Images of Women in Hispanic Culture Teresa Fernandez Ulloa,2016-08-17 This book studies the ways traditional polarized images of women have been used and challenged in the Hispanic world, especially during the 20th century and the beginning of the 21st century by writers and the media, but also in earlier time periods. The chapters analyze the image of women in specific political periods such as Francoism or the Kirchners' administration, stereotypes of women in films in Mexico and Chile, and the representation of women in textbooks, among other topics. Contributions also show how two women writers, in the 17th and the 19th centuries, viewed the role of women in their society.

Acerca de las experiencias de capacitación con profesores de Biología ,

La comprensión del universo: una vida en la divulgación de la ciencia Luis Estrada,2019-04-22 Se presenta en este libro una selección de los escritos de Luis Estrada Martínez, realizados a lo largo de una notable carrera académica que abarcó seis décadas. Estos trabajos conforman el testimonio único de una vida dedicada al estudio y la comprensión, hasta donde lo permiten las capacidades humanas, de la naturaleza de las cosas; del universo y del caudal de hechos físicos, químicos y biológicos que lo constituyen. Fiel a su lugar y tiempo, esa comprensión requirió que el autor se adentrara en las ciencias físicas que revolucionaron dramáticamente nuestra imagen de la naturaleza (y del sitio de la especie humana en ella) durante el siglo xx, así como en otras disciplinas científicas que colaboraron desde distintos puntos de mira para construir el gran y abigarrado mosaico con el que hemos ido completando parcialmente esa pasmosa imagen. Una vida que tuvo como impulso básico entender qué podemos saber, y cómo, sobre las causas naturales que producen (y han producido históricamente) el mundo al que los humanos llegamos y con el que de mil maneras interactuamos.

Aportes de la biología del suelo a la agroecología Marina Sánchez de Prager,2018-06-06 La agroecología es la ciencia de encuentro de los sistemas biológicos y sociales en torno a la planificación, diseño y construcción de agroecosistemas sostenibles. Su práctica, ciencia y movimiento social trasciende las fincas y se inserta en la tierra viva desde diferentes perspectivas en lo local, territorial, regiones, países y globalmente. Ahora comprendemos que la vida surge sobre la cooperación y las sinergias antes que sobre la competencia. La evolución del suelo-tierra vivo ilustra ampliamente esta enseñanza. Le es inherente la biodiversidad, propia de la complejidad ecosistémica, imitada por los campesinos y agricultores al establecer agroecosistemas ecológicos. El suelo vivo es espacio de innovaciones metabólicas y de comportamientos que propician la homeóstasis agro y ecosistémica.
