Metodologia de la investigaciøn César Augusto Bernal Torres, 2006 Investigación en la sociedad del conocimiento - Importancia y pertinencia de la investigación en la sociedad del conocimiento - Ciencia, progreso, calidad de vida - Fundamentos epistemológicos de la investigación científica y de las ciencias sociales - Epistemología o filosofía de las ciencias - Sobre el concepto de ciencias sociales - Complejidad e interdisciplinariedad de la ciencia - Proceso de investigación científica - Métodos del proceso de investigación científica - Proceso de investigación científica - Instrumentos de medición y recolección de información primaria en ciencias sociales - Instrumentos de recolección de información.

Metodología de la investigación Humberto Ñaupas Paitán, 2014-01-01 Según los autores, “ciencia e investigación son las dos coordenadas fundamentales de la universidad moderna que aspira al desarrollo de su región y del país entero. La primera entraña docencia universitaria basada en teorías científicas rigurosamente verificadas o demostradas, mediante el método científico. La segunda implica la misión fundamental de la universidad: descubrimiento o producción de nuevos conocimientos científicos. Entre ambas existe una relación muy estrecha ya que no puede concebirse ciencia sin investigación, ni investigación sin ciencia” “En consecuencia la universidad peruana, tiene el reto de cambiar, de renacer de sus propias cenizas, como el ave fénix, para impulsar la ciencia, la investigación científica- tecnológica e innovación, así como la creación intelectual y otras actividades que afirmen su vocación humanística de investigación y de servicio a su entorno local, regional, nacional y continental.” Justamente el contenido de esta quinta edición actualizada y ampliada está destinada a ofrecer un modelo de ciencia e investigación humanística, es decir que permita resolver los angustiantes problemas regionales y nacionales. Como dicen los autores es una contribución didáctica para aprender a investigar y redactar la tesis; no son reglas de oro, ni los ars inveniendi del que nos habla el eminente filósofo Mario Bunge, pero si es una brújula orientadora para no perderse en el mundo inquietante de la investigación científica. Para facilitar la lectura de esta quinta edición , de 15 capítulos, los autores acompañan: notas explicativas, referencias bibliográficas y documentales, glosarios, actividades de reflexión y aplicación, mapa conceptuales, en cada capítulo y 33 anexos al final del texto, para ejemplificar, técnicas , instrumentos y tablas estadísticas, tratados en el texto.

Metodología de la investigación cuantitativa - cualitativa y redacción de la tesis Humberto Ñaupas Paitán, Elías Mejía Mejía, Eliana Novoa Ramírez, Alberto Villagómez Paucar, 2014-01-01 Mucho se ha escrito sobre la ciencia, la investigación científica y la esencia de la universidad, pero casi siempre en estilo ditirámico, y pocas veces con seriedad y responsabilidad. Los políticos tradicionales siempre han dicho que: la ciencia es poder, vivimos en la era del conocimiento, la investigación científica es la misión esencial de la universidad, universidad que no investiga no es universidad, etc. etc.; sin embargo cuando se trata de corregir las distorsiones de la misión de la universidad peruana, los congresistas ligados a intereses particulares, el ministro de Economía y Finanzas, el Fiscal de la Nación, y funcionarios del poder ejecutivo, legislativo cuando se trata de enfrentar los problemas relacionados con estos ítems, no ven, no escuchan, no hablan y adoptan el estilo del mono sabio. En consecuencia la universidad peruana, aunque de acuerdo con la ley universitaria obsoleta que nos rige, no existe este ente universitario, tiene el reto de cambiar, de renacer de sus propias cenizas, como el ave fénix, para impulsar la ciencia, la investigación científica y otras actividades que afirmen su vocación humanística de servicio a su entorno local, regional, nacional y mundial.

