The Nonconformists Brian K. Goodman,2023-06-20 How risky encounters between American and Czech writers behind

the Iron Curtain shaped the art and politics of the Cold War and helped define an era of dissent. “In some indescribable way, we are each other’s continuation,” Arthur Miller wrote of the imprisoned Czech playwright Václav Havel. After a Soviet-led invasion ended the Prague Spring, many US-based writers experienced a similar shock of solidarity. Brian Goodman examines the surprising and consequential connections between American and Czech literary cultures during the Cold War—connections that influenced art and politics on both sides of the Iron Curtain. American writers had long been attracted to Prague, a city they associated with the spectral figure of Franz Kafka. Goodman reconstructs the Czech journeys of Allen Ginsberg, Philip Roth, and John Updike, as well as their friendships with nonconformists like Havel, Josef Škvorecký, Ivan Klíma, and Milan Kundera. Czechoslovakia, meanwhile, was home to a literary counterculture shaped by years of engagement with American sources, from Moby-Dick and the Beats to Dixieland jazz and rock ‘n’ roll. Czechs eagerly followed cultural trends in the United States, creatively appropriating works by authors like Langston Hughes and Ernest Hemingway, sometimes at considerable risk to themselves. *The Nonconformists* tells the story of a group of writers who crossed boundaries of language and politics, rearranging them in the process. The transnational circulation of literature played an important role in the formation of new subcultures and reading publics, reshaping political imaginations and transforming the city of Kafka into a global capital of dissent. From the postwar dream of a “Czechoslovak road to socialism” to the neoconservative embrace of Eastern bloc dissidence on the eve of the Velvet Revolution, history was changed by a collision of literary cultures.

True Truth Art Lindsley, 2004-04-08 Art Lindsley ably demonstrates that faith in Christ is necessarily opposed to and incompatible with the abuses of oppression, arrogance, intolerance, self-righteousness, closed-mindedness and defensiveness. Surprisingly, he shows that it is relativism which often harbors dangerous, inflexible absolutisms.

The Truth of Papal Claims Raphael Cardinal Merry del Val, 2012-04-07 Did Christ found His Church on St. Peter? Was Peter prince of the Apostles and visible head of the Church? Was he infallible in his doctrinal teaching? Had he the power to make laws that bind all Christians? Was he the first bishop of Rome? Were his privileges communicated by divine law to succeeding Roman Pontiffs? Is there a consensus on the answer to these questions discernible in the New Testament and in

the Early Fathers and Councils? No one could be better qualified than Cardinal Merry del Val (1865-1930) to answer these questions. Distinguished for his learning and holiness, he was selected by Pope St. Pius X as his right hand man and spent his adult life in the most senior Vatican posts. This book, written in reply to Protestant propaganda, effortlessly sweeps away errors and misunderstandings leaving the truth plain to any sincere reader. It quotes all the major sources of the early centuries. An ideal book to instruct Catholics or convert Protestants.

Truth Like the Sun Jim Lynch,2012-01-01 It is 1962, and the city of Seattle is about to be famous. Roger Morgan, an audacious young promoter, wants to pull off the ultimate coup de théâtre: the World's Fair, rising out of the downtown fog to show the whole nation that the future has arrived. In the run-up to the Fair's grand opening, Roger is everywhere at once - entertaining Elvis Presley and Lyndon Johnson, dipping in and out of secret card games and smooth-talking his way out of awkward financial questions - all under the haze of many a whiskey and the shadow of a looming crisis in Cuba. Roger dazzles everyone he meets, and is still a backstage power forty years later when, at the age of seventy, he makes a surprise bid for mayor. Helen Gulanos, a journalist new in town and keen to make her mark, sees her retrospectives on the 1962 Fair become front-page news as Roger's candidacy ignites the public imagination. She resolves to uncover the real Roger from behind the warm handshakes and glossy receptions - because even Seattle's golden boy must have something to hide. Woven into in this city of dreams is a cat-and-mouse-tale of back-room deals, idealism and pragmatism, the best and worst ambitions, and the aspirations that shape our communities and our lives. Hard-nosed yet profoundly humane, Truth Like the Sun is the most ambitious novel yet from the beloved author of The Highest Tide.

The Whole Truth P. J. E. Peebles,2022-08-02 From the Nobel Prize-winning physicist, a personal meditation on the quest for objective reality in natural science A century ago, thoughtful people questioned how reality could agree with physical theories that kept changing, from a mechanical model of the ether to electric and magnetic fields, and from homogeneous matter to electrons and atoms. Today, concepts like dark matter and dark energy further complicate and enrich the search for objective reality. The Whole Truth is a personal reflection on this ongoing quest by one of the world's most esteemed cosmologists. What lies at the heart of physical science? What are the foundational ideas that inform and

guide the enterprise? Is the concept of objective reality meaningful? If so, do our established physical theories usefully approximate it? P. J. E. Peebles takes on these and other big questions about the nature of science, drawing on a lifetime of experience as a leading physicist and using cosmology as an example. He traces the history of thought about the nature of physical science since Einstein, and succinctly lays out the fundamental working assumptions. Through a careful examination of the general theory of relativity, Einstein's cosmological principle, and the theory of an expanding universe, Peebles shows the evidence that we are discovering the nature of reality in successive approximations through increasingly rigorous scrutiny. A landmark work, *The Whole Truth* is essential reading for anyone interested in the practice of science.

Why Do We Quote? Ruth Finnegan, 2011-03-01 Quoting is all around us. But do we really know what it means? How do people actually quote today, and how did our present systems come about? This book brings together a down-to-earth account of contemporary quoting with an examination of the comparative and historical background that lies behind it and the characteristic way that quoting links past and present, the far and the near. Drawing from anthropology, cultural history, folklore, cultural studies, sociolinguistics, literary studies and the ethnography of speaking, Ruth Finnegan's fascinating study sets our present conventions into crosscultural and historical perspective. She traces the curious history of quotation marks, examines the long tradition of quotation collections with their remarkable recycling across the centuries, and explores the uses of quotation in literary, visual and oral traditions. The book tracks the changing definitions and control of quoting over the millennia and in doing so throws new light on ideas such as imitation, allusion, authorship, originality and plagiarism.

Humor in Pedagogy in Tertiary Education in the Age of COVID-19 Philip Aka, Sencer Yeralan, 2022-07-11 Using the major theories of humor as a point of departure, *Humor in Pedagogy in Tertiary Education in the Age of COVID-19: Bosnia in Comparative Perspective* argues for the expanded use of humor as pedagogy in Bosnian tertiary education, unfazed by the pandemic infections of COVID-19, with teachable lessons for other countries. It argues that the measures put in place to contain the spread of the pandemic neither foreclosed nor rendered less exigent, the drive for more quality education in Bosnia achieved through various means that include creative application of humor in tertiary education. Rather than minimize it, the era of non-classroom-based instructions ushered by COVID-19 offers an opportunity to promote intelligible learning by infusion of humor into every aspect of tertiary instruction, from course syllabus to student evaluation of faculty teaching. Key highlights of this book include the features of Bosnian self-parody that it articulates as material for pedagogy in Bosnian tertiary classrooms, the boundaries for judicious use of humor in pedagogy that it spells out, and its formulation related to the continued value of humor in the Bosnian tertiary classroom unfazed by the public health challenges of COVID-19. The book is designed as an innovative and less contentious contribution to the debates on educational reforms in postwar Bosnia, a contribution focused positively around the quality—and quantity—of instructions in tertiary institutions in Bosnia.
