important contemporary issues through relevant case studies and research in China and Australia, such as the challenges posed by climate change, the development of eco-urban design, research on sustainable habitats and the relationship between ecology, green architecture and city regeneration, as well as, in general, the future of the city in the new millennium. The authors represent a broad selection of international experts, young scholars and established academics who discuss themes related to urban-rural destruction and economic and spatial regeneration techniques, the sustainable reconversion of natural landscapes and eco-urban design in the context of the current evolution of architectural and urbanism practice. The book aims to explain the conditions in which the contemporary debate about urban regeneration and rural revitalisation has developed in Australia and China, presented by different theoretical and methodological perspectives. It also provides a multifaceted and critical analysis of relevant case studies and urban experiences in Australia and China, focusing on environmental disruption, resized urban interventions and the need for more efficient and sustainable forms of regeneration and urban renewal practice in urban-rural contexts. This book will be an invaluable resource for architects, planners, architectural and urban historians, geographers, and scholars interested in modern Australian and Chinese architecture and urbanism.

Disruptive Urbanism Nicole Gurran, Paul J Maginn, Paul Burton, Crystal Legacy, Carey Curtis, Anthony Kent, Geoffrey Binder, 2020-06-09 Disruptive Urbanism examines how different forms and modes of the so called sharing economy are manifesting in cities and regions throughout the world, and how policy makers are responding to these disruptions. The emergence of the so called sharing economy and the disruptive technologies have profound implications for urban policy and governance. Initial expectations that sharing of homes, offices or vehicles could solve urban problems such as congestion or housing affordability have given way to concerns over job precarity, neighbourhood transformation, and the growing power

of platforms in disrupting urban governance and regulation. Contributors to this volume canvas these issues, examining how the sharing economy is manifesting in urban areas, the implications of this for urban living, and how policy makers are responding to these changes. Implications for urban research, policy, and practice are highlighted through chapters which address forms of urban sharing across housing, transport, work, and food and wider processes of globalisation and neoliberalism as they disrupt cities and urban policy making. Disruptive Urbanism will be of great interest to scholars of urban planning, urban governance, the sharing economy, and housing studies. The chapters were originally published as a special issue of Urban Policy and Research.

Energy Efficient Cities Ranjan K. Bose, 2010-04-29 These papers, presented at the Fifth Urban Research Symposium in Marseille, France, put into perspective ESMAP's prioritization of city-wide and sector specific urban energy initiatives to make cities energy efficient, providing analytical tools, policy insights, and good practices.

City Futures Research Centre Introduction

In today's digital age, the availability of City Futures Research Centre books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now

access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of City Futures Research Centre books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of City Futures Research Centre books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing City Futures Research Centre versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, City Futures Research Centre books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone

interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing City Futures Research Centre books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for City Futures Research

Centre books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, City Futures Research Centre books and manuals for download have transformed the way we access

information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of City Futures Research Centre books and manuals for download and embark on your journey of knowledge?
