**Heterotopia in Angela Carter's Fiction: Worlds in Collision** Eliza Claudia Filimon, 2013 Angela Carter's work is a collage of discourses and genres. The challenge of finding a critical framework, complex and accurate enough to classify her work, has remained. The spectacular and the pragmatic threads of her texts, framed by extreme seriousness and witty humour are unravelled with the help of a different metaphor, denoting enigmatic spaces, conterdiscourses, borders of otherness - heterotopia. Five novels out of nine, five short stories out of thirty-five, as well as Carter's two film adaptations are filtered through a term extricated from its medical and geographical roots, which emphasizes the ambiguity, as well as the dialogic interaction of Angela Carter's often discordant discourses that have kept her at the top of the literary canon.

The Five Senses Michel Serres, 2016-10-20 Marginalized by the scientific age the lessons of the senses have been overtaken by the dominance of language and the information revolution. With *The Five Senses* Serres traces a topology of human perception, writing against the Cartesian tradition and in praise of empiricism, he demonstrates repeatedly, and lyrically, the sterility of systems of knowledge divorced from bodily experience. The fragile empirical world, long resistant to our attempts to contain and catalog it, is disappearing beneath the relentless accumulations of late capitalist society and information technology. Data has replaced sensory pleasure, we are less interested in the taste of a fine wine than in the description on the bottle's label. What are we, and what do we really know, when we have forgotten that our senses can describe a taste more accurately than language ever could? The book won the inaugural Prix Médicis Essai in 1985. The Revelations edition includes an introduction by Steven Connor.

**The Metamorphoses of Antoninus Liberalis** Antoninus Liberalis, 2018-10-24 These forty-one tales written in the second century AD by Greek author Antoninus Liberalis and translated from the Greek for the first time, offer an unusual insight into the preoccupations and legends of antiquity. These tales are quirky, exciting and sometimes disturbing. Many have relevance for modern as well as classical understanding of psychology and the imagination. Each story is usefully provided with full annotation and commentary.

*On Psychological and Visionary Art* C. G. Jung, 2025-07-22 The first English translation of Jung's landmark lecture on Nerval's hallucinatory memoir In 1945, at the end of the Second World War and after a long illness, C. G. Jung delivered a lecture in Zürich on the French Romantic poet Gérard de Nerval. The lecture focused on Nerval's visionary memoir, *Aurélia*, which the poet wrote in an ambivalent attempt to emerge from madness. Published here for the first time, Jung's lecture is both a cautionary psychological tale and a validation of Nerval's visionary experience as a genuine encounter. Nerval explored the irrational with lucidity and exquisite craft. He privileged the subjective imagination as a way of fathoming the divine to reconnect with what the Romantics called the life principle. During the years of his greatest creativity, he suffered from madness and was institutionalized eight times. Contrasting an orthodox psychoanalytic interpretation with his own synthetic approach to the unconscious, Jung explains why Nerval was unable to make use of his visionary experiences in his own life. At the same time, Jung emphasizes the validity of Nerval's visions, differentiating the psychology of a work of art from the psychology of the artist. The lecture suggests how Jung's own experiments with active imagination influenced his reading of Nerval's *Aurélia* as a parallel text to his own *Red Book*. With Craig Stephenson's authoritative introduction, Richard Sieburth's award-winning translation of *Aurélia*, and Alfred Kubin's haunting illustrations to the text, and featuring Jung's reading marginalia, preliminary notes, and revisions to a 1942 lecture, *On Psychological and Visionary Art* documents the stages of Jung's creative process as he responds to an essential Romantic text.

**Ecological Poetics; or, Wallace Stevens's Birds** Cary Wolfe, 2020-04-07 The poems of Wallace Stevens teem with birds: grackles, warblers, doves, swans, nightingales, owls, peacocks, and one famous blackbird who summons thirteen ways of looking. What do Stevens's evocations of birds, and his poems more generally, tell us about the relationship between human and nonhuman? In this book, the noted theorist of posthumanism Cary Wolfe argues for a philosophical and theoretical reinvention of ecological poetics, using Stevens as a test case. Stevens, Wolfe argues, is an ecological poet in the sense that his places, worlds, and environments are co-created by the life forms that inhabit them. Wolfe argues for a "nonrepresentational" conception of ecopoetics, showing how Stevens's poems reward study alongside theories of system, environment, and observation derived from a multitude of sources, from Ralph Waldo Emerson and Niklas Luhmann to Jacques Derrida and Stuart Kauffman. *Ecological Poetics* is an ambitious interdisciplinary undertaking involving literary criticism, contemporary philosophy, and theoretical biology.