Fundamentos de investigación - Un enfoque por competencias 2a edición Erica María LARA MUÑOZ, 2013-08-06 La obra está directamente referida a los aspectos prácticos y operativos de la redacción científica, expone los métodos y técnicas básicas para su realización. En ello radica la diferencia fundamental entre este libro y otros similares. Su contenido cubre completamente el contenido del programa de la materia Fundamentos de Investigación, que se imparte en el Sistema Nacional de Educación Superior Tecnológica, además repasa algunos elementos de las técnicas de estudio, por lo que puede ser empleado en cursos de nivelación o propedéuticos. Decision Making Systems in Business Administration ,2013 This book analyzes some of the most recent advances in the field of decision making and fuzzy systems applied to business and economics presented at the International Conference on Modeling and Simulation (MS'12 Rio de Janeiro), 10-13 December, 2012. In this conference, a special focus is given to the fundamental concept of sustainable development. Other key applications in business, economics and finance are also considered. In general, it is very useful for graduate students and researchers interested in pursuing research that combines quantitative techniques such as modeling and simulation and decision making with business and economic problems. This is especially useful when dealing with complex environments where the information is very uncertain and additional mathematical and statistical techniques are needed in order to understand the specific situations considered.

Epistemología y Metodología de la Investigación José César Lenin Navarro Chávez,2014-10-21 A investigar se aprende investigando, entonces ¿tendrá algún sentido escribir libros, elaborar apuntes, formular manuales, producir guías o impartir cursos sobre metodología? Existen miles, tal vez millones de escritos sobre el tema, así como también se imparten miles de cursos anuales de metodología en el mundo. ¿Se puede enseñar y se puede aprender a investigar? El conocimiento científico se genera al aplicar los conceptos metodología y método. Metodología es el estudio de los métodos y trata lo

correspondiente a las estrategias y tácticas de investigación, es decir, trata con las reglas para evaluar el valor de verdad de las proposiciones (datos e hipótesis) respecto de los hechos y con las metarreglas para evaluar la eficacia de las reglas. Epistemología y metodología es un libro que profundiza en estas cuestiones y trata de proponer algo nuevo a estos temas. El libro está diseñado para instruir al lector en esta ciencia, desde sus orígenes a las aplicaciones actuales. Para aquellos que estén interesados en estas áreas será un referente muy útil.

Metodología para investigaciones de alto impacto en las ciencias sociales Karla Annet Cynthia Sáenz López, Marta Gonzalo Quiroga, Francisco Javier Gorjón Gómez, Cástor Miguel Díaz Barrado, 2013 La presente obra nos adentra en la metodología de alto impacto, para ser aplicada en las ciencias sociales, nos muestra los diferentes procesos por los que se requiere transitar para producir conocimiento nuevo que mida la realidad y proponga mejoras sustantivas para nuestro entorno. Las ciencias sociales han sido llamadas a aumentar sus alcances, a ser predictivas y con mayor vocación de exactitud. Su multidisciplinariedad permite que esta obra sea considerada como referente internacional por administradores, politólogos, abogados, psicólogos, sociólogos, pedagogos, filósofos, contadores, trabajadores sociales entre otros. En esta obra se plantea desde la elaboración del protocolo de investigación, la construcción de constructos teóricos, la selección apropiada de los métodos cualitativos y cuantitativos, la interpretación de resultados, la redacción, evaluación y cierre de la investigación. Estos tópicos tienen un matiz teórico práctico destacando que se muestran como pueden aplicarse métodos tradicionalmente utilizados en las ciencias exactas a las ciencias sociales, permitiéndoles a éstas últimas explorar nuevas opciones de comprobación de hipótesis. Nos da una visión diferenciada de otras en su género, debido a que sus autores son profesores de metodología en posgrado, todos investigadores reconocidos por los sistemas de investigación de ambos países, resaltando que este trabajo colectivo forma parte de proyectos de investigación específicos.

