*Coming of Age at the End of Nature* Julie Dunlap, Susan A. Cohen, 2016-09-19 *Coming of Age at the End of Nature* explores a new kind of environmental writing. This powerful anthology gathers the passionate voices of young writers who have grown up in an environmentally damaged and compromised world. Each contributor has come of age since Bill McKibben foretold the doom of humanity's ancient relationship with a pristine earth in his prescient 1988 warning of climate change, *The End of Nature*. What happens to individuals and societies when their most fundamental cultural, historical, and ecological bonds weaken—or snap? In *Coming of Age at the End of Nature*, insightful millennials express their anger and love, dreams and fears, and sources of resilience for living and thriving on our shifting planet. Twenty-two essays explore wide-ranging themes that are paramount to young generations but that resonate with everyone, including redefining materialism and environmental justice, assessing the risk and promise of technology, and celebrating place anywhere from a wild Atlantic island to the Arizona desert, to Baltimore and Bangkok. The contributors speak with authority on problems

facing us all, whether railing against the errors of past generations, reveling in their own adaptability, or insisting on a collective responsibility to do better. Contributors include Blair Braverman, Jason Brown, Cameron Conaway, Elizabeth Cooke, Amy Coplen, Ben Cromwell, Sierra Dickey, Ben Goldfarb, CJ Goulding, Bonnie Frye Hemphill, Lisa Hupp, Amaris Ketcham, Megan Kimble, Craig Maier, Abby McBride, Lauren McCrady, James Orbesen, Alycia Parnell, Emily Schosid, Danna Staaf, William Thomas, and Amelia Urry.

**Guy Davenport** Andre Furlani,2007-07-20 Guy Davenport (1927-2005), an American writer of fiction, poetry, criticism, and essays, a translator, painter, intellectual, and teacher, brought a breadth and depth of knowledge to his pursuits that few other writers could approach, let alone appraise. In Andre Furlani, this twentieth-century American master has finally found an apt critical reader. In this first sustained critical study of Davenport, Furlani elucidates the depths of Davenport's fiction and its poetic precedents, brings a rare understanding to the author's reworking of twentieth-century literature and intellectual history, and offers unusual insight into his compositional technique. Furlani explores key themes across the spectrum of Davenport's fiction: pastoral utopia; twentieth-century dystopia; sexual ethics; the mythologizing of childhood; the inseparability of the archaic and the modern; and a celebration of the union of sophia, eros, and poesia. Whether Davenport's view of art and the cosmos should be called postmodern is a question that Furlani considers closely--offering, finally, a new aesthetic for this American original who, in these pages, at last receives the thorough and meticulous attention he has long merited.

**Artbibliographies Modern** ,1993 Abstracts of journal articles, books, essays, exhibition catalogs, dissertations, and exhibition reviews. The scope of ARTbibliographies Modern extends from artists and movements beginning with Impressionism in the late 19th century, up to the most recent works and trends in the late 20th century. Photography is covered from its invention in 1839 to the present. A particular emphasis is placed upon adding new and lesser-known artists and on the coverage of foreign-language literature. Approximately 13,000 new entries are added each year. Published with title LOMA from 1969-1971.

*The Cosmos* Jay M. Pasachoff,Alex Filippenko,2013-08-12 An exciting introduction to astronomy, the fourth edition of this book uses recent discoveries and stunning photography to inspire non-science majors about the Universe. Written by two highly experienced and engaging instructors, each chapter has been fully updated, with more than 200 new images throughout, including recent images from space missions and the world's best observatories. The newly redesigned text is

organized as a series of stories, each presenting the history of the field, the observations made and how they fit within the process of science, our current understanding and what future observations are planned. Math is provided in boxes and easily read around, making the book suitable for courses taking either mathematical or qualitative approaches. New discussion questions encourage students to think widely about astronomy and the role science plays in our everyday lives and podcasts for each chapter aid studying and comprehension.