**Dictionary of Classical Mythology** Robert E. Bell, 1982 This dictionary is a topical dictionary of Greek and Roman mythology.

**Surrealist Experiences** Penelope Rosemont, 2000 Essay. Focused on fortuitous encounters and their manysided magic, Rosemont in these essays explores the importance of play, the affinities of alchemy and anarchy, poetry in the comics, the revolutionary significance of a fairy tale, the game of Time-Travelers' Potlatch, and the future of surrealism. **SURREALIST EXPERIENCES: 1001 DAWNS, 221 MIDNIGHTS** is Penelope Rosemont's first book of articles and essays. It includes nearly two dozen texts originally published in surrealist journals from 1970 through the '90s, plus eleven that appear here for the first time. One of the few Americans welcomed into the Surrealist Movement in Paris by Andre Breton, the author has been a force in surrealism since the 1960s as a painter, photographer, and collagist.

**Unlocking the Poetry of W. B. Yeats** Daniel Tompsett, 2018-06-13 Unlocking the Poetry of W.B. Yeats undertakes a thorough re-reading of Yeats' oeuvre as an extended meditation on the image and theme of the heart as it is evident within the poetry. It places the heart at the centre of a complex web of Yeatsian preoccupations and associations—from the biographical, to the poetic and philosophical, to the mythological and mystical. In particular, the book seeks to unlock Yeats' mystifying aesthetic vision via his understanding of the ancient Egyptian Weighing of the Heart ceremony. The work provides a chronological narrative arc that looks to use the theme of the heart as it recurs in the poetry in order to circumvent and overcome more established frameworks. Its purpose is to offer refreshing ways of conceptualizing and building alternatives to more deeply entrenched, but not entirely satisfactory arguments that have been offered since Yeats' death in 1939, while demonstrating the centrality of the occult to Yeats' art.

**Birds in the Ancient World from A to Z** W. Geoffrey Arnott, 2007-09-12 Birds in the Ancient World from A to Z gathers together the ancient information available, listing all the names that ancient Greeks gave their birds and all their descriptions and analyses. W. Geoffrey Arnott identifies as many of them as possible in the light of modern ornithological studies. The ancient Greek bird names are transliterated into English script, and all that the ancients said about birds is presented in

English. This book is accordingly the first complete discussion of ancient bird names that will be accessible to readers without ancient Greek. The only large-scale examination of ancient birds for seventy years, the book has an exhaustive bibliography (partly classical scholarship and partly ornithological) to encourage further study, and provides students and ornithologists with the definitive study of ancient birds.

*Coping With the Gods* Henk Versnel, 2011-05-10 Abandoning monolithic approaches and embracing the possibility of inconsistencies and incongruities in Greek thought, behaviour, and culture, this book investigates how ancient Greeks could validate the complementarity of dissonant, if not contradictory, representations in e.g. polytheism, theodicy, divine omnipotence and ruler cult.

*Omens and Oracles* Matthew Dillon, 2017-07-14 Addressing the role which divination played in ancient Greek society, this volume deals with various forms of prophecy and how each was utilised and for what purpose. Chapters bring together key types of divining, such as from birds, celestial phenomena, the entrails of sacrificed animals and dreams. Oracular centres delivered prophetic pronouncements to enquirers, but in addition, there were written collections of oracles in circulation. Many books were available on how to interpret dreams, the birds and entrails, and divination as a religious phenomenon attracted the attention of many writers. Expert diviners were at the heart of Greek prophecy, whether these were Apollo's priestesses delivering prose or verse answers to questions put to them by consultants, diviners known as manteis, who interpreted entrails and omens, the chresmologoi, who sang the many oracles circulating orally or in writing, or dream interpreters. Divination was utilised not only to foretell the future but also to ensure that the individual or state employing divination acted in accordance with that divinely prescribed future; it was employed by all and had a crucial role to play in what courses of action both states and individuals undertook. Specific attention is paid in this volume not only to the ancient written evidence, but to that of inscriptions and papyri, with emphasis placed on the iconography of Greek divination.