Teólogos influyentes del siglo XX Sergio Becerra, Fernando Aranda Fraga, Karl G. Boskamp Ulloa, Carlos Cerdá, Alberto Roldán, Silvia Scholtus, Carlos Steger, Omar Cesar Albado, 2025-02-04 Se dice que la teología es el esfuerzo humano de explicar la realidad a la luz de la perspectiva divina, en términos que sean comprensibles para la sociedad contemporánea. También, la teología busca conocer y comprender los propósitos de Dios sin desconectarse de las contingencias, complejidades y ambigüedades de la creación y la historia. De allí, que se utilice a menudo el lenguaje y los parámetros filosóficos del momento para hacer teología. El siglo xx se caracteriza por la diversidad de expresiones teológicas, a menudo contradictorias, que intentan reflexionar sobre Dios y la realidad en términos e intereses propios de un siglo de grandes cambios. Los grandes contrastes entre las teologías propuestas en el siglo xx muestran que el desafío de encontrar un equilibrio entre estos dos polos de interés no siempre ha sido logrado. Por otra parte, el riesgo de llevar a cabo un discurso intelectual muy ligado a un método o escuela de pensamiento es que al perder esta su vigencia hace obsoleta nuestra reflexión. De allí, la importancia de buscar el desarrollo de constructos sobre bases más permanentes. En este sentido, la

teología nunca errará al ser fiel por sobre todo a la revelación divina, que le permite ser más que mera reflexión humana.

Manual de metodología de la investigación en negocios internacionales - 1ra edición Julio César Ramírez Montañez, Rafael Jesús Calles Moreno, 2021-01-01 Este manual es una guía para que los estudiantes de negocios internacionales aprendan a identificar y formular un problema de investigación, aplicando enfoques y métodos tanto cuantitativos como cualitativos. El texto pretende ampliar la comprensión de dichos enfoques y metodologías con el fin de preparar a los estudiantes para sus propios proyectos de investigación en la disciplina de Negocios Internacionales. Este manual los ayudará a identificar, discutir y formular un problema de investigación, a seleccionar y aplicar enfoques y métodos de investigación apropiados y a presentar sus resultados. Bajo el criterio de enseñanza experiencial, los estudiantes tienen la oportunidad de comprender, interpretar y contrastar los distintos conceptos teóricos a partir de ejercicios prácticos, fomentando un desarrollo integral de los postulados expresados y transmitiendo el mayor aprendizaje posible una vez han sido explicados con total detalle y pertinencia. Este libro va dirigido a estudiantes de las carreras de negocios internacionales, administración de negocios internacionales, comercio internacional y comercio exterior. Incluye Información sobre los diferentes enfoques, estrategias y métodos disponibles para llevar a cabo una investigación en negocios internacionales. Técnicas y procedimientos para recopilar y analizar diferentes tipos de datos. Actividades que permiten a los estudiantes correlacionar de manera teórica-práctica los fundamentos de la metodología para la investigación.

Metodología de la investigación total Humberto Naupas, Elias Mejia, Ismael Trujillo, Hugo Romero, Wilfredo Medina, Eliana Novoa, 2023-05-16 Llega a la sexta edición esta obra y sigue siendo un manual valioso para auxiliar y orientar en la ejecución de proyectos de investigación, de tesis principalmente y es en sí un buen ejemplo de metodología pedagógica; cuyo carácter didáctico es de necesidad para lograr su objetivo de eficacia. Es, también, completo porque no solo aborda los tópicos intelectuales a nivel conceptual en los órdenes científico y filosófico, sino que se extiende pertinentemente, a los componentes éticos y morales. Otro acierto de este libro se materializa en que integra en un solo volumen, la información sobre la investigación cualitativa y cuantitativa, de tal manera que el usuario del libro no necesita buscar otra fuente de consulta, facilitando el desarrollo de su trabajo con la subsecuente economía de tiempo y ayuda en la decisión que le corresponda tomar.

Calidad docente Héctor Luis del Toro Chávez, Rodolfo Valentín Muñoz Castorena, Héctor Iván del Toro Ríos, 2020-10-20 Resultados de una investigación que obedece a la necesidad de contar con un análisis de la situación de un problema vigente en la educación superior, en este caso, en el Centro Universitario de Ciencias Económicas Administrativas de la Universidad de Guadalajara, en torno a la calidad docente y su impacto en el rendimiento académico de los alumnos de Matemáticas y Estadística.
