El funcionamiento de las edificaciones Luis Humberto Casas Figueroa, 2019-06-22 El funcionamiento de las edificaciones: Administración y mantenimiento tiene como objetivo caracterizar, dentro del ciclo de vida de las edificaciones, la fase de funcionamiento; revisar los elementos conceptuales que permitan reconocer su importancia, destacar su papel en el proceso de producción de obras de edificación, expresado este en su puesta en operación y uso, con el fin último de prestar un servicio acorde con su tipología y la función para la cual fueron diseñadas y construidas, siendo necesaria la administración y el mantenimiento como acciones fundamentales e inherentes a la vida útil de las mismas. El Departamento de Tecnología de la Construcción de la Escuela de Arquitectura de la Facultad de Artes Integradas, con miras a aportar al desarrollo del conocimiento en el campo de la administración y el mantenimiento, formuló los programas académicos de Especialización en Mantenimiento y Conservación de Edificaciones, y en Administración y Desarrollo Inmobiliario. Los documentos base para la formulación de estas especializaciones han sido un referente importante para la elaboración del presente libro, junto con la investigación realizada por los profesores Casas y Barona del grupo de Investigación AMSESTRA, en lo relacionado con la fase de funcionamiento del proceso de producción de obras de edificación.

Diseño sismorresistente de edificios Luis M. Bozzo Rotondo,Alex H. Barbat,1999 Este libro está dirigido a estudiantes de grado y postgrado, así como a ingenieros estructurales, arquitectos y otros profesionales interesados en el diseño sismorresistente de edificios. Su objetivo es el de dar a conocer parte de la cuantiosa información experimental, teórica y práctica existente en los centros de investigación sobre este tema y contribuir a la difusión de técnicas avanzadas. Por ello incluye tanto los fundamentos y técnicas de diseo convencionales, actualmente recogidos en las normativas de diversos países, como las técnicas avanzadas que sin duda serán empleadas en un futuro próximo. Además, los autores hacen diversas aportaciones, y no sólo desde el punto de vista conceptual, como la presentación de los disipadores de energía como la continuación natural de las técnicas actualmente establecidas, sino también desde el punto de vista práctico, al presentar novedosos sistemas estructurales, sistemas de aislamiento de base y de disipación de energía, junto con métodos numéricos para su simulación, así como metodologías de inteligencia artificial aplicadas al razonamiento estructural cualitativo.

From Fundamentals to Applications in Geotechnics D. Manzanal,A.O. Sfriso,2015-12-11 The work of geotechnical engineers contributes to the creation of safe, economic and pleasant spaces to live, work and relax all over the world. Advances are constantly being made, and the expertise of the profession becomes ever more important with the increased pressure on space and resources. This book presents the proceedings of the 15th Pan-American Conference on Soil Mechanics and Geotechnical Engineering (XV PCSMGE), held in Buenos Aires, Argentina, in November 2015. This conference, held every four years, is an important opportunity for international experts, researchers, academics, professionals and geo-engineering companies to meet and exchange ideas and research findings in the areas of soil mechanics, rock mechanics, and their applications in civil, mining and environmental engineering. The articles are divided into nine sections: transportation geotechnics; in-situ testing; geo-engineering for energy and sustainability; numerical modeling in geotechnics; foundations and ground improvement; unsaturated soil behavior; embankments, dams and tailings;

excavations and tunnels; and geo-risks, and cover a wide spectrum of issues from fundamentals to applications in geotechnics. This book will undoubtedly represent an essential reference for academics, researchers and practitioners in the field of soil mechanics and geotechnical engineering. In this proceedings, approximately 65% of the contributions are in English, and 35% of the contributions are in Spanish or Portuguese.
