Peter Stanwick, Sarah Stanwick

Corporate Purpose, CSR, and ESG Jens-Hinrich Binder, Klaus Hopt, Thilo Kuntz, 2024-09-04 In recent years, the longstanding debate between shareholder-oriented and stakeholder-oriented models of corporate governance for large listed, or public corporations, has experienced a resurgence. Simultaneously, a wave of new regulations has reshaped the legal landscape, compelling businesses to integrate public objectives - such as environmental protection or the social interests of specific stakeholder groups - into their decision-making processes, which were traditionally driven solely by profitability considerations. Against this background, the book brings together economic, comparative, historical, and doctrinal perspectives of scholars from US and European legal academia. The ongoing discourse regarding the fundamental role of public corporations in economies and society is vivid and rather different, across Europe, and the US. Filling a gap in comparative literature on these themes, this volume further explores commonalities across these varying legal landscapes, while remaining cognizant of distinct, cultural, legal, and economic contexts. Most strikingly, the contributions here point to the European emphasis on stakeholder-oriented regulation, in contrast to the US-American focus on shareholder value. Providing a comprehensive analysis of recent legal developments in this space, this volume serves as an essential theoretical guide to debates around corporate purpose, CSR, and ESG today.

Sustainability and Social Responsibility: Regulation and Reporting Graham Gal, Orhan Akisik, William

Wooldridge, 2017-08-08 This book addresses key issues related to the choice between governments regulating and enforcing society's sustainability and social responsibility objectives, and firms reporting on their sustainable and socially responsible activities so stakeholders can exert pressure on firms to achieve society's goals. While these may be considered as the two endpoints of a continuum, it is clear that there are differing perspectives on the role of governments in sustainability and responsibility. At one end of this continuum are stakeholders who believe the only way to achieve a sustainable and socially conscious society is to establish and enforce regulations with the concomitant governmental organizations to oversee and enforce those regulations. At the other end are those who consider firms to be crucial organizations for achieving sustainability and socially responsible outcomes, and who feel it is the responsibility of stakeholders to determine the legitimacy of firms' actions. It is probably not the case that any economies exist at either end of this continuum, but it is clear that the availability of reliable information is critical for any stakeholder to review the performance of either the governments or the firms. This book presents a varied set of papers that explore the issues that must be considered, regardless of which position a stakeholder takes.

Prozesse im eigenen Unternehmen Aleksandar Duric, Martin Hüppauff, 2019-10-09 Durch forcierte Globalisierung und Digitalisierung sowie wachsenden Wettbewerb sind Unternehmen gezwungen, ihre internen Abläufe und Strukturen ständig an neue Rahmenbedingungen anzupassen.
