The Happiest Toddler on the Block Harvey Karp, M.D.,2008-08-26 Perfect for expecting parents who want to prepare themselves for the challenging toddler years (which starts around eight months of age), this essential guide, a national bestseller by respected pediatrician and child development expert Dr. Harvey Karp, not only helps reduce tantrums but makes happy kids even happier by boosting patience, cooperation, and self-confidence. Toddlers can drive you bonkers...so adorable and fun one minute...so stubborn and demanding the next! Yet, as unbelievable as it sounds, there is a way to turn the daily stream of “nos” and “don’ts” into “yeses” and hugs...if you know how to speak your toddler’s language. In one of the most useful advances in parenting techniques of the past twenty-five years, Dr. Karp reveals that toddlers, with their immature brains and stormy outbursts, should be thought of not as pint-size people but as pintsize...cavemen. Having noticed that the usual techniques often failed to calm crying toddlers, Dr. Karp discovered that the key to effective communication was to speak to them in their own primitive language. When he did, suddenly he was able to soothe their outbursts almost every time! This amazing success led him to the realization that children between the ages of one and four go through four stages of “evolutionary” growth, each linked to the development of the brain, and each echoing a step in prehistoric humankind’s journey to civilization: • The “Charming Chimp-Child” (12 to 18 months): Wobbles around on two legs, grabs everything in reach, plays a nonstop game of “monkey see monkey do.” • The “Knee-High Neanderthal” (18 to 24 months): Strong-willed, fun-loving, messy, with a vocabulary of about thirty words, the favorites being “no” and “mine.” • The “Clever Caveman” (24 to 36 months): Just beginning to learn how to share, make friends, take turns, and use the potty. • The “Versatile Villager” (36 to 48 months): Loves to tell stories, sing songs and dance, while trying hard to behave. To speak to these children, Dr. Karp has developed two extraordinarily effective techniques: 1) The “fast food” rule—restating what your child has said to make sure you got it right; 2) The four-step rule—using gesture, repetition, simplicity, and tone to help your irate Stone-Ager be happy again. Once you’ve mastered “toddler-ese,” you will be ready to apply behavioral techniques specific to each stage of your child’s development, such as teaching patience and calm, doing time-outs (and time-ins), praise through “gossiping,” and many other strategies. Then all the major challenges of the toddler years—including separation anxiety, sibling rivalry, toilet training, night fears, sleep problems, picky eating, biting and hitting, medicine taking — can be handled in a way that will make your toddler feel understood. The result: fewer tantrums, less yelling, and, best of all, more happy, loving time for you and your child.

Shelov, M.D., editor in chief, American Academy of Pediatrics’ Caring for Your Baby and Young Child With Dr. Karp’s sensible advice, you will be able to soothe even the fussiest infants and increase their sleep. His highly successful method is based on four revolutionary concepts: The Fourth Trimester (re-creating the womblike atmosphere your newborn still yearns for), The Calming Reflex (an “off switch” all babies are born with), The 5 S’s (five easy methods to turn on the calming reflex), and The Cuddle Cure (combining the 5 S’s to calm even colicky babies). THE HAPPIEST TODDLER ON THE BLOCK How to Eliminate Tantrums and Raise a Patient, Respectful, and Cooperative One- to Four-Year-Old “An informative and engaging romp about toddlers. The Happiest Baby on the Block Harvey Karp, M.D., 2008-11-19 Perfect for expecting parents who want to provide a soothing home for the newest member of their family, The Happiest Baby on the Block, the national bestseller by respected pediatrician and child development expert Dr. Harvey Karp, is a revolutionary method for calming a crying infant and promoting healthy sleep from day one. In perhaps the most important parenting book of the decade, Dr. Harvey Karp reveals

an extraordinary treasure sought by parents for centuries --an automatic “off-switch” for their baby’s crying. No wonder pediatricians across the country are praising him and thousands of Los Angeles parents, from working moms to superstars like Madonna and Pierce Brosnan, have turned to him to learn the secrets for making babies happy. Never again will parents have to stand by helpless and frazzled while their poor baby cries and cries. Dr. Karp has found there IS a remedy for colic. “I share with parents techniques known only to the most gifted baby soothers throughout history ...and I explain exactly how they work.” In a innovative and thought-provoking reevaluation of early infancy, Dr. Karp blends modern science and ancient wisdom to prove that newborns are not fully ready for the world when they are born. Through his research and experience, he has developed four basic principles that are crucial for understanding babies as well as improving their sleep and soothing their senses: ·The Missing Fourth Trimester: as odd as it may sound, one of the main reasons babies cry is because they are born three months too soon. ·The Calming Reflex: the automatic reset switch to stop crying of any baby in the first few months of life. ·The 5 “S’s”: the simple steps (swaddling, side/stomach position, shushing, swinging and sucking) that trigger the calming reflex. For centuries, parents have tried these methods only to fail because, as with a knee reflex, the calming reflex only works when it is triggered in precisely the right way. Unlike other books that merely list these techniques Dr. Karp teaches parents exactly how to do them, to guide cranky infants to calm and easy babies to serenity in minutes...and help them sleep longer too. ·The Cuddle Cure: the perfect mix the 5 “S’s” that can soothe even the most colicky of infants. In the book, Dr. Karp also explains: What is colic? Why do most babies get much more upset in the evening? How can a parent calm a baby--in mere minutes? Can babies be spoiled? When should a parent of a crying baby call the doctor? How can a parent get their baby to sleep a few hours longer? Even the most loving moms and dads sometimes feel pushed to the breaking point by their infant’s persistent cries. Coming to the rescue, however, Dr. Karp places in the hands of parents, grandparents, and all childcare givers the tools they need to be able to calm their babies almost as easily as...turning off a light. From the Hardcover edition.

Momfidence! Paula Spencer, 2010-08-25 Lose the Guilt, Love Your Instincts If the latest “breakthrough” child-development theory, parenting technique, or child-appropriate diet makes you worry or groan (or just want to lie down for a nap), it’s time to make way for Momfidence! Paula Spencer, parenting expert and mother of four, provides refreshing, down-to-earth proof that most of the business of raising confident, healthy children involves nothing more complicated than trusting your instincts, using common sense, and above all, hanging on to your humor. Momfidence! is: •Using “perfect” only to describe such wonders as a ripe peach, a cloudless day at the beach, or a husband who does diapers and dinner. . . It has no application whatsoever in describing motherhood. •Recognizing that there are appropriate times and places for lying, yelling, threatening, bribing, and saying “I told you so” •Sending yourself to time-out—preferably with chocolate and/or your spouse •Being completely amnesiac about the day’s exasperating transgressions when you peek in your children’s bedrooms at night and watch them sleep Based on her popular Woman’s Day and Parenting columns, Momfidence! explains how obsessing less and winging it more can keep you sane—and your kids healthy and happy. It’s a hilarious look at “perfect motherhood” that cuts parents a long-overdue break by reminding us that we’re not the amateurs here—we’re all experts, too.
